9. The Trading Terminal

[← Previous Chapters](#) [Next →](#)

9.1 – Trading Terminal

Over the last few chapters, we have understood several things related to the stock markets. It is time for us to figure out how one can actually transact in the stock markets. There are three options available for you to place a transaction in the stock market –

1. Call your stocks broker (usually on the central support number), and request to buy or sell a stock; this is called “Call & Trade.”
2. Use a web application
3. Use a mobile application

Regardless of which method you choose, the selected method gives you access to the stock market. Think of this access as a gateway. The gateway allows you to do multiple things, such as transact in shares, track your Profit & Loss, track market movements, manage your funds, view stock charts, access trading tools, etc. This chapter aims to familiarize you with this gateway, also called a ‘Trading terminal’. To explain this chapter, I’ll use Zerodha’s trading terminal called ‘Kite.’ If you are with another broker, then the trading terminal provided to you will have (should have) similar features and functionality.

You can access the trading terminal by entering the URL on your browser. For Zerodha Kite, it is kite.zerodha.com. To access the trading terminal, you must have a trading account with your broker. A good trading terminal offers many features. We will start by understanding a few basic features. Let us set two basic tasks, and we will accomplish them using the trading terminal, and in the process, we learn the basics practically. Here are the two tasks –

1. Buy one share of ITC, and
2. Track the price of Infosys

While we achieve the above two tasks, we will also learn about all the relevant concepts.

9.2 – The login process

The trading terminal is quite sensitive as it contains information about all your securities and funds. SEBI has been working hard to ensure the relevant regulations are in place to prevent situations where access to the client's trading terminal is compromised. To ensure adequate security, brokers have to follow a stringent login process. The process involves entering your broker-provided user ID (it's referred to as the Kite ID in Zerodha), and a password.

Once you click login, the user id and password are authenticated, and then you are prompted to enter an external TOTP (Time based one-time password). TOTP, as the name suggests, are time sensitive and keep changing once in a few seconds. TOTP can be set up using 3rd party authentication software like Google authenticator or Authy.

Once you validate the TOTP, you will instantly get access to your trading account. I'd encourage you to [read this article](#) to learn about TOTP, the general login process, and the need to safeguard your trading account.

9.3 – The Market watch

Once you successfully log in to the platform, you must populate the 'market watch' with the stocks you are interested in. Think about the market watch as a blank slate. Once the stock is loaded on the market watch, you can easily transact and query information about it. A blank market watch looks like this (this is also the screen that you see once you log in)

The 600.2 under equity and 136.75 under commodities indicate my fund balance. So 600 Rupees for Equity (to buy and sell stocks), and 136 Rupees to buy commodities. You can add funds from your bank to your trading account or withdraw funds from your trading account back to your bank account by clicking on the fund tab on top.

Alright, let us work on the first task, i.e., to buy one share of ITC. As a first step, we will load ITC Ltd onto the market watch. To do this, we have to search for ITC in the search bar, and the drop-down will show the stock in different exchanges(NSE/BSE).

You only need to look for 'ITC'; other instruments, like ITC-BE, ITC-BL, or ITC6, are all different instruments. We will discuss more of that later. We are interested in buying one share of ITC (or ITC stock), and the relevant instrument is ITC. So let us click on the 'Add symbol' to add the stock to the Market Watch

The Marketwatch will display the last traded price, a percentage change of the stock.

- The last traded price of the stock (LTP) – This gives us a sense of how much the stock is trading at the very moment.
- Percentage change – This indicates the percentage change in the LTP with respect to the previous day's close.

Some basic information that will be needed at this point would be:

- The previous day's close – As the name suggests, it's the previous day's close price.
- OHLC – Open, High, Low, and Close give us a sense of the range within which the stock is trading during the day. Do recollect we discussed OHLC in the previous chapter.
- Volumes – Gives a sense of how many shares are being traded at a particular time.

You can find this information under Market Depth. If you hover over the stock name from the left, you will find Buy, Sell, Market Depth, and chart options. If you click on Marketdepth, you will find the above information, including the best bid and offer price ladder. We will cover the Bid and Offer prices soon.

NIFTY 50 10442.00 -0.02 % SENSEX 33754.81 -0.07 %

Search eg: gold mcx, infy bse

Market Depth (D)

BID	ORDERS	QTY.	OFFER	ORDERS	QTY.
262.15	16	5709	262.20	5	440
262.10	66	15890	262.25	4	135
262.05	31	6895	262.30	6	775
262.00	310	36656	262.35	14	3981
261.95	13	14979	262.40	12	5693
Total		8,33,523	Total		12,95,789
Open		265.90	High		265.90
Low		262.15	Close		263.30
Volume		27,31,135	Avg. price		263.39
LTQ		335			

As you can see, the last traded price of ITC is Rs.262.25, and it is trading -0.40% lower than the previous day's close, which was Rs.263.30. The open for the day was at Rs.265.90, the highest price and the lowest price at which the stock traded for the day was Rs.265.90 and Rs.262.15 respectively. The volume for the day is close to 27 lakh shares.

9.4 – Buying stock through the trading terminal

Our goal is to buy one share of ITC. We now have ITC in our trading terminal. The first step for this process would be to invoke what is called a buy order form.

- Hover over the stock you want to Buy and click on the Buy Icon (B)
- Clicking on the Buy icon invokes the buy order form, as seen below

Buy ITC x 1 Qty at ₹261
₹262.15 on NSE

☐ MIS ☒ CNC ☐ MARKET ☒ LIMIT ☐ SL ☐ SL-M

Qty.	Price	Trigger price	Disclosed qty.
1	261	0	0

More options

The order form is pre-populated with some information like the price and quantity. We need to modify this as per our requirements. Let us begin with the first drop-down option on the top. By default, the exchange specified would be NSE, but you can select BSE if you wish.

The next entry is the 'order type.' By clicking on the drop-down menu, you will see the following four options:

- Limit
- Market
- SL
- SL-Market

Let us understand what these options mean.

You can opt for a '**Limit**' order when you are particular about the price you want to pay for a stock. In our case, the last traded price of ITC is Rs.262.25 but say we want to limit our buy price to Rs.261, twenty-five paisa lower than the LTP. In such a situation, I can use the limit feature and specify the price at which I want to buy the stock. The limit feature is great as it gives us control over the price at which we want to buy, but on the flip side, if the stock price does not fall to our limit price, i.e., 261, our order will not get executed, and we won't get to buy. This is one of the drawbacks of a limit order. The limit order stays valid till the market closes, i.e., 3:30 PM, and then gets canceled.

You can also opt for a **market order** when you intend to buy at market-available prices instead of a limited price. So if you were to place a market order, as long as sellers are available, your order would go through, and ITC will be bought in and around Rs.262.25. Suppose the price goes up to Rs.265 coinciding with your market order placement, then you will get ITC at Rs.265. When you place a market order, you will never be sure of the price at which you will transact, which could be quite dangerous if you are an active trader. A market order will always ensure your order goes through, unlike a limit order.

A **stop-loss order** protects you from an adverse movement in the market after initiating a position. Suppose you buy ITC at Rs.262.25 with an expectation that ITC will hit Rs.275 shortly. But instead, what if the price of ITC starts going down? We can protect our position by defining the worst possible loss you are willing to take. For instance, in the example, let us assume you don't want to take a loss beyond Rs.255

This means you have gone long on ITC at Rs.262.25, and the maximum loss you will take on this trade is Rs.6 (255). If the stock price drops to Rs.255, the stop loss order gets active and hits the exchange, and you will be out of the loss-making position. If the price is above 255, the stop-loss order will be dormant.

A stop-loss order is a passive order. To activate it, we need to enter a trigger price. A trigger price, usually above the stop-loss price, acts as a price threshold, and only after crossing this price does the stop-loss order transition from a passive order to an active order.

Going with the above example:

We are long at Rs.261. If the trade goes bad, we want to get rid of the position at Rs.255. Therefore 255 is the stop-loss price. The trigger price is specified so the stop-loss order would transition from passive to active. The trigger price has to be higher (or equal) to the stop-loss price. We can set this to Rs.255 or higher. If the price drops below 255, the stop loss order gets active.

Returning to the main buy order entry form, we move directly to the quantity once the order type is selected. Remember the task is to buy one share of ITC; hence we enter 1 in the quantity box. We ignore the trigger price and disclosed quantity for now. The next thing to select is the product type.

Select CNC for delivery trades. If you intend to buy and hold the shares for multiple days/months/years, you must ensure the shares reside in your Demat account. Selecting CNC is your way of communicating this to your broker.

Select MIS if you want to trade intraday. MIS is a margin product; we will understand more about this when we take up the derivatives module.

Once these details are filled in your order form, the order is good to hit the markets. The order gets transmitted to the exchange as soon as you press the submit button on the order form. A unique order ticket number is generated against your order.

Once the order is sent to the exchange, it will not get executed unless the price hits Rs.261. As soon as the price drops to Rs.261 (assuming sellers are willing to sell one share), your order gets through and is eventually executed. As soon as your order is executed, you will own one share of ITC.

9.5 – The order book and Trade book

Think of the order book and trade book as online registers within the trading terminal. The order book keeps track of all the orders you have sent to the exchange, and the trade book tracks all the trades. Think of it this way – when you order goods on Amazon, you first add items to the cart. The cart is the order book. You can add items, delete, or modify the order from the cart (order book). But when you press the buy button on Amazon, the order gets placed, and a receipt is generated. The trade book is that receipt. You also get a detailed receipt emailed to you called a 'Contract Note'; we will discuss that later; for now think about the trade book as a general receipt for all the trades you carry out on the terminal.

So the order book has all the details regarding your order. You can navigate to the order book by clicking the Orders tab.

The order book provides the details of the orders you have placed. You should access the order book to:

- Double-check the order details – quantity, price, order type, product type
- Modify the orders – For example, if you want to modify the buy order, say from 261 to 259.
- Check Status – After placing the order, you can check the status. The status would state open if the order is completed partially, it would state completed if the order has been completed, and it would state rejected if your order has been rejected. You can also see the details of the rejection in the order book.

If you notice, there is an open order to buy one share of ITC at Rs.261.

If you hover over the pending orders, you can find the option to modify or cancel the order.

By clicking 'modify,' the order form will be invoked, and you can make the desired changes to the order.

Once the order is processed, and the trade has been executed, the trade details will be available in the trade book. You can find the trade book just below the order book.

Here is a snapshot of the trade book:

Trades ^ (1)

Q Search | Historical Download

Trade ID	Time	Type	Instrument	Qty.	Avg. Price	Product
27264787	14:11:17	BUY	ITC NSE	1	262.2	CNC

The trade book confirms that the user ordered to buy one share of ITC at Rs 262.2. Also, notice a unique exchange order number is generated for the trade.

So with this, our first task is complete!

We now officially own one share of ITC. This share will reside in our DEMAT account until you decide to sell it.

The next task is to track the price of Infosys. The first step would be to add Infosys to the market watch. We can do this by searching for Infosys in the search box.

Low		998.40	Close		1015.85
Volume		36,93,244	Avg. price		1011.68
LTO		33			

Notice we have two stocks on the watchlist now – Infy and ITC. We can now track live price information on Infosys. The last trade price is Rs.1014.75; the stock is down -0.11% from its previous day's close of Rs.1015.85. Infosys opened the day at Rs.1014.80, making a low of Rs.998.40 and a high of Rs.1028.95. The volumes were 3.6 million shares.

Please note while the open price will be fixed at Rs. 1014.80, the high and low prices change as and when the price of Infosys changes. For example, if Infosys moves from Rs.1014.2 to Rs.1050, the high price will reflect Rs. 1050 as the new high.

Notice below that the LTP of Infosys is in green, and ITC is in red. The cell is highlighted in green if the current LTP is higher than the previous close, and red otherwise.

Have a look at the snapshot below:

NIFTY 50	10453.20	0.09 %	SENSEX	33796.30	0.06 %
Q Search eg: gold mcx, infy bse, nifty fut					
ITC		-0.27 %	▼	262.60	
INFY		0.49 %	▲	1020.80	

While writing this chapter, the price of Infosys moved from 1014.20 to 1020.80, and the color changed to red from blue.

Besides the basic information about the LTP, OHLC, and volume, we can also dig deeper to understand real-time market participation, which is available in market depth. I want to draw your attention to the blue and red numbers called the Bid and Offer prices.

9.6 – The Bid and Offer Price

If you want to buy a share, you need to buy it from a seller. The seller will offer the shares at a price that he or she thinks is fair. The price that the seller offers you is called the **‘Offer Price.’** The offer price is highlighted in red. Let us analyze this in a bit more detail.

SI No Offer Price Offer Quantity Number of Sellers

01	3294.80	2	2
02	3294.85	4	2
03	3295.00	8	2
04	3296.20	25	1
05	3296.25	5	1

By default, the market depth window displays the top 5 bids and offer prices. In the table above, we have the top 5 offer prices.

The first offer price is Rs.3294.80. At this particular moment, this is the best price to buy the stock and there are only two shares available at this price being offered by two different sellers (both of them are selling one share each). The next best price is Rs.3294.85. At this price, four shares are offered by two different sellers. The third best price is Rs.3295, at which eight shares are available, and two sellers offer this. So on and so forth.

As you notice, the higher the asking price, the lower the priority. For example, the 5th position is an asking price of Rs.3296.25 for five shares. This is because the stock exchanges prioritize sellers willing to offer their shares at the lowest possible price.

Notice that even if you want to buy ten shares at Rs.3294.8, you can only buy two shares because only two are being offered at Rs.3294.8. However, if you are not particular about the price (aka limit price), you can place a market order. When you place a market order to buy 10 shares, this is how it will go –

- Two shares are bought @ Rs.3294.8
- Four shares are bought @ Rs.3294.85
- Four shares are bought @ Rs.3295.00

The ten shares will be bought at three different prices. Also, in the process, the LTP of Infosys will jump to Rs.3295 from Rs.3294.8

If you want to sell a share, you need to sell it to a buyer willing to buy it from you. The buyer will buy the shares at a price that they think is fair. The price that the buyer expects is called the 'bid price.' The bid price is highlighted in blue. Let us analyze this part in a bit more detail:

SI No Bid Price Bid Quantity Number of Buyers

01	3294.75	10	5
02	3294.20	6	1
03	3294.15	1	1
04	3293.85	6	1
05	3293.75	125	1

Again by default, the market depth window displays the top five bid prices. Notice the best price at which you can sell shares is Rs.3294.75, and at this price, you can only sell ten shares as only five buyers are willing to buy from you.

If you were to sell 20 shares at market price, the following would be the execution pattern :

- Ten shares sold @ Rs.3294.75
- Six shares sold @ Rs.3294.20
- One share sold @ Rs.3294.15
- Three shares sold @ Rs.3293.85

So, in a nutshell, the bid and offer prices give you information about the top 5 prices at which the buyers and sellers are stacked. You need to understand how buyers and sellers place their trades, especially if you are an intraday trader.

By default, the bid-offer is shown only for the top 5 prices. You can, however, get an insight into the top 20 bids and offers by looking at the 20-depth window. I have discussed 20 in-depth details in the last chapter of this module.

9.7 – Conclusion

The trading terminal is your gateway to markets. The trading terminal has many features that are useful to traders. We will explore these features as we progress through the various learning modules. At this stage, you should know how to set up a market watch, transact (buy and sell) in stocks, view the order and trade book, and understand the market depth window.

One last thing before we wind up this chapter – the trading terminal is continuously evolving to ensure the user experience is smooth. A few years down the lane, the UI/UX may have changed, but the concepts of the order book, trade book, SL, limit order, etc, will remain the same.

Key takeaways from this chapter

1. A trading terminal is your gateway to markets. You must know the operations of a trading terminal if you aspire to become an active trader.
2. You can load the stock you are interested in on the market watch to track all the relevant information.
3. Some basic information on a market watch is – LTP, % change, OHLC, and volumes.

4. You must invoke a buy order form by pressing the 'B' key to buy a stock. Likewise, to sell a stock, you need to invoke a sell order form by pressing 'S' key.
5. You choose a limit order type when you are keen on transacting at a particular price; else, you can opt for a market order.
6. You choose CNC as the product type if you want to buy and hold the stock across multiple days. If you want to trade intraday, you choose MIS.
7. An order book lets you track orders that are both open and completed. You can modify the open orders by clicking on the modify button in the order book's bottom.
8. Once the order is completed, you can view the trade details in the trade book. In the case of a market order, you can view the exact trade price by accessing the trade book.
9. The market watch enables you to see bids and offer prices.
10. The bid & offer prices refer to the price at which you can buy and sell shares. The top 5 bid and offer prices are displayed in the market depth window by default.

[July 3, 2026 at 11:49 am](#)

While writing this chapter, the price of Infosys moved from 1014.20 to 1020.80, and the color changed to red from blue.

Is the above statement correct? Or it should be green?

[Reply](#)

o *Karthik Rangappa says:*

[July 5, 2026 at 8:09 am](#)

Blue or green to indicate bullishness is your call, it can be anything. Orange if you like 😊

[Reply](#)

■ *Joe says:*

[July 6, 2026 at 11:55 am](#)

Now I am more confused. Does it mean there are no specific colours to mean specific things in the stock market? Here '\the price of Infosys moved from 1014.20 to 1020.80, and the color changed to red from blue\'', the stock price is going up, but it is represented by red. Does that make sense?

[Reply](#)

■ *Karthik Rangappa says:*

[July 8, 2026 at 5:45 pm](#)

No, it just means you can give candles any colour you choose. If you like green and pink thats ok too.

[Reply](#)

[August 31, 2025 at 12:50 pm](#)

hello sir, i read this line- Rs.262.25 but say we want to limit our buy price to Rs.261, twenty-five paisa lower than the LTP., but I think there is a typo error as if we are buying at 261 then we are 1 rupees 25 paisa lower not only 25 paisa, am i right or there is another method of calculating the difference in finance

[Reply](#)

- o  *Karthik Rangappa* says:
[September 1, 2025 at 4:36 pm](#)

Ah yes, thats a typo 😊

[Reply](#)

7.  *Ayushi* says:
[July 22, 2025 at 5:27 pm](#)

Hi Sir, I have a question, when we buy or sell shares, like you mentioned if I have placed an order of 5 shares and there are 5 different sellers who are willing to sell at 5 different prices. Then what would my total amount be even of the market price at that time says 200 rs. would it be $200 \times 5 = 1,000$ or would it be $1 \times 198 + 1 \times 199 + 1 \times 200 + 1 \times 197 + 1 \times 201 = 995$?

[Reply](#)

- o  *Karthik Rangappa* says:
[July 24, 2025 at 10:27 am](#)

So it depends on the price at which you want to buy versus the price at which ppl are willing to sell. If its all from 1 seller, your price will be just 1, else it will be averaged across sellers.

[Reply](#)

8.  *Jithesh* says:
[June 16, 2025 at 9:57 pm](#)

If I buy a stock with type = '\Intraday\' , and don\'t sell it by the end of the day, what happens?

[Reply](#)

- o  *Karthik Rangappa* says:
[June 17, 2025 at 10:08 am](#)

It will get auto squared off, but the onus is on you to double check this and ensure its squared off.

[Reply](#)

[Reply](#)

10.  *Pratham* says:
[October 7, 2024 at 11:47 pm](#)

What is the difference between SL and SL-market? As 4 types of orders were mentioned.

[Reply](#)

- o  *Karthik Rangappa* says:
[October 8, 2024 at 12:23 pm](#)

Its mentioned in the chapter itself, Pratham.

[Reply](#)

-  *Sujal* says:
[April 29, 2025 at 10:57 am](#)

Why you called web application terminal fooling us?

[Reply](#)

-  *Karthik Rangappa* says:
[April 30, 2025 at 11:32 am](#)

Sorry, dint get the context 😊

[Reply](#)

11.  *DhanaSrinivas* says:
[October 3, 2024 at 12:13 pm](#)

I don't think this was a major mistake, it was a very minute one.

In this paragraph :

"You can opt for a 'Limit' order when you are particular about the price you want to pay for a stock. In our case, the last traded price of ITC is Rs.262.25 but say we want to limit our buy price to Rs.261, twenty-five paisa lower than the LTP."

I think it should be "one rupee twenty-five paisa" instead of "twenty-five" paisa.

[Reply](#)

- o  *Karthik Rangappa* says:
[October 4, 2024 at 3:18 pm](#)

Ah yes, please excuse that inadvertent typo 😊

[Reply](#)

12.  *SL* says:
[September 3, 2024 at 4:55 pm](#)

When does the stop loss order come in handy and how is it different from a GTT order that I can put in for the same effect?

[Reply](#)

-  *Karthik Rangappa* says:
[September 4, 2024 at 11:52 am](#)

SL order comes in handy when you want to control a trading position from making further losses. With a stop loss, you kind of envision what could be the worst case loss. GTT on the other hand is a price trigger, you can use this to control loss or book profit.

[Reply](#)

-  *Akshit Das* says:
[June 11, 2025 at 2:10 am](#)

I'm sorry but I got even more confused.
Kindly correct me if I'm wrong.

GTT can do the job of a Stop-Loss and can also be used to book profit if we have a target price in our mind. Am I right?

[Reply](#)

-  *Karthik Rangappa* says:
[June 11, 2025 at 10:25 am](#)

Yes, that's possible.

[Reply](#)

13.  *M Shaikh* says:

20.  *Franklin* says:
[April 22, 2024 at 12:28 am](#)

Sir, Is it still the same process, like, can we short in a CNC basis, like, can short position be carried out to the next day?

[Reply](#)

- o  *Karthik Rangappa* says:
[April 22, 2024 at 8:09 am](#)

An no, you cannot short in CNC and carry forward the position to next day. You will have square off the position the same day.

[Reply](#)

21.  *Vishal Kumar* says:
[April 2, 2024 at 1:36 pm](#)

With due respect Sir In the Section 9.5 – The order book and Trade book, how come the colour changed to red from blue when the price moved from 1014.20 to 1020.80. I guess it should change from red to blue if I'm not wrong!

[Reply](#)

- o  *Karthik Rangappa* says:
[April 3, 2024 at 8:42 am](#)

Thanks Vishal, checking on this.

[Reply](#)

22.  *Tanush* says:
[March 12, 2024 at 12:00 pm](#)

Can you please explain a bit more about GTT?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 12, 2024 at 12:15 pm](#)

This should help – <https://support.zerodha.com/category/trading-and-markets/gtt/articles/how-can-i-use-the-gtt-feature>

[Reply](#)

23.  vedang says:
[March 9, 2024 at 8:08 pm](#)

I'm curious to know whether trading platforms like Kite include the traded stock volume of institutional investors in their order books, or if they only include retail trades. If not, where can I track the volume of institutional trades?

[Reply](#)

- o  Karthik Rangappa says:
[March 10, 2024 at 12:26 pm](#)

It includes all trades and volumes as reported by the exchanges.

[Reply](#)

24.  vedang says:
[March 9, 2024 at 8:06 pm](#)

When looking at the order books on platforms like Kite and others, I noticed the total and volume numbers were different. I'm curious if these numbers can vary between brokers. If yes, where can I find a terminal that shows the total number of orders?

[Reply](#)

- o  Karthik Rangappa says:
[March 10, 2024 at 12:11 pm](#)

No, they cant vary as these are all streamed from the exchanges to all brokers. So its the same data for everyone.

[Reply](#)

- o  Karthik Rangappa says:
[January 5, 2024 at 10:02 am](#)

Thanks, Praveen. Will try and fix that soon 😊

[Reply](#)

26.  vash says:
[December 21, 2023 at 11:59 am](#)

Let us suppose a stock is currently at price Rs.102, and i place a order of buying at Rs.100 100 stocks. 2nd person has placed for buying Rs.100 for 10 stocks, and 3rd person placed an order for Rs.99 100 stocks. Lets Assume 100 was the highest bid. however stocks available for sell have only 12 stocks at price 100 and after that at Rs.99 stocks have 100 stocks available for sell. in this case 2nd person order is feasible as the number of demanding stocks is satisfied. and the same for 3rd person as his 99Rs. is also satisfied. In this case how will my order be executed because the stock prices came from 102 to 99 (according to last traded price) and i was demanding for 100, but it seems to have been executed?

[Reply](#)

- o  *Karthik Rangappa* says:
[December 22, 2023 at 7:50 am](#)

The order or priority is time wise and price wise. Depending on who has placed the order first, execution will happen.

Suppose there is no market order. Only limit orders.

[Reply](#)

- o  Karthik Rangappa says:
[April 19, 2023 at 9:33 am](#)

Such a thing does not exist anyway 😊

But if it were, then like I mentioned, the order will stay pending in the system.

[Reply](#)

40.  manohar says:
[April 18, 2023 at 12:12 pm](#)

Hi sir,

I have a doubt (price discriminatory rule), please clarify. In bid section let say in a given time period the top 3 bids are 102(quantity 5), 101(quantity 5), 100(quantity 10). And top 3 offers are 100(15), 104(3), 105(4). Here best offer matched with buy order of 100(10). So sell order got executed

for order of 100(15) . Now my question is does bid order of both 101(5) and 100(10) got executed or how? As continuous market follows price discriminatory rule for order matching. Please explain sir, searched a lot but no proper clarification about discriminatory rule.

[Reply](#)

- o  *Karthik Rangappa* says:
[April 19, 2023 at 9:32 am](#)

In this case only 10 at 100 will get transacted and the remaining 5 are pending until new offers at 100 come by or the person modifies the order to buy at a higher price.

[Reply](#)

41.  *SHIVADITYA* says:
[April 1, 2023 at 2:56 am](#)

Please make me understand!

What is validity (Day, IOC, minutes) in a sense that what if I want to hold an order for long time and set validity Day, would my equity be squared off after trading day?

Actually I want to buy 10 shares of a firm for long time. Kindly state every little process.

[Reply](#)

- o  *Karthik Rangappa* says:
[April 1, 2023 at 8:37 am](#)

Validity represents the time up to which your order will stay in the system.

I'd suggest you watch this video to understand better – <https://www.youtube.com/watch?v=5t5O0MnNJNE&list=PLX2SHiKfualH9XGLv9r1sdKucoGky35J7&index=9>

[Reply](#)

53.  *Awadhesh Kumar Mishra* says:
[August 23, 2022 at 10:19 pm](#)

Though I could understand the procedure of placing an SL Buy order, I am unable to get the purpose of it. To me it appears a Buy order which gets activated at a pre-given trigger price and buys at the pre-given price. That is, if the CMP of ITC is 261 but I want to buy it at 255 only, I will give a buy order of SL type. My problem is what is the concept of stop loss in it? Further, if I want to buy ITC at CMP (261) but also want to apply a Stop Loss at 255 (meaning it should automatically sell in case price falls to 255), how to do it. Kindly explain.

[Reply](#)

- o  *Karthik Rangappa* says:

[August 24, 2022 at 8:02 am](#)

Its just that you are using a stop loss order for a different purpose. Once you buy ITC at 261, you can place an SL order at 255 or even a GTT at 255. Check this video for order types – <https://www.youtube.com/watch?v=5t5O0MnNJNE&list=PLX2SHiKfualH9XGLv9r1sdKucoGky35J7&index=9>

[Reply](#)

55. *KATLA SRIKANTH* says:

[July 29, 2022 at 3:30 pm](#)

This is why we need as beginners. In the paragraph of BIDDING, you have been told ,that Buying order will excuted from lowest price to highest price in the market on that day and Selling order excuted from highest price to lowest price on that day....As How is it possible sir?

[Reply](#)

o *Karthik Rangappa* says:

[July 30, 2022 at 10:57 am](#)

Buyers want to buy on lower prices, sellers want to sell at higher prices. A trade occurs when the buyers and sellers both agree on a price.

[Reply](#)

56. *Samir* says:

[June 19, 2022 at 12:28 pm](#)

Hi Karthik,

Complements for creating such an awesome learning resource. Btw, mobile app has better readability then the website version – if setting option can be added to the website, that would be great.

A quick question: while explaining Ask and Bid price, the section says the following:

\"However, if you are not particular about the price (aka limit price), you can place a market order. When you place a market order at this stage, this is what happens:

2 shares are bought @ Rs.3294.8
4 shares are bought @ Rs.3294.85
4 shares are bought @ Rs.3295.00

The 10 shares will be bought at three different prices. Also in the process, the LTP of Infosys will jump to Rs.3295 from Rs.3294.8\"

Question: Should not the last sentence say that the LTP of Infosys will jump to Rs. 3295 (and not 3294.8) ?

Best regards!

[Reply](#)

[January 30, 2022 at 1:44 pm](#)

Hello sir, can we make a spike in the graph by placing the offer(5% higher than the LTP) through one account and bid at the same price through the second account?

[Reply](#)

- o  Karthik Rangappa says:
[January 31, 2022 at 10:38 am](#)

Yup, thats possible as long as the price is within the day\'s trading range.

[Reply](#)

63.  Vivek Karthik says:
[January 17, 2022 at 4:06 pm](#)

Hey Mr. Karthik!

I am of the opinion that this sentence requires a correction – The price of Infosys moved from 1014.20 to 1020.80, and the colour changed to red from blue.

Shouldn\'t it be – the colour changed from red to green?

2. Your marvelous articles have given me the confidence to get ahead of myself and start transacting. It\'s only when I reached this article did I realise that squaring off a CNC order will be charged. I humbly request you to post transaction charges for CNC and MIS orders. I feel like I\'ve been placing unusually high number of trades. I am clueless about the charges. Kindly assist in this regard!

[Reply](#)

- o  Karthik Rangappa says:
[January 17, 2022 at 7:38 pm](#)

- 1) Red, blue, green – these are no standard colour code actually. Red-Green or Red-Blue, both works 😊
- 2) Vivek, here is the list of all charges – <https://zerodha.com/charges/#tab-equities>

[Reply](#)64. *Pramod* says:[January 14, 2022 at 10:22 pm](#)

Sir, I have bought 100 qty of a call option with a strike price of 18400 with a premium of 55.40 Rs for MIS position. I already have a fund of 10.33k in my account. When I square off my position at 65 Rs premium rate, this order get rejected. It shows message of insufficient fund, your required margin should be 192258 Rs, but the available fund is only 10.33k. Please clarify it.

[Reply](#)o *Karthik Rangappa* says:[January 15, 2022 at 1:30 pm](#)

Pramod, you must have other positions open. I'd suggest you speak to the customer support desk for this.

[Reply](#)65. *Yogesh* says:[January 4, 2022 at 3:35 pm](#)

Hi Karthik,

In your Mobile terminal, we can see % change as well as the value change for the stock however, on computer version only % comes.

Can we have the same on Computer portal as well

[Reply](#)o *Karthik Rangappa* says:[January 4, 2022 at 10:01 pm](#)

Checking this.

[Reply](#)66. *Shashank* says:[December 27, 2021 at 7:27 pm](#)

Hi Karthik,

I wanted to ask you what order type can I use if I want to swing trade over a period of 2 sessions?

As I understand, MIS is used exclusively for intraday and the position gets squared off at the end of the same trading session automatically, whether you're in profit or loss. And CNC is order type for delivery of stocks to your DEMAT account.

In case of CNC, since the delivery takes 3 working days, if I want to square off my position and book my profits on the second day, I would essentially be selling stocks that I haven't received delivery of. I was wondering what are the technical and legal implications of that.

Please let me know what is the best order type in such a case.

[Reply](#)o *Karthik Rangappa* says:[December 27, 2021 at 7:55 pm](#)

Any position held overnight, is NRML only. For example, if you buy a stock (with intention of 2-day swing), you should use NRML. Delivery of these shares happen on T+2 basis, but if you square off before that, it will be considered as a BTST trade.

[Reply](#)

67. Sandeep says:

[December 24, 2021 at 9:28 pm](#)

If i buy shares under MIS and I could not sell them by 3:20 PM, and if I dont have sufficient funds in account, what will happen to the shares during auto square off?

[Reply](#)

o Karthik Rangappa says:

[December 25, 2021 at 5:05 am](#)

Sandeep, MIS orders will be squared off by RMS on your behalf by the risk management team. But the onus is on you to ensure that the order has gone through.

[Reply](#)

o  *Karthik Rangappa* says:
[August 23, 2021 at 10:10 pm](#)

You can use 40K, Sameer.

[Reply](#)

88.  *ADI* says:
[August 2, 2021 at 12:33 pm](#)

Sir where can I see the face value of shares?

[Reply](#)

o  *Karthik Rangappa* says:
[August 2, 2021 at 7:05 pm](#)

You can check the stock page on NSE, you will get it. Check this for Infy –
<https://www.nseindia.com/get-quotes/equity?symbol=INFY>

[Reply](#)

89.  *Urvashi Mody* says:
[August 2, 2021 at 11:49 am](#)

Sir,

I am learning to do intraday using buy,sell using the SAME share,multiple times.

For example...

I bought RIL worth 50000 in MIS and sold with profit of one percent.

Then RIL went down again.

I bought in MIS worth 50000.

But this NEW purchase go superimposed on the Earlier intraday trade in RIL.

Luckily RIL went up again and I could sel it with more profit.

Is there a way to avoid this superimposing of second intraday trade on the profit of earlier first trade.
 ????

If it remains a Distinct trade we can work with clear mind .

I would prefer to constantly buy n sell a same share in a day...

Kindly advise the correct way to do it...

Urvashi mody

[Reply](#)

- o  *Karthik Rangappa* says:
[August 2, 2021 at 7:03 pm](#)

YYou had posted this query earlier as well, have posted a response.

[Reply](#)

90.  *Sujit* says:
[July 28, 2021 at 11:43 am](#)

For example; I want to buy ITC shares and i will type itc and it will show itc listed on bse and nse right? Will the price be different in each market? If so, why and how will it be different in bse and nse?

[Reply](#)

- o  *Karthik Rangappa* says:
[July 28, 2021 at 7:36 pm](#)

It can be slightly different, maybe by a few paise here and there.

[March 16, 2021 at 11:04 am](#)

Hi sir,

How to authorise to sell via CDSL TPIN for more than one day for GTT sell order on my holdings?

Regards

[Reply](#)

120.  *Ankit Kumar* says:
[March 16, 2021 at 11:01 am](#)

Hi Sir,

I have a question regarding GTT stop loss on my holdings.

Let's say if I want to sell my holdings through GTT order then I have to authorise to sell through CDSL TPIN.

Do I need Authorize daily or is there any way to do it for longer period?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 16, 2021 at 9:55 pm](#)

You will have to pre-auth the holdings as GTT. Do check this <https://zerodha.com/z-connect/featured/update-to-cdsls-tpin-authorisation-process-for-selling-stocks>

[Reply](#)

121.  *Devi* says:
[March 15, 2021 at 7:09 pm](#)

Hi Karthick,

Above copied is from Bhav copy.

You didn't answer my query.

Is settle price shown as LTP on kite console ? Yes or NO?

Thanks,

Mangadevi

[Reply](#)

- o  *Karthik Rangappa* says:

[March 15, 2021 at 10:31 pm](#)

We show according to the bhav copy. Btw, if the option is illiquid with no trades, then NSE arrives at the settlement price by calculating the theoretical price.

[Reply](#)

122.  *Devi* says:

[March 12, 2021 at 1:08 pm](#)

Hi Karthick,

I understand the full form of LTP.

My query is why Zerodha is showing settle price as LTP on kite console when no contracts are traded? is it expected ?

[Reply](#)

o  *Karthik Rangappa* says:

[March 13, 2021 at 8:35 am](#)

Devi, how can we show LTP on our own? There must been a trade (please cross-check Bhav copy, hence the closing price). I'd suggest that you also speak to NSE for full clarity.

[Reply](#)

123.  *Rahul Jha* says:

[March 12, 2021 at 10:26 am](#)

How to put stop loss and target for MIS orders effectively? Do we need to make seperate buy and sell orders for target and stop loss?

[Reply](#)

o  *Karthik Rangappa* says:

[March 12, 2021 at 11:48 am](#)

YOu can use cover order, Rahul. But CO is only for SL.

[Reply](#)

124.  *Devi* says:

[March 12, 2021 at 7:38 am](#)

May I know How is this SETTLE_PR is related to LTP ?So is that what is reflected as LTP in zerodha if there are no trades?

And how is settlement price calculated in case of no contracts traded?

[Reply](#)

o  *Karthik Rangappa* says:

[March 12, 2021 at 11:35 am](#)

Settlement Price = Close price = volume-weighted average of the last 30 minutes trade.

LTP = last traded price of a stock/contract.

LTP and close can be different.

[Reply](#)

125.  Devi says:

[March 11, 2021 at 5:50 pm](#)

Hi,

I checked it just now – fo10MAR2021bhav file.

For DEC2021 17000 PE there are 0 contracts traded.

But the SETTLE_PR is shown as 2361.8 and this is shown as LTP in zerodha console today i.e 11-03-2021.

May I know what is this SETTLE_PR and how is this related to LTP ?

INSTRUMENT SYMBOL EXPIRY_DT STRIKE_PR OPTION_TYP OPEN HIGH LOW CLOSE
SETTLE_PR CONTRACTS VAL_INLAKH OPEN_INT CHG_IN_OI TIMESTAMP
OPTIDX NIFTY 30-Dec-2021 17000 PE 0 0 0 1875 2361.8 0 0 1650 0 10-MAR-2021

[Reply](#)

o  Karthik Rangappa says:

[March 11, 2021 at 10:16 pm](#)

Settle PR is the settlement price for the day.

[Reply](#)

126.  Devi says:

[March 10, 2021 at 8:30 am](#)

Hi Karthick,

My concern/query is quiet straight forward. Lets forget about previous close values. From the start my query is on LTP getting changed everyday when ther is no trade happening.

When there is no trade happened on above options for past 3. to 4 days why the LTP got changed in kite console? What is the factor of updation of LTP to some random value ?

From where this LTP value came from?

[Reply](#)

o  Karthik Rangappa says:

[March 10, 2021 at 10:24 am](#)

Did you check the Bhav copy to ensure there is no trade?

[Reply](#)

127.  Devi says:

[March 9, 2021 at 12:57 pm](#)

Hi Karthik,

By actual LTP i mean the actual Last traded price. This i confirmed based on LTQ and LTT values listed in market depth info of zerodha.

If you can add these in watchlist once and check issue is clearly visible.

Though I am cross referencing from NSE and other broker sites like icidirect and upstox – this cross reference is only for my cross confirmation and not to compare any.

I am seeing conflict in zerodha kite itself.

This is the support case number raised and screenshots are attached to this case – 20210309251247

Here is the detailed explanation for 2 contracts that I am observing on kite console – details as on today, i.e ; on 9-03-201

For NIFTY MAY 16500 PE:

LTQ (Last traded Quantity) – 75

LTT (Last traded time) – 2021-03-04 12:27:28

Previous close -1326.6 – i believe this will be the LTP as only one contract is traded.

Watchlist LTP price shown today -9-03-2021 – 1725.65 —> When LTT is 2021-03-04 (i.e; 5 days back) from where this price of 1725.65 came from today?

similar is the case that i mentioned yesterday and day before .

For NIFTY DEC 17000 PE:

LTT (Last traded Quantity) – 75

LTT (Last traded time) – 2021-03-05 15:06:22

Previous close -2064.0 – i believe this will be the LTP as only one contract is traded lastly on march 5th

Watchlist LTP price shown today -9-03-2021 – 2500.15 —> When LTT is 2021-03-05 (i.e; 4 days back) from where this price of 2500.15 came from today? Same LTP of 2500.15 is reflected under LTP section of my position.

I believe this is quite an impossible situation until unless there is some updation from whatsoever source.

[Reply](#)

o *Karthik Rangappa* says:

[March 9, 2021 at 9:29 pm](#)

Devi, just to add there is a difference between LTP and close price as well. Btw, the previous close is not equal to today's LTP, it does not work on a continuous basis like the way you are describing. So the previous close is perhaps the average of the previous traded prices. So in a sense, the previous close is like looking at the rearview mirror, whereas LTP is more in the present. Anyway, these are illiquid options, plus has deep intrinsic value plus time value. These prices are really out of wack and there is hardly any trade going on here. I'd not advise anyone to trade these options, but yes, that's really up to the individual.

Pick up any liquid contract and you'd find such aberrations.

[Reply](#)

128. *Devi* says:

[March 9, 2021 at 12:13 pm](#)

Hi,

Thanks for your response.

I got a call back today from Zerodha customer care representative asking for the description of issue again.

I explained him the scenario and explained another similar example of Nifty 21DEC17000 PE that I observed today. (described below).

He listened to my concern and accepted it could be some issue

with console, and he raised a support case to look into it further and resolve.

Today i.e; on 9-03-2021, I observed similar issue with NIFTY 21Dec17000 PE as well (I am personally holding this position in zerodha). LTP in zerodha is showing 2500.15 where as actual LTP is 2064 across NSE and other platforms.

To add up to NIFTY 21May 16500 PE, today's LTP in zerodha is updated to 1725.65 where as actual LTP is still 1326.6

[Reply](#)

o *Karthik Rangappa* says:

[March 9, 2021 at 12:17 pm](#)

Devi, when you say actual LTP, what do you mean? Where are you cross-referencing this? The feeds that we receive is directly coming from the exchange. So would the other broker platforms (post login, on the trading terminal). The chart can be different for reasons I've explained earlier. Websites (including NSE) show delayed feeds. So my guess is that you've been trying to compare the LTP from Kite versus a website, obviously, there will be a difference.

[Reply](#)

129.  *Devi says:*
[March 8, 2021 at 4:36 pm](#)

Hi I tried contacting support team as well. But i didn't get any good response. They were saying it is the LTP only (which is last traded price) but as there is no liquidity Open/high/low are not updated where the statement itself is conflicting. When there is no transaction, from where this 1749 price came up today or from where this 1652 price came up on friday ? When I was asking this they abruptly disconnected the call.

I cross verified the price on other platforms like icidirect and upstox where LTP is shown as 1326 which was traded on 4/03/21 which is reflected in zerodha previous close price.

The reason why I am trying to understand or bring this up is this kind of discrepancies will definitely impact the margin requirements if I take position in same option . I wanted to get an answer for this from where these prices are coming up only in zerodha.

Here there is no option to attach the screenshot. Else I can attach the same.

I would request the team to look in this and respond

[Reply](#)

o  *Karthik Rangappa says:*
[March 8, 2021 at 8:34 pm](#)

I apologies for this, not sure why the agent cut the call without giving you the answer. Please do upload the image on Google drive and share the link so that I can check. However, from whatever I can understand, I guess there is zero liquidity in the option. Anyway, please do share the image for a better understanding. Thanks.

[Reply](#)

130.  *Devi says:*
[March 8, 2021 at 10:36 am](#)

Hi,

And today i.e on 8th March 2021, the LTP of MAY 16500 PE is updated/changed as 1749 only in zerodha. open/high/low are still shown N/A

No update in NSE site today too.

[Reply](#)

o  *Karthik Rangappa says:*
[March 8, 2021 at 11:12 am](#)

NSE site is delayed, Devi.

[Reply](#)

131.  *Devi says:*
[March 7, 2021 at 10:23 pm](#)

Hi,

I am also under same impression that price should be from exchange feed.

but it didn't get updated even after 2 days.

only in zerodha it is 1651.20, across all others and NSE site it is 1326.60. I wouldn't have bothered much if the diff is minor but its almost 300 points difference which is significant spike considering nifty.

My concern is the price would have been updated only when there is a transaction happened, and if it had happened it should be updated in NSE site as well which is not the case. Also Open , low high,

volume .. all are shown as NA on zerodha.
Please provide an insight on this .

Please let me know under what circumstances this happens, that LTP price will be different from the one listed in NSE site ?

[Reply](#)

- *Karthik Rangappa* says:
[March 8, 2021 at 11:08 am](#)

Not possible at all 😊

Anyway, please do call the support desk for this. They will help you with it.

[Reply](#)

132. *Devi* says:

[March 6, 2021 at 7:50 pm](#)

Hi,

Yesterday i.e; on 5-3-2021, I saw this LTP price 1651.2 of MAY 16500 PE only in zerodha, and every where else (checked in icici direct and upstox) and even in NSE website this price is not updated and still it is shown yesterday\'s close price of 1326 as LTP. May i know why this discrepancy?

Even the same price 1651.2 is not updated in high price of Zerodha by the end of the day 5-3-2021. I checked today as well i.e; on 6-3-2021, still NSE site is not updated with price of 1651.2 for MAY 16500 PE , it still shows 1326.6 as LTP whereas zerodha shows 1651.2

On NSE

27-May-2021 150 1,463.20 1,529.30 150 – 1,326.60 – – – 10

On Zerodha:

NIFTY MAY 16500 PE

1651.20

[Reply](#)

- *Karthik Rangappa* says:
[March 7, 2021 at 9:27 am](#)

The prices shown are directly from the exchange\'s feed. OHLC has to match across all platform, but there could be a minor difference, do check this –

<https://support.zerodha.com/category/trading-and-markets/kite-web-and-mobile/charts/articles/why-does-two-charts-of-the-same-timeframe-look-different-on-kite-or-pi>

[February 21, 2021 at 9:37 am](#)

Happy learning, Dr.Manoj!

[Reply](#)

138. *Krutuparna randive* says:

[February 16, 2021 at 9:38 pm](#)

Hi Karthik sir,

Can we do intraday trading without using leverage on zerodha, means instead of using margin can we use our own full money? Also can't we short sell using CNC code and square off short position at the end of the day to avoid penalty? (basically using CNC for intraday instead of MIS). I came to know that if we square off our open position on the same day then it will be considered as intraday though the code we use is CNC.

[Reply](#)

o *Karthik Rangappa* says:

[February 17, 2021 at 9:49 am](#)

Yes, you can trade intraday using CNC, that is absolutely fine.

[Reply](#)

139. *Rahul Jha* says:

[February 8, 2021 at 11:09 pm](#)

Oh sorry! But in that case, shouldn't the BO option be removed from the the Kite.

am I right sir

[Reply](#)

o *Karthik Rangappa* says:

[December 31, 2020 at 3:20 pm](#)

YOu can, check the GTT order.

[Reply](#)

152. *Avi* says:

[December 5, 2020 at 6:22 pm](#)

Sir in buy stop limit order form buy price is for ex 261
Then trigger price will be 255,am I right?
Does stoploss and trigger price means same

[Reply](#)

o *Karthik Rangappa* says:

[December 6, 2020 at 9:25 am](#)

No, SL price is the price at which the order will get executed (assuming its an SL limit). Trigger
price is the price at which the order gets active and sent to the exchange.

[Reply](#)

153. *vishwanath paranjpe* says:

[November 30, 2020 at 1:55 pm](#)

do you have any facility to show the ex-date of shares which have declared stock-splits or bonus or
buy-back

[Reply](#)

o *Karthik Rangappa* says:

[November 30, 2020 at 8:33 pm](#)

You mean on a historical basis? If yes, no, we don't. But I'd suggest you speak to Tickertape for this.

[Reply](#)

154.  *Manickam Pari* says:
[November 27, 2020 at 5:28 pm](#)

Hi Karthik, what is the specific need for trigger price in SL order? Why not treated as normal buy or sell order which require only one level?

[Reply](#)

o  *Karthik Rangappa* says:
[November 27, 2020 at 8:57 pm](#)

Trigger price when triggered is when the order gets fired to the exchange, without which the order will get cancelled.

How many financial instruments can we trade on Kite..like Equity, F&O etc and how to activate each one of them?

Also in which module BO, CO, AMO are explained?

Plz rply

[Reply](#)

- o  *Karthik Rangappa* says:
[September 2, 2020 at 8:38 am](#)

There is only EQ, FO, CDS, and Commodities. All of which you can trade. YOU can use BO/CO on all days across most of these, except on days when the volatility (or expected volatility) shoots up.

[Reply](#)

166.  *Ranjan* says:

[August 23, 2020 at 9:10 am](#)

In intraday, one can buy and sell on the same day provided the trader squares off the position by 3:20 PM in the Indian exchange. My questions are:

1. Legally speaking, in intraday, if a trader is not the owner of the shares (assuming t+2 settlement), then how come the trader buy and then sell (on the same day) which he doesn't own? Is it because of the reason that the trader might not be the legal owner but has beneficial interest in the shares?
2. In Intraday, can a trader sell first and then buy on the same day?
3. In Intraday, What happens if the trader 'sell' first (without owning any shares) but for some reason could not square off his/her position by buying an equal number of shares?
4. Either in intraday or CNS, when you buy shares, you can see the number of shares in your holding account (including in position) within seconds of completing your transactions. So, can we say the buyer becomes the owner on the same day? How that is logically possible when are not the owner till the T+2 settlement?

Thanks for all the answers

[Reply](#)

o  *Karthik Rangappa* says:
[August 23, 2020 at 9:50 am](#)

- 1) The settlement from the broker's end happens on a EOD basis, so this enables intraday trading
- 2) Yes
- 3) The shares will for auction
- 4) No, this display is only for convenience. The shares hit your account on T+2.

[August 16, 2020 at 12:26 am](#)

Hey I had a doubt regarding brokerage.

I saw that the brokerage for CNC trades are 0 and for MIS are 20rs.

What is the brokerage if i place a CNC order (without using leverage) and close the order the same day?

Thank you.

[Reply](#)

o  *Karthik Rangappa* says:
[August 16, 2020 at 8:17 am](#)

Brokerage is the fee you'd pay the broker. Brokerage is zero for delivery based trades but 20 for intraday trades.

You need to look for it in the market watch.

[Reply](#)

172.  *Vivek Kaplingat* says:
[July 30, 2020 at 4:58 pm](#)

1. "As you can see, the last traded price of ITC is Rs.262.25, it is trading -0.40% lower than the previous day close which is Rs.263.30" – Here, is the LTP the same as the market price (being compared with the closing price for change in growth rate)? If they're different, is it that LTP is for a certain small period (like a minute)? Can you clarify the importance of the market price and the LTP?

2. Is it better to buy/sell using a limit or the market price option? Since it's possible to not get 10 shares of, say, Rs 100, when there are only 2 shares available at the same price, isn't it better (in this case) for us to choose the market option? Or is the limit option still worth it (for getting a very small marginal gain) despite there being less chance for our offer to be executed?

3. "A trigger price, usually above the stop-loss price acts as a price threshold and only after crossing this price the stop-loss order transitions from a passive order to an active order." – What happens when it goes active? If buying price is 261 and the trigger price is 255, then after getting equal to or by crossing 255, will the stock get immediately listed back on the exchange? Or will it just "activate" the stop-loss – in the sense, to "get ready", and wait till it touches the stop-loss price? Is there a difference between the stop-loss and the trigger price?

Another article from Zerodha explained the difference between a SL and a SL-M order:

SL-M → Price + trigger price, where trigger price ≥ price. If trigger price is 95 and price is 10 paise, then if the price crosses 95, the offer is listed and will not accept anything less than 94.90.

SL → Only a trigger price – if it crosses 255, selling offer is listed immediately. Here, if the market rate starts falling down rapidly, is it better to have that 'price' of 10 paise as a limit? (If we don't place a limit, then will our offer be never sold?)

[Reply](#)

o  *Karthik Rangappa* says:
[July 30, 2020 at 8:02 pm](#)

- 1) Market price, Last traded price (LTP), and current market price (CMP), are all the same
- 2) I'd suggest limit price
- 3) Yes, once the order is active it gets fired to the exchange and waits for a matching price before it can get executed

That explanation is correct.

[Reply](#)

182.  *Chirag* says:
[July 1, 2020 at 12:13 am](#)

Thank you. But still didn't answer my last question. And also tell me it is mandatory to have balance in zerodha account to place/execute AMO order? Or I can pay after order is execute.

[Reply](#)

- o  *Karthik Rangappa* says:
[July 1, 2020 at 9:53 am](#)

To place the AMO, you don't need any balance. However, you need to ensure you have funded the account before market open for your AMO order to go through. You cannot pay after the execution.

[Reply](#)

183.  *Chirag* says:
[June 30, 2020 at 1:00 am](#)

Hi Karthik Rangappa,
I have account with Zerodha. I placed the AMO order at 3:51 PM for one of the upper circuit share. So what time I will get to know that my order is executed?
When my AMO order will expire if its not execute ?
Once zerodha received my AMO order when they send order to exchange?
And can I put Pre-market order and AMO by making call at the office? will it make any difference in execution if i do by kite(online) or call trade?

[Reply](#)

- o  *Karthik Rangappa* says:
[June 30, 2020 at 10:33 am](#)

Order will be sent as soon as the market opens and you will get to know if it executed immediately. If you have money in your account, AMO will remain as a limit order. Yes, you can

call and place the order.

[Reply](#)

184.  *Vinay* says:
[June 26, 2020 at 10:21 pm](#)

Hi,
Suppose I have bought ITC shares in 2 transactions:
T1. 5 shares @ 170 rs each
T2. 5 shares @ 190 rs each

Suppose that the price of the ITC shares drop to 188, and I wish to sell the 5 shares I had bought in T2...can I do that how? Also, in such a scenario, which share will be sold first out of the 10 ITC shares.

[Reply](#)

o  *Karthik Rangappa* says:
[June 27, 2020 at 10:49 am](#)

Vinay, this works on a FIFO basis. So the shares bought on T1 will be considered sold.

[Reply](#)

185.  *Hariharan Balakrishnan Pallssena* says:

How can I find out the stcks sold by me in the last one month

[Reply](#)

o  *Karthik Rangappa* says:
[June 25, 2020 at 6:50 pm](#)

You can look at the trade book on console.zerodha.com to find out the dates and the stocks that you've sold in the past.

[Reply](#)

186.  *Aditya Choudhary* says:
[June 17, 2020 at 2:17 pm](#)

I have a query related to CNC deliveries based trade....

Scenario: I made a Purchase of XXX Share at suppose 100rs... I hold it for T+2 days (time required to credit in Demat). On T+3 days I get a good position and I decide to debit those shares at 9.43am (28 mins post market opening) at rate of 105rs...

Now in Kite Interface, the share gets listed as a new CNC short sell and shows up in positions tab. Observing throughout the day, I see the share has gone low and I'm being shown that P&L for that short sell is positive...

I decide to square off that position (since I'm running in the Green zone- *profits*)... But I'm confused what will happen?

1. Will my sell order for Demat shares be held void/cancelled (the one placed at 9.43am)?

2. The support page

<https://support.zerodha.com/category/trading-and-markets/kite-web-and-mobile/articles/why-does-shares-sold-from-holdings-show-up-as-a-new-negative-position-under-on-kite#:~:text=It%20now%20shows%20up%20under,considered%20as%20an%20intraday%20trade.> says the shares will be bought back, if it is bought back, at what price? The price at which I bought

during the delivery or the current market price?

3. Please explain the whole possible scenarios under the replies to this comment if possible?

[Reply](#)

o *Karthik Rangappa* says:

[June 17, 2020 at 10:51 pm](#)

On T+3, the shares are in your DEMAT. If you place a sell order and towards the end of day realise that you have made an intraday profit and want to close the position, then you need to buy back the sold shares (square of the sell trade). So this transaction will be considered as an intraday trade (even though you've sold from DEMAT), and your holdings in DEMAT will continue as if nothing happened.

[Reply](#)

187. *Arvind Kumar* says:

[June 12, 2020 at 9:06 am](#)

Hello Karthik Sir,

I am a beginner and i have some confusions so please fix them.

1) When i exit my CNC order it reflects in Positions tab with minus quantity and shows P/L, What are these P/L, are they real or some technical problem ?

2) If i re-buy that CNC order from positions then what will happen, any charges will deduct, the P/L in positions tab will add or not in demat account ?

3) If i exit my CNC order then when i will get P/L in Demat Account and How can i know that ?

Thank You

[Reply](#)

o *Karthik Rangappa* says:

[June 12, 2020 at 12:30 pm](#)

1) Its not a technical problem 😊 The position tab shows your day's activity since this is a CNC sell, you can ignore the same

2) Then it will be considered an intraday order.

3) Yes, if you exit or close a position in the market, you will get the associated profit or loss. The same will reflect in you trading account, not DEMAT.

[Reply](#)

188. *kulish* says:

I want to buy a share and want to sell on same day if in profits and keep it for days or months or years if it in loss. Then what method should i use it to buy?

What are the steps to execute it?

Do you call this method as positional trading?

[Reply](#)

o *Karthik Rangappa* says:

[April 30, 2020 at 10:01 am](#)

Sai, sorry for the unsolicited advice, but frankly it should be the other way round. You need to develop a mindset to ride your profits and hold on to your investments.

Anyway, you can do this by buying shares under CNC.

[Reply](#)

202.  *jagadeesh varma* says:

If we bought a sale through MIS and we dont sell the same on the sam day what will happen

[Reply](#)

o *Karthik Rangappa* says:

[April 29, 2020 at 10:27 am](#)

The position will be square off by the system.

[Reply](#)

203.  *Raman* says:

[April 25, 2020 at 9:06 pm](#)

Hello Sir,

I need help regarding MIS and CNC Orders.

1) Do MIS and CNC orders both are shown collectively in bid and ask orders in NSE or both have separate order books and do they both collectively cause fluctuations in the market or it's just intraday MIS orders which causes the price to go Up and down?

2) If I have shares in my holdings and I have a doubt that price may fall tomorrow so can I put sell CNC during pre-market order and then convert it into intraday MIS and close position within a day to protect price fluctuation for a day?

Thank you for your valuable time.

[Reply](#)

o *Karthik Rangappa* says:

[April 26, 2020 at 8:41 am](#)

1) Yes, the exchanges treat all orders the same way. MIS/CNC/NRML etc are all broker conventions

2) Yes, you can do that.

[Reply](#)

204. *Jay Mangal* says:

[April 23, 2020 at 3:28 pm](#)

The table above was distorted. Posting it again here:

SCRIP TYPE QTY Price Total

Scrip1 CNC 7 843.5 5904.5

Scrip1 MIS 3 843.5 2530.5

Scrip2 CNC 3 945 2835

Scrip2 MIS 3 945 2835

Yup, I did reply to your previous comment though.

[Reply](#)

205. *Jay Mangal* says:

[April 23, 2020 at 3:23 pm](#)

Hi Kartik,

First of all, thanks for creating this series. It has been really helpful for a beginner like me.

I have a doubt regarding Margin Available and Margin Used. I loaded the account with 10K and bought some shares as in the below data.

The sum total of CNC shares is ₹ 8739.5. So shouldn't I have (10,000 – 8739.5) as Margin Available. It showed the Margin available as only ₹ 400. It was stopping me from converting the MIS shares to CNC as well.

Can you please explain how this calculation of Margin Available and Margin Used is done.

Qty Buy Price Total

Scrip1 CNC 7 843.5 ₹ 5,904.5

Scrip1 MIS 3 843.5 ₹ 2,530.5

Scrip2 CNC 3 945 ₹ 2,835

Scrip2 MIS 3 945 ₹ 2,835

Grand Total ₹ 14,105

[Reply](#)

- o  *Karthik Rangappa* says:
[April 23, 2020 at 8:01 pm](#)

Yes, when you convert MIS to CNC, you'll need full amount, in this case, 14,105/-. Since you have 10K, the order would be rejected.

[April 14, 2020 at 7:21 pm](#)

Hi Zerodha Varsity Team,

Firstly, many thanks for setting up such a beautiful tutorial. And it's available for free, well.. what more can an aspiring trader like me ask for?

I have gone through the chapters till now, and have have a few questions. Can you please have a look and share your responses?

1. When going long on a stock, can we set a target? For an example, if I am buying a stock at 100, can I tell the system to automatically sell it when the price hits 105. If yes, can you please explain what type of order would this be?
2. When placing a stop loss buy order, do we get the option to buy the stock as a market or limit order? I need to know, at what price would the stock bought.
3. Can you please tell me the difference between SL and SL-M order? If you can give an example too, there's nothing like it.
4. I remember reading somewhere, we can make use of SL orders to buy a stock at a higher price than current market price. Is this true? If so, can you please tell me how to do this.

Many thanks in advance. I am fairly new to all this (you might be able to tell this by the questions I asked), so please pardon me if I have used any inappropriate terminologies anywhere.

Cheers,
Yaser

[Reply](#)

- o  *Karthik Rangappa* says:
[April 15, 2020 at 11:25 am](#)

- 1) yes, you can do this via GTT. Check this – <https://zerodha.com/z-connect/tradezerodha/kite/introducing-gtt-good-till-triggered-orders>
- 2) You have both the options. However, I'd suggest you stick to limit and ensure the order is executed as there is no guarantee that the SL limit will get executed
- 3) SL limit is when you want to ensure that you sell at a specific price, SL market ensures that you close the position, irrespective of the price
- 4) Hmm, yes. Its like placing a regular SL order. Stock is trading @ 105, you place a SL limit buy at 108, when stock moves to 108, order gets triggered and you get to buy at 108.

[Reply](#)

211.  *Ashok* says:
[April 12, 2020 at 5:27 pm](#)

Thanks, Karthik. I am already using Kite after disabling of ZT. In Kite, can I have market-watch full-screen with selected columns? If yes, how.

[Reply](#)

- o  *Karthik Rangappa* says:
[April 12, 2020 at 9:59 pm](#)

No, you cannot have a full screen, its available on to the left side with minimum attributes. Click on the marketdepth for more information.

[Reply](#)

212.  *Ashok* says:
[April 11, 2020 at 6:36 pm](#)

Disabling of Zerodha Trader is absolutely shocking. Now, without ZT, I find myself totally lost, and don't know how to trade. I am sure that there will be many traders, like me, facing the same dilemma. Kite and Pi are no match to ZT. Please, please re-enable ZT immediately.

[Reply](#)

- o  *Karthik Rangappa* says:
[April 12, 2020 at 1:41 pm](#)

[April 6, 2020 at 8:43 am](#)

Hi Karthik sir,

First, Thank you very much for giving beginners like me a Store of knowledge.

I have a query regarding GTT and BO

- 1) if we have CNC position then we have GTT order for putting target and Stop loss.
- 2) if we want to go with MIS / NRML then we have Bracket order while entering into the position for putting target and stop loss.
- 3) BO gives both target and SL and CO gives only SL facility.

above statement as per my understanding, please confirm the above with correct or incorrect (if wrong, pls give your understanding also).

Thanks in advance.

[Reply](#)

o *Karthik Rangappa* says:

[April 6, 2020 at 12:46 pm](#)

- 1) Yes, you can place both Target and SL, but it works on once cancels the other basis.
- 2) BO is an intraday order, so you will have to square off the order the same day
- 3) Yes, that's right

[Reply](#)

222.  Arun says:
[March 8, 2020 at 11:03 pm](#)

Hi Karthik

When we place a Stop Loss Order through Kite, then whether it directly goes to the exchange's terminal or it lies in Zerodha's servers and goes to the exchange's terminal only after hitting the trigger price ?

(I want to know what happens when Zerodha's server gets down for some reason after we have placed a Stop Loss Order)

[Reply](#)

- o  Karthik Rangappa says:
[March 9, 2020 at 12:10 pm](#)

Arun, the order hits the exchange directly after a quick validation at the broker's risk management system (for margins etc). The validation takes a few microseconds. The status, once it hits the exchange is trigger pending, once its triggered status will change from trigger pending to open.

[Reply](#)

223.  vicky s says:
[March 3, 2020 at 10:40 pm](#)

Dear Karthik,

I am a bit unclear with regard to the Stop-Loss. Is SL only used in intraday trading? And, let's say that I get 10 shares of ABC Ltd. for Rs. 10 with a target of 15, which is reached and the stock continues to rally so how would I trail the stop-loss? Because I already have those shares with me.. how is the said modification done? Also, when the stop-loss is hit, how are we brought out of the loss-making position? Does someone or the broker or the exchange buy it back or what?

I have not started trading yet so I am not aware of the console or the options available but I would really like to clear my theoretical concepts before I dive in.

[Reply](#)

- o  Karthik Rangappa says:
[March 4, 2020 at 12:01 pm](#)

You can use a GTT order for this, do check this post – <https://zerodha.com/z-connect/tradezerodha/kite/introducing-gtt-good-till-triggered-orders>

What is IOC in Zerodha?

I wanted to buy 50 shares of Continental seeds, but zerodha says min. lot size is 4000.
I have selected buy-CNC-market-50shares and clicked buy, but not working
Anyone please guide me

[Reply](#)

- o  *Karthik Rangappa* says:
[December 17, 2019 at 11:31 am](#)

IOC is an order type which looks to match the price and quantity. IOC = Immediate or cancel. If the price and qty are not available as soon as you punch the order, then it gets cancelled.

This cant be true, I have a feeling you are missing something. Can you please call the support desk for this? They will help you step by step in placing this order. Thanks.

[Reply](#)

234.  *Abilash* says:
[December 11, 2019 at 7:32 am](#)

Hi,

I actually have a doubt regarding intraday CNC shorting.

I have 270 shares of yes bank in my demat account which I bought last week

Can i do a short sell tomorrow on this same stock?

If I do a short sell using mis as order type will I be able to cover the losses made in long holding through this short selling?

Can I sell the exact no of stocks that I hold already and buy it again once the price goes down further and have it converted to CNC again?

[Reply](#)

- o  *Faisal Mohammed* says:
[December 11, 2019 at 3:20 pm](#)

Abilash,

1. Yes, you can sell and buy back it on the same day(and convert to CNC) and pick up an intraday profit.

2. You are being both long and short on the same stock so you won't recover any of the losses

you've already made.

3. However, your buy average for the quantity you hold will remain the same.

Dear sir,
suppose I place a buy order in intraday using MIS and BO with target and loss setup with out trailer price, now consider it is goes to my favor and i want to modify one passive order(target price before hit) that 50% of total quantities will be sell in recent LTP and remaining will be keep in position into new higher target price. Is it possible please help.

[Reply](#)

243.  *Shreekar Pai* says:
[October 19, 2019 at 11:15 am](#)

while buying shares what is validity mean by? I get a option of day or IOC? What does they both mean?

[Reply](#)

-  *Karthik Rangappa* says:
[October 20, 2019 at 9:12 am](#)

Day order means that the order you are placing is valid for the entire day till you get your fill. IOC is immediate or cancel, this means it looks for the quantity and price, if there is a match, the order goes through, else it gets cancelled.

How can i directly contact to a zerodha customer care. It is really difficult. If i call on 80-4040-2020, they first ask 3-4 things, then, phone number then phone code, dammit, i don't know my phone code, i just know my phone number. and if i go to zerodha support, first i have to select a topic out of 20-30 topics, then i have to read 30-40 questions. I mean isn't deciding all this responsibility of customer care....

If anyone know better way to get support/help, please help...

[Reply](#)

-  *Karthik Rangappa* says:
[October 14, 2019 at 12:07 pm](#)

Prayaksh, you'll have to first login to <https://console.zerodha.com/profile> to know your Telephone Code. Once you have this available with you, you can call 40402020 or 33102020 and choose the language you prefer. Once language is selected, it'll ask you for options and then

ask you to enter your 4 digit telephone code. Once entered, you'll get to speak to a Zerodha rep who'll already know your name and will be able to assist almost instantly.

Good luck.

[October 11, 2019 at 11:42 pm](#)

Hi Karthik,

Please help me, I have few questions:

-> To what i have read this blog, for intra-day trade i should select MIS and sometimes SL or SL-M is recommended for risk control.

-> Lets say i right now a share is worth Rs.250(LTP), so if i select SL then i have to provide the price at which i want to buy, then my order will be completed only when some one is selling at same price, which if no one is, then the trade will be in-completed and trade will be squared off by 3:30PM

* If i would have selected SL-M, does it mean i will be paying Rs.250 per share? and if not(as i read in the context, if market price increases i would be automatically paying the increased price)

so lets say that share is doing good, so lets say i placed the SL-M order on 10:00AM and then share is worth 255 on 10:01AM, can you give me the idea upto how much i would be paying for it?

Next question

-> Lets say i my buy order is completed at 10:00AM,(order:- bought 1 share for Rs.250), and at 12:00AM, that 1 share is worth Rs.500, so now i want to sell it, and how do i do that? because on this page selling procedure is not explained

[Reply](#)

o  *Karthik Rangappa* says:
[October 12, 2019 at 5:02 pm](#)

1) That's right

2) Yes, if you do not close your MIS trade, then it will be squared off by 3:20 PM

3) The order will go as a market order, hence it could be a price different from 250, higher or lower, which can result in a further loss

4) This depends on stock and liquidity. This is called impact cost, which I've discussed in the Futures module.

5) You can go to the position tab on Kite, hover over the position and click on exit. This will help you square off the position

[October 8, 2019 at 12:37 pm](#)

Hi,

Excuse me for asking for silly questions. Basically i am an engineer with interest in investing and learning about stock markets. I have a few questions to ask

1. I suppose investing and trading are entirely two different terms. I want to buy stocks like equities which are like shares of some company. But this article mentions about trading. So if i want to invest how do i do that?
2. Is this investment different or similar to the example used in the initial chapters about compounding? I mean once i buy stocks and keep it with me and after many years price becomes high and i decide to sell it, is it possible to do that?
3. Also cant i invest in stocks like facebook, google, amazon in zerodha? If not, why?
4. While searching for any stock do i have to remember the stock symbol?

Thanks in advance

[Reply](#)

o  *Karthik Rangappa* says:
[October 9, 2019 at 1:01 pm](#)

- 1) Adithya, its referred to as a trading terminal, but it is the same portal to trade and invest in stocks
- 2) Yes, you can sell it.
- 3) For now, this is not possible, unless you are with a broker who has a link with a US broker
- 4) No need to remember, you can look for it online when you are transacting in it

So which one is best to use for target and stop loss?

[Reply](#)

- o  *Karthik Rangappa* says:
[August 30, 2019 at 11:29 am](#)

Limit orders, Sundar.

[Reply](#)

254.  *Sundar* says:
[August 28, 2019 at 7:05 pm](#)

Hi,
What is the difference between limit and SL order.
For eg: I can use limit order for stop loss and also for target right?
The same features applies in SL order.
I don't understand this.

[Reply](#)

- o  *Karthik Rangappa* says:
[August 29, 2019 at 11:24 am](#)

The limit is the specific price at which you want to execute the trade, this can be used for SL as well. SL, is the price at which you want to exit the position in case it is going against your trade direction. You can use a limit price for the same.

[Reply](#)

255.  *Deep* says:
[August 18, 2019 at 12:23 am](#)

I have a question. I am very new to all these things and want to learn so wanted to ask that whether trading account is also included whenever we buy DEMAT account or it has to be purchased separately?

[Reply](#)

Hey Karthik, maybe you missed this one..

[Reply](#)

- o *Karthik Rangappa* says:
[July 24, 2019 at 11:51 am](#)

Hey Sachin, I missed this comment. Yes, CO gives you more leverage and therefore you can trade higher number of lots. However, you need to ensure your prices are within the execution range. Suggest you read this – <https://support.zerodha.com/category/trading-and-markets/margin-leverage-and-product-and-order-types/articles/what-is-f-o-execution-range-and-why-do-some-open-orders-outside-f-o-execution-range-get-cancelled>

[Reply](#)

257. *Sachin Singh* says:
[July 18, 2019 at 2:45 pm](#)

Hey Karthik, I had a doubt regarding the Cover Orders on Kite. Basically, I wanted to know whether we can utilise this feature to get more leverage for selling nifty options on expiry day? Today, I placed an order to sell Nifty 11750 PE whose premium was 0.3, my thinking being that there's a very high chance of me being able to retain the premium. Since the premium is very low, if I have to make a somewhat decent return, I'd have to sell as many lots as possible & hold till when the premium comes around 0.1 or 0.05, but when I placed a CO order, it got rejected because the Trigger Price which I gave (0.1) was outside the 20% limit. The problem is that if the premium is around 0.3, then to make sure the Trigger Price is within the 20 % limit, it'll have to be above 0.24. Since this was the first time I used a cover order, am I missing something or my best bet in this scenario is to go with an MIS order (which is what I did eventually)?

Thanks!

Suppose a stock or an option is trading at 100 and I want to buy only when it goes above 115, is there any order which I can place so that whenever the price goes above 115, it gets automatically executed..?

[Reply](#)

- o  *Karthik Rangappa* says:
[July 5, 2019 at 12:03 pm](#)

Yup, you can place a limit buy order.

[Reply](#)

262.  *Anurag* says:
[June 24, 2019 at 8:41 am](#)

How do I set a target price when placing a short order through the terminal?

[Reply](#)

- o  *Karthik Rangappa* says:
[June 24, 2019 at 11:21 am](#)

The target for the short trade has to be a price lower than your short price. At the lower price, you'll have to buy back the stock. You can set a limit price for the buyback.

[Reply](#)

263.  *narendra* says:
[June 18, 2019 at 10:14 pm](#)

Hi, I am new to intraday trading, so if I buy say 100 shares of company X at Rs 5 and set my target to sell it at Rs 10 with a stop loss of Rs 9, at the end of the day, if my shares are sold off I book a profit, if say my shares are not sold and the last trading price of the shares is at Rs 10, then what will happen when its squared off?

[Reply](#)

- o *Karthik Rangappa* says:
[June 19, 2019 at 11:54 am](#)

You cannot have the stoploss at 9, Narendra. The system will think that you want to square off the position and hence sell the 100 shares @ 9. If the order is not squared off during the day, then it will be carried forwarded. However, if this is an intraday order (MIS/BO/Co), then the position will be squared off at market.

[Reply](#)267. *Anjali* says:[March 22, 2019 at 10:51 am](#)

Hi,

Can you please tell me the total amount incurred while selling a stock (Including Zerodha brokerage charges, SEBI charges, GST, Security charges etc). If I want to calculate price incurred while selling 10 stocks at Rs 670 how do I do this ?

Thanks.

[Reply](#)268. *Anjali* says:[March 22, 2019 at 10:48 am](#)

Please clarify my doubt regarding selling of a stock.

Let say I have one stock of Axis bank which is currently trading at Rs 600. I want to sell this stock when it goes up to Rs 630. So how to do I mention trigger price as 630. Which type of order should I place to sell it at 30 rs higher rate ?

Thank you.

[Reply](#)269. *Yashika* says:[March 18, 2019 at 9:15 am](#)

Under the market watch, where is the last traded price(As you can see, the last traded price of ITC is Rs.262.25,) mentioned? I can't figure it out. Also, what is LTQ?

[Reply](#)○ *Karthik Rangappa* says:[March 18, 2019 at 12:02 pm](#)

The LTP is right next to the symbol.

[Reply](#)270. *Dev* says:

[February 24, 2019 at 2:18 pm](#)

Hi,

In intraday trading..

If a stock is at price 100 and i want to short it at 105. But also i want a target on it..

If i place 2 orders..

1. Sell stock at 105 limit order .

2. Buying stop loss at 102.

The stock currently at 100 goes up till 102.

Will my buying stop loss get executed at this time?

Or will it get executed only when limit order gets executed?

[Reply](#)

- o  *Karthik Rangappa* says:
[February 25, 2019 at 11:31 am](#)

Yes, the buy order will get executed first. You can try a BO order instead.

[Reply](#)

271.  *Mitesh* says:
[January 24, 2019 at 2:56 pm](#)

Hi Karthik,

Please help me here I have one doubt.

Today I was waiting for breakout in ITC. So i set SL limit order to short ITC at price 279.2.

But what happened today is my order is executed at 11: 45AM with the above price.

After that i checked the bottom of the candle and it was 279.35.

Now I am wondering why my order has been executed even if it was not reached the 279.2 price.

Thanks in advance.

[Reply](#)

- o  *Karthik Rangappa* says:
[January 25, 2019 at 11:39 am](#)

Mitesh, I'd suggest you read this – <https://tradingqna.com/t/why-does-two-charts-of-the-same-timeframe-look-different-on-the-same-platform/4715> and this – <https://tradingqna.com/t/why-is-ohlc-data-different-on-live-charts-and-marketwatch/16528>

[Reply](#)

-  *Mitesh* says:
[January 25, 2019 at 1:00 pm](#)

Yeah Karthik i got the explanation in above links.

But here it's not like end of the day data showing different neither it shows different on another platform.

Main concern is that how the order was executed if price not reached that level.

Asking again because still not much clear and this understanding is very important to plan future trades. Your answer will help to avoid losses. Thanks

[Reply](#)

-  *Karthik Rangappa* says:
[January 26, 2019 at 9:30 am](#)

Mitesh, the charts may not capture all the data points. You can do two things – check NSE's end of day bhav copy or verify the trade directly with NSE –
<https://www.nseindia.com/registration/tv/trades/newStructure/TVLogin.jsp>

[Reply](#)

-  *Karthik Rangappa* says:
[January 26, 2019 at 9:31 am](#)

Mitesh, the charts may not capture all the data points for reasons mentioned in the post.

You can do two things – check NSE's end of day bhav copy or verify the trade directly with NSE –
<https://www.nseindia.com/registration/tv/trades/newStructure/TVLogin.jsp>

Sir, after set stop loss order, share will be executed for sale or it will remain in demat account

[Reply](#)

- o  *Karthik Rangappa* says:
[December 26, 2018 at 11:40 am](#)

Until the shares are sold, it will be in your DEMAT.

[Reply](#)

-  *Arjun* says:
[April 8, 2019 at 3:12 pm](#)

Where can i see my shares in Demat?

[Reply](#)

-  *Karthik Rangappa* says:
[April 9, 2019 at 11:27 am](#)

On T+2 day basis. So you buy today...and 2 days later it will reflect in your DEMAT account.

[Reply](#)

276.  *Manbhawan Mittal* says:
[December 21, 2018 at 10:44 pm](#)

Dear Karthik Sir & team, thanks for the wonderful content

My query is : Today(21/12/18) during last 15 minutes in HCL tech there is huge up and down. One green volume with red volume(in 15 minutes chart).

1. So, how can one can identify smart money is in or out (as there are both volumes) and why this is not reflecting in bulk or block deals.
2. And if another party try to exiting the smart money, what is the benefit of that ?
3. There is little effect on price (as compared to the huge volumes), why it will be reflected in future (as transaction is done today itself) ?

[Reply](#)

- o  *Karthik Rangappa* says:
[December 22, 2018 at 12:42 pm](#)

- 1) Hence you need to check the volume with respect to the average volume across the last 10 days or so
- 2) Well, that's always the case. The guy with the better edge will benefit
- 3) Must have been a block deal, which is an off-market transaction.

[Reply](#)

-  *Manbhawan Mittal* says:
[December 22, 2018 at 5:36 pm](#)

Thanks a lot Sir for you immediate reply.

But if it is off market transaction, why price was changed on high note in last 15 m chart (as both parties had decided their prices to deal).

Second there is no mention of this in the block deal report of NSE.

Please correct if i m wrong

[Reply](#)

-  *Karthik Rangappa* says:
[December 24, 2018 at 12:08 pm](#)

If there is no block deal, then it must be a high-value transaction, Mittal. Hence the price reaction.

[Reply](#)

-  *Manbhawan Mittal* says:

[December 16, 2018 at 10:03 am](#)

Hello Karthik,
One question regarding bid/offer spread.

For STOPLOSS-LIMIT (stock/index options), i observed most of the time if my trigger and limit price are close enough, my order goes to pending state. So, my question is, if lets say i put trigger price at 100, and limit price at 95, and the best offer-price is currently at 98, then will my stock-options gets sold at 98? (Since that is the best offer price?) Or does it gets sold at 95 only (since that is my limit price.)

Please suggest.

Thanks

[Reply](#)

-  *Karthik Rangappa* says:
[December 16, 2018 at 10:55 am](#)

It will get sold at 95 only, Raj.

Thanks Karthik, sorry but now i am a bit confused.

Myself being a little impatient, posted it parallelly to varsity as well

<https://tradingqna.com/t/putting-stoploss-in-options-need-expert-guidance/51511>

Nithin says: If i put my limit price much lower than current market-bid price, it gets sold at the best-bid only (That is 98). Or did i not get it correctly.

Kindly advice.

[Reply](#)

-  *Karthik Rangappa* says:

[December 17, 2018 at 11:21 am](#)

Hey Raj, yes, price below current market price behaves like a market order.

[Reply](#)

■ *Raj* says:

[December 16, 2018 at 12:37 pm](#)

I think it means, same price as limit price or better but never worse – but not necessarily at limit price.

(Please correct me if i am wrong.)

Thanks

Raj Kumar

[Reply](#)

■ *Karthik Rangappa* says:

[December 17, 2018 at 11:32 am](#)

Thats right, Raj. Also, I've deleted few of your previous comments, I guess the same was posted multiple times 😊

[December 3, 2018 at 6:25 pm](#)

Hi,

How to place order rather than intraday, I mean my order should not sell automatically end of the day. I want to purchase shares in a way when i want I can sold kind of. I am new in trading, just opened Zerodha trading account.

[Reply](#)

○ *Karthik Rangappa* says:

[December 4, 2018 at 10:22 am](#)

There are two ways –

- 1) Buy under CNC if you want to buy shares and hold overnight
- 2) Buy under NRML if you want to buy Futures/Options and hold overnight

[Reply](#)

282.  *Chinmay Kelkar* says:
[December 1, 2018 at 9:56 pm](#)

1. How do you add a stop loss once you have purchased a share ?
2. Suppose i have 1 share of ITC with a current market price of 261 and a stop loss for the day at 255, but sometime during the day i decide to square off the transaction at the current market price itself – will the stop loss automatically get cancelled ? Or will i have to manually do something to it ?

[Reply](#)

o  *Karthik Rangappa* says:
[December 2, 2018 at 8:55 am](#)

- 1) You will have to place this manually just like any other order.
- 2) Yes, you will have to cancel the order.

[Reply](#)

283.  *Chinmay Kelkar* says:
[December 1, 2018 at 9:53 pm](#)

Is there a way in which the order becomes active only when the stock price crosses a certain level on the upside ?

Like in this example, suppose the current market price of ITC is 261 and i want to buy one share only if the market price crosses 265 during the day, and not to execute the order if the share price remains below that ?

[Reply](#)

o  *Karthik Rangappa* says:
[December 2, 2018 at 8:54 am](#)

Yes, you can always buy using a stoploss limit.

[Reply](#)

284.  *Prabhu* says:
[November 26, 2018 at 4:13 pm](#)

Dear sir,

Some paise(Example Below Rs.0.50) stocks are morning itself placed some crore in buying side. My question is, how can i placed my order is first in buying? pls explain i placed AMO order also but it placed around 09.00.13 seconds. traded 40 lacks but my order not executed.

[Reply](#)

o  *Karthik Rangappa* says:
[November 27, 2018 at 11:35 am](#)

Prabhu, basically the execution happens on a price and time priority basis. Check this –
<https://zerodha.com/z-connect/queries/stock-and-fo-queries/pre-marketpost-marketafter-market->

orders

Hello,
 Today my margin used was -21945
 Free cash 22104.79
 Total value 159.79
 I tried to short sell 500 hpcl (mis) , it rejected my order and said 16000 margin required and 159.79 available , on the other hand it let me place cnc order to buy another stock using -21945 margin , please clarify this issue

[Reply](#)

287.  *Akshay* says:
[November 2, 2018 at 7:36 pm](#)

Hi Karthik,

I have three queries:

1. Is Target Price of BO executed as a trigger or limit?
2. If I place a MIS Limit Buy order for a scrip at say 100 and another MIS Limit Sell order for the same scrip at 110, will the two positions square off each other or will I have to place exit orders for both these positions separately once they are executed?
3. Is this setup possible: One MIS Limit Buy order at 100, Second MIS Limit Sell (Target) order at 110, Third MIS Limit/Market Sell (SL) order at 95: SL gets cancelled if Target is met or Target gets cancelled if SL is met

Thanks,
 Akshay

[Reply](#)

o  *Karthik Rangappa* says:
[November 3, 2018 at 11:03 am](#)

- 1) Limit
- 2) Yes, they will net of one another
- 3) This will result in one MIS sell order

[Reply](#)

288.  *rajesh* says:

[October 30, 2018 at 1:03 am](#)

i am new

i bought a share at 100. SL -90, Trigger price ->95

My ques is

- 1) only if trigger price hits 95 SL becomes active or if it goes below 95 like 94,93 my SL becomes active.
- 2) what if SL 90 does nt hit like if it goes from 93 to 88 it does nt exec right.for that SL-M .
- 3) is there any way,if trigger price hit 95,, my trigger price to sl price like 95 – 90 any price to execute like 94,93 to execute

pls reply

[Reply](#)

o  *Karthik Rangappa* says:

[October 30, 2018 at 7:23 am](#)

- 1) It should hit 95. By the way, its best if you place the trigger price close to the stoploss price
- 2) Then your SL will remain pending
- 3) No, you cannot specify a range.

[Reply](#)

■  *rajeshkumar* says:
[October 30, 2018 at 11:50 pm](#)

Thanks,In this, it said like
only after crossing this price the stop loss order transitions from a passive order to an active order.

it hit like exact 95,not 94,93 like wise right?
what if it doesn't hit both , trigger price and SL, no other option other than SL-Market price right?

[Reply](#)

■  *Karthik Rangappa* says:
[October 31, 2018 at 11:28 am](#)

In that case the order would remain pending in the system. For higher chanced of execution, I'd suggest you use SLM.

[Reply](#)

289.  *vamshi krishna kota* says:
[October 26, 2018 at 4:01 pm](#)

In this chapter, there is a small correction needed:

1. \”The price of Infosys dropped from 1014.20 to 1020.80, and hence the colour changed to red from blue.\”.

In this statement, either it should be \” Price of Infosys dropped from 1020.80 to 1014.20...\” or \”Price

of infosys rallied from 1014.20

to 1020.0, and hence the color changed to Green from Red\”

2. \”Notice even if you want to buy 10 shares at Rs.3294.8 you can only buy 2 shares because there are only 2 sellers at Rs.3294.8.\” In this statement it should be 2 shares instead of 2 sellers- because it really doesnot matter number of sellers if number of shares are available.

So please make those 2 corrections in your course.

However the way you are giving Knowledge transfer is appreciated.

[Reply](#)

- o  *Karthik Rangappa* says:
[October 27, 2018 at 11:18 am](#)

Vamshi, have made the necessary changes

[Reply](#)

290.  *Akshay* says:
[October 5, 2018 at 3:05 pm](#)

Hi Karthik,

Suppose I expect a given stock to rise a particular day – How much is the rise I am not sure.

Say the stock closed at Rs 100 on the previous day.

I want to place a market order for this in the Pre-Open session – Since I don't know at what price the stock will open.

Now say the Stock opens at Rs 120 – My order goes through – Stock keeps rising for the next few seconds upto Rs 140.

Now the stock price reverses and it goes down upto Rs 125.

I want to lock in my profits at Rs 140 – for which I would need to place a trailing stop loss – which is only available in Bracket Order.

How can I place an order at market price and also place a trailing stop loss?

Do note – this whole story is panning out in first few seconds of market open – I can't physically place a sell order at 140 – Before the order is placed, the stock is already down at 120 again!

Thanks,
Akshay

[Reply](#)

- o  *Karthik Rangappa* says:
[October 6, 2018 at 12:38 pm](#)

Well, if not for BO, there is no other way apart from placing it manually.

[Reply](#)

- *Akshay* says:
[October 6, 2018 at 1:15 pm](#)

But how do I capture the right entry price in a BO? If I enter a limit price of 105 and the stock open at 110, I am left out.

Can I do it by placing multiple Immediate or Cancel BOs, say 1 at 105 limit, another at 110 limit and so on?

Or is it possible to do (market order with trailing stop loss) through your Kite Connect API?

Thanks,
Akshay

[Reply](#)

- *Karthik Rangappa* says:
[October 7, 2018 at 10:27 am](#)

Nope, that is not possible. You will have to try placing market orders in this case.

[Reply](#)

291. *Bharath* says:
[September 24, 2018 at 4:07 pm](#)

In the example of buying 1 ITC trade, after the trade is executed, the trade details shows that the share is purchased at 262.2 rs.

Excerpt from the chapter,

\”The trade book confirms that the user executed an order to buy 1 share of ITC at Rs 262.2.\”

However in the first we executed a limit order for 261 Rs, so when the share did not go down to 261 , the buy order should not executed right? , however trade is executed for 262.2 (Avg price) , could you please clarify this?

[Reply](#)

- *Karthik Rangappa* says:
[September 25, 2018 at 11:23 am](#)

Bharath, later in the chapter we discuss order modification. Request you to read through that. Thanks.

[Reply](#)

- *Bharath* says:
[September 25, 2018 at 6:18 pm](#)

Thanks for your quick response Karthik

Excerpt from the chapter where \”modify\” is mentioned:

\”Modify the orders – For example if you want to modify the buy order from 332 to 333 you can do so from the order book.\”

\”By clicking ‘modify’ the order form will be invoked and you can make the desired changes to the order.\”

Not that i am nitpicking, just want to point out that after reading the \"modify\" part of the order, it does not explicitly mentions that the price we wanted before (i.e. limit order -261 rs) is now changed to a price that is matching the last traded price (262.20).

Please correct if i am missing something here.

[Reply](#)

-  *Karthik Rangappa* says:
[September 26, 2018 at 11:53 am](#)

Hmm, I understand. Let me look at this again, Bharath. Thanks.

[Reply](#)

292.  *Aniket* says:
[September 19, 2018 at 10:49 pm](#)

Many subtle errors present in this article. Or I may not have read them properly. Like for instance, section 9.5 snapshot number 5, it clearly shows INFY in red with last traded price 1014.20 and stock down by 16% but has been mentioned different (1014.75 and 11%). Also, (i am trying to hold my laugh here) \"The price of Infosys dropped from 1014.20 to 1020.80, and hence the colour changed to red from blue.\" how can something drop from 14-20? and amidst red and green where did blue come out of itself (the blue)? However I really appreciate the VARSITY effort and will at all possible instances rate zerodha highest possible ratings for this effort. It simply shows the quest to impart knowledge and improvise quality rather than adhering to money making business. I hoe zerodha receives immense support indays to come.

[Reply](#)

-  *Karthik Rangappa* says:
[September 20, 2018 at 8:17 am](#)

Hey Ankit, thanks for pointing this out. Pardon those silly mistakes, those were my early days at writing articles, must have missed spotting it.

[Reply](#)

293.  *sam* says:
[September 19, 2018 at 7:13 pm](#)

hi
can we short sell the shares on swap charges (more than one day holding)in our account.

[Reply](#)

-  *Karthik Rangappa* says:
[September 20, 2018 at 8:12 am](#)

You can do it through SLBM route. Check this –
<https://www.nseindia.com/products/content/equities/slbs/slbs.htm>

[Reply](#)

294.  *Santosh Borde* says:
[September 18, 2018 at 12:27 pm](#)

Hii, I purchased some CNC shares yesterday. Today i want to sell these share how will i do that?
Where i found these share details in Zerodha kite?

[Reply](#)

- o  *Karthik Rangappa* says:
[September 19, 2018 at 11:14 am](#)

These shares are available under T1 quantity, you can sell them the very next day. I'd suggest you read this article – <https://zerodha.com/z-connect/queries/stock-and-fo-queries/btstatst-buyacquire-today-sell-tomorrow>

[Reply](#)

295.  *sam* says:
[September 17, 2018 at 9:51 pm](#)

hi
how much money is required in account as a minimum margin for short selling at zerodha

[Reply](#)

- o  *Karthik Rangappa* says:
[September 18, 2018 at 11:17 am](#)

No minimum as such.

[Reply](#)

296.  *subhash lakhani* says:
[September 14, 2018 at 9:55 am](#)

if i buy 200 shares under covered order @ 200/, then how to place order for sell the same shares @ 210.
Thank you

[Reply](#)

- o  *Karthik Rangappa* says:
[September 14, 2018 at 1:38 pm](#)

The accompanying stop loss order has to be lesser than the buy price, so you cannot really place a profit order at 210.

[Reply](#)

-  *subhash lakhani* says:
[September 14, 2018 at 5:03 pm](#)

Thanks for prompt reply.
But my problem is different. Once the order is executed then how to place the second leg of the transaction.
Suppose cover order was placed to buy 200 shares @ Rs 200 with a stop loss of Rs 190 and this order is executed. Now how to place sell @ 210 order for this buy.
Thanking you

[Reply](#)

-  *Karthik Rangappa* says:
[September 15, 2018 at 4:58 pm](#)

You will have to manually cover this. I'd suggest you explore Bracket Order for both SL and target orders.

[Reply](#)

- *subhash lakhani* says:
[September 15, 2018 at 5:58 pm](#)

but in case of bracket orders if order for 500 shares is executed in small lots say 1/2/5 shares & target or stop loss is not arrived and order is squared at 3.20 pm each lot transaction attracts 20/ plus GST. This means that if stock price is 50/70/100 and then for small lots of say 1/2 or 10/20 attracts 20/ Plus GST which becomes very costly affair.

- *Faisal Mohammed* says:
[September 17, 2018 at 10:55 am](#)

For cover order, you cannot place a target order and you require to exit it manually(using market exit).
Yes, bracket order can get broken into multiple child orders. If it does, its best recommended to square off before 3.20 PM manually

297. *Manish* says:
[September 11, 2018 at 10:28 pm](#)

Hi Kartik, if i've Placed an order in CNC and it got executed. Can I sell the same stock under CNC in next two days I.e. before it's delivered to my account?

[Reply](#)

- *Karthik Rangappa* says:
[September 12, 2018 at 1:30 pm](#)

Yes, you can.

[Reply](#)

298. *C.P.SRINIVAS* says:
[September 10, 2018 at 3:23 pm](#)

Sir,
If we buy shares using MIS market order on wednesday and sell them on Thursday before 12:00 AM, and due to personal urgent emergency amount want to be withdraw from demat account, when will be credited to bank account on Monday or Tuesday.

[Reply](#)

- *Karthik Rangappa* says:
[September 11, 2018 at 2:17 pm](#)

MIS is only intraday market order type, you cannot carry forward the position using MIS.

[Reply](#)

299. *XYZ* says:
[September 8, 2018 at 11:17 pm](#)

On 5th september afternoon I was not able to place f&o orders on kite as there was some teqnical issues from your side.

My question is that in the above case if I would be placing order in nest trader (zerodha trader) then also I would be suffering from that problem or not as I think nest trader is an third party software.

[Reply](#)

- o  *Karthik Rangappa* says:
[September 9, 2018 at 8:45 am](#)

The issue was with exchange connectivity, this would affect both the platforms.

[Reply](#)

-  *XYZ* says:
[September 9, 2018 at 5:19 pm](#)

So i think only solution to be safe from these glitches is to use \"nse now\" terminal for trading. Correct?

[Reply](#)

-  *Karthik Rangappa* says:
[September 10, 2018 at 11:48 am](#)

Not really, check this – <https://www.moneycontrol.com/news/business/markets/nse-now-software-facing-technical-problems-2575111.html>

[Reply](#)

-  *XYZ* says:
[September 14, 2018 at 4:38 pm](#)

Thanks for reply my only question is that if i use nse now platform will i be exempted from broker specific technical problems while trading. For example say zerodh again faces conectivity issue , if i would have trading using now terminal then also would i faced that problem. I hope as a trader you understand my concerns over technical glitches . moreover i could also use third party platform for tecnical anlaysis .

-  *Karthik Rangappa* says:
[September 15, 2018 at 4:55 pm](#)

Like I was mentioned, these technical glitches can occur (very rarely though) on any platform.

300.  *Rizwan* says:
[September 6, 2018 at 12:56 pm](#)

How to predict the next moves properly by observing the Bid and offer quantity?

[Reply](#)

- o  *Karthik Rangappa* says:
[September 6, 2018 at 1:09 pm](#)

You cannot, Rizwan 😊

Bid – Ask is dynamic and changes every second. Very hard to infer this data to predict the future outcome.

[Reply](#)

301.  *Sankari Ramana* says:
[September 5, 2018 at 9:38 pm](#)

I don't understand the concept of margin/ leverage. Could you please explain it with a simple example?

[Reply](#)

o  *Karthik Rangappa* says:
[September 6, 2018 at 12:24 pm](#)

Sankari, this chapter – <https://zerodha.com/varsity/chapter/leverage-payoff/> and the next one explains this concept.

[Reply](#)

302.  *Jitendra* says:
[September 5, 2018 at 12:18 am](#)

Hi,

Can I put a CNC order valid for multiple days? If yes, how?
If no, please provide that feature.

Thanks.

[Reply](#)

o  *Karthik Rangappa* says:
[September 5, 2018 at 11:11 am](#)

No, this is not possible for now, Jitendra. However, we will have good till canceled order soon, with this, it should be possible.

[Reply](#)

303.  *srikanth* says:
[September 3, 2018 at 10:30 am](#)

i want to buy intraday shares with margin amount in zerodha.can you please tell me the process to place the order

[Reply](#)

o  *Karthik Rangappa* says:
[September 3, 2018 at 6:45 pm](#)

Srikanth, you need to buy under the MIS product type. I'd suggest you call the support desk initially and understand how to place the trade. Once you are comfortable, maybe you can start placing these trades yourself.

[Reply](#)

304.  *Tejas* says:
[August 24, 2018 at 1:27 am](#)

If i want to buy a stock in pre-market session (9:00 to 9:07), then do i need to place three different orders ? (1st Buy-Limit Order 2nd SL Order and 3rd Sell Order)

[Reply](#)

o  *Faisal Mohammed* says:
[August 24, 2018 at 3:48 pm](#)

You can only place the Buy (Limit/Market) order in pre-open.
 If you have holdings, you can place a Sell(Limit/Market) order.
 Stop loss orders are not allowed in pre-open

[Reply](#)

305.  *Radharaman Kirtane* says:
[August 22, 2018 at 12:05 am](#)

Is it possible that when we add any scrip in marketwatch, it should be on the top of list instead of adding in the bottom of marketwatch ? Because it increases scrolling too much. Also make the blank space where we type scrip name in marketwatch, constant available there as if want to add another scrip, we have to scroll up again to find that blank space window. Also add feature to add many scrips at one time instead of adding one scrip only one time. I hope you will consider these. Thanks !!!

[Reply](#)

o  *Karthik Rangappa* says:
[August 22, 2018 at 12:23 pm](#)

Thanks for the feedback. I'll certainly pass this to the team.

[Reply](#)

306.  *Aman* says:
[August 19, 2018 at 10:15 pm](#)

\"The price of Infosys dropped from 1014.20 to 1020.80, and hence the colour changed to red from blue.\"

The above line is taken from the chapter. Can anyone please explain this line ?

[Reply](#)

o  *Karthik Rangappa* says:
[August 20, 2018 at 12:29 pm](#)

It should read, the price dropped to 1014 from 1020. So when this happens, the color changes to red. I guess this is explained in the subsequent chapters.

[Reply](#)

307.  *Chetan Sakariya* says:
[August 13, 2018 at 9:00 pm](#)

How to buy share in Holding. can we take option of Day Or IOC???... Today I'm buy share for holding but it will sell automatic at 5 pm, at that time I'm not using any stop loss or Intraday. so why

this happen??

[Reply](#)

- o  [Faisal Mohammed](#) says:
[August 14, 2018 at 2:49 pm](#)

Chetan, I believe you bought stocks using MIS order, which would have resulted in a square-off at 3.20 PM. For delivery holding, use CNC as the order type.

Day and IOC are order validity types. Day order remains pending with the exchange for the whole day while IOC(Immediate or Cancelled) gets executed immediately or directly gets cancelled.

More on this here

[Reply](#)

308.  [sridhar](#) says:
[August 12, 2018 at 10:58 am](#)

Sir,

I am verymuch new to Future trading. How much amount / margin need to do trade.

Example if i buy SBI future for Rs.302/- e and want to hold for two days and will sell /exit when it goes to Rs.319 or higher. May be holding the future for overnite or day or two till it reaches the Rs.310

In this case how much amount i need to have / blocked amount until i sell it off. (Since i am going to hold overnit position or two days)

Please let me know the requirred amount to hold the future for overnite or day or two.

Thanks,
Sridhar

[Reply](#)

- o  [Karthik Rangappa](#) says:
[August 13, 2018 at 8:29 am](#)

Sridhar, the margin applicable is NRML margins, you can check for all the margin requirements here – <https://zerodha.com/margin-calculator/SPAN/>.

[Reply](#)

309.  [Zeba](#) says:
[August 9, 2018 at 1:20 pm](#)

Hello Sir,

I placed an order for 1 sunpharma shares and I opt for CNC and limit order and then filled 1 in disclosed quantity as I was not aware that it doesnt have to be filled in.

[Reply](#)

310.  [M Sridhar](#) says:
[August 9, 2018 at 8:37 am](#)

Sir,

If i bought Equity at Rs.120 and it now reaches Rs.127, can i initiate my sell with SL-M at Rs.125?

If so, then if the price again moves up to Rs.129.. can i modify my SL/SL-M to Rs.125 ? and so like whenever the price goes up, can i keep update the SL/SL-M to ensure that my profit is booked ?

in both Kite / PI terminal.. Please advise me.

Thanks,
Sridhar

[Reply](#)

- o  *Karthik Rangappa* says:
[August 9, 2018 at 1:16 pm](#)

I guess what you need is a trailing stoploss, Instead of SL-M, you need to use an SL-limit.

[Reply](#)

-  *M Sridhar* says:
[August 9, 2018 at 2:31 pm](#)

Thanks you sir.

IF i do intraday trading, i bought Call option with premium of Rs.21 and i decided to sell at 30 and my SL would be 18.

In this case if the CMP moves on my direction / upward direction, can i modify my stop loss – SL price at 24.25 and trigger price would be 25.00 while the CMP / LTP is in 23.75. In this case will my SL will be executed before i am reaching target? or what should i put in SL and trigger price where the LTP/CMP is in the range of 23.50 to 23.90.

Please let me know
Thanks
Sridhar

[July 29, 2018 at 10:00 am](#)

Hello Sir,
I had doubt regarding SL order, Is SL order is only limited to intraday trading or it can be used in long term investments?

[Reply](#)

-  *Karthik Rangappa* says:
[July 29, 2018 at 10:16 am](#)

For now, it is an intraday order. However, we are testing Good Till Cancel (GTC) order type, if this is made available (hopefully over the next 1 or 2 months), then you can place an SL order and carry it forward overnight.

[Reply](#)

-  *Omkar Pandit* says:
[July 29, 2018 at 4:33 pm](#)

Unfortunately, daily manual order placement is the only way for now, Jude.

[Reply](#)

319.  *SatheeshS* says:
[July 10, 2018 at 5:30 pm](#)

Dear Karthick,

Thank you so much for the excellent way you have explained the concepts.

You ended the '\Bid & Ask Price\' section with the following statement – '\It is extremely important for you to understand how the buyers and sellers are placing their trades especially if you are an intraday trader.\'

I see that the the bid and ask prices are usually just differences of rs 1 or 50 paise from the LTP. Is there anything else an intraday trader needs to know on how the ask & bid prices and quantities are interconnected. ? Your reply will be of great help. Thank you.

[Reply](#)

o  *Karthik Rangappa* says:
[July 11, 2018 at 6:50 pm](#)

Being aware of this difference between the bid-ask (also known as the spread) is very crucial to know how the liquidity is faring. Smaller the spread, higher the liquidity and vice versa. This helps you decide on the quantity you want to trade in intraday. You don\'t want to be stuck in a trade because of low liquidity in the scrip.

[Reply](#)

■  *SatheeshS* says:
[July 13, 2018 at 2:25 am](#)

Dear Karthick,

Thank you so much for your feedback. I understood that the stocks with smaller spreads are more liquid.

Can you please clarify another doubt?

I read that the spread of rs 0.05 or rs 0.10 is actually placed by the Market Maker. So when the market opens and i see the usual spread in the ask and buy prices and quantities in the market depth section, are those ask and buy quantities entirely those of the traders or do the market makers add to the ask and bid quantities ?

For example at a particular time the total buy quantity is 6 lakhs and total sell quantity is 5 lakhs, is the entire 6 lakh buy orders put by traders and investors ? Or do the market makers add to those quantities?

If the total buy quantity is much higher than the total sell quantity, can we assume that the prices will move upwards and vice versa? Thank you.

[Reply](#)

■  *Karthik Rangappa* says:
[July 13, 2018 at 12:40 pm](#)

If the scrip is liquid, then market makers just add to the spread.

[Reply](#)

■  *SatheeshS* says:
[July 13, 2018 at 3:50 pm](#)

Thank you Karthick.

Welcome!

320.  *Anil Nebhani* says:
[July 7, 2018 at 1:31 pm](#)

suppose a stock is running cmp @190 and i want to buy the stock only when it goes above 195.2 ... i am working person i cant put the screen in front of my eye and wait for 195.2 to come and i place buy order. Is that possible to do it and place it in advance so that when price reach at 195.2 it will execute my buy order...???

[Reply](#)

o  *Karthik Rangappa* says:
[July 8, 2018 at 12:40 pm](#)

Yes, Anil, you can always place a limit order at 195.2. I have explained what limit order is in this chapter.

[Reply](#)

■  *Parthiban* says:
[July 16, 2018 at 3:25 pm](#)

Hi Karthik,

Today i faced an issue when placing a limit order. Consider the LTP was @ 200. i wanted to sell at 199. i placed a BO keeping 199 as my limit price and executed it. But, the stock was sold at 199.80 something saying that it took an average. i bought only one quantity and never bought anything before. is this an issue? or anything wrong with my order placement.? any comment is much appreciated. Thanks.

[Reply](#)

■  *Karthik Rangappa* says:
[July 17, 2018 at 12:43 pm](#)

Parthiban, if you want to buy at a price higher than LTP, use SL order. If you want to buy at a lower price, use Limit order.

If you want to sell at a price higher than LTP use Limit order. If you want to sell at a lower price, use SL order

[Reply](#)

321.  *Ankita* says:
[July 7, 2018 at 12:56 pm](#)

Sir/Madam

If both buy & sell order of 100 BPCL EQ stocks are placed in zerodha kite under MIS with limited price option, what will be the consequences in the following instances –

- 1) If both the orders with the limited price got executed
- 2) If buy order got executed before 3 pm and the pending sell order is made executed at 3 pm after modifying the given limited price with the market price
- 3) If sell order got executed before 3 pm and the pending buy order is made executed at 3 pm after modifying the given limited price with the market price

I need the answer as I want to do intraday with just one stock BPCL on regular basis on Zerodha Kite trading platform

Regards

[Reply](#)

- o  *Karthik Rangappa* says:
[July 8, 2018 at 12:38 pm](#)

- 1) One order negates the other, so the order is invalid
- 2) Your sell order will get executed within 3:20 PM
- 3) Again, all intraday orders will be closed by 3:20 PM, so make sure you plan your trades around this

Good luck.

[Reply](#)

-  *Ankita* says:
[July 10, 2018 at 6:54 pm](#)

Mr Rangappa Sir

I couldn't understand it properly, If I place one buy order of 100 BPCL stocks @370.25 in MIS and another sell order of 100 BPCL stocks @378.25 in MIS of Zerodha kite and both the orders get executed, then what will be the consequences after 3:20 pm

Regards

[Reply](#)

-  *Karthik Rangappa* says:
[July 11, 2018 at 6:55 pm](#)

Ankita, you have squared off both the orders here and out of the market. So no implications here.

[Reply](#)

322.  *Senthil Kumar N* says:
[July 6, 2018 at 3:14 pm](#)

Also sir.... I'm missing this explanation from the chapter..

SL-Market

[Reply](#)

- o  *Karthik Rangappa* says:
[July 7, 2018 at 10:38 am](#)

Sl = Stop loss. So when the stop-loss triggers, the order goes as the market order.

[Reply](#)

-  *Senthil Kumar N* says:
[July 8, 2018 at 9:23 am](#)

But sir how is it different from SL ? SL orders also hit the market when the stop loss price reached right... I'm little confused between these two things..

Stop Loss

Stop Loss – Market

[Reply](#)

-  *Karthik Rangappa* says:
[July 8, 2018 at 12:54 pm](#)

Yes, when SL hits, the order goes as a limit order (where the price of execution is defined by you). SL-M means the order gets executed as a market order where the execution will happen at (or near) to the last traded price.

[Reply](#)

-  *Senthil Kumar N* says:
[July 8, 2018 at 2:07 pm](#)

Got it now sir... appreciate your prompt responses 😊

Also sir you mentioned that you tube training sessions are happening everyday twice at 2:30 pm & 5.30 pm I'm checking for the past two days but nothing seems to be of that kind... can you pls assist.

-  *Karthik Rangappa* says:
[July 9, 2018 at 11:05 am](#)

Senthil, that was a product demo which was happening. We have stopped doing that now.

323.  *Senthil Kumar N* says:
[July 6, 2018 at 3:06 pm](#)

Sir – Two questions from my side..

1. Difference between Qty & Disclosed qty in trade window (i saw your earlier comment but would like to understand if there is any relation if i leave it blank)
2. How do I select the exchange NSE or BSE there is no option for it on the trading window.? Earlier you mentioned that we can buy from one exchange and sell to other.....

[Reply](#)

-  *Karthik Rangappa* says:
[July 7, 2018 at 10:33 am](#)

1) Assume you want to buy 10000 shares of a company, but would not want to disclose this close to market. You can do so by opting Disclosed quantity. The order will hit the markets in smaller chunks...say 1000 shares at a time.

2) At the time of buying or selling, you can choose the exchange as well. Look for this option in your order form.

[Reply](#)

339.  *Sunny* says:
[May 3, 2018 at 10:25 am](#)

Stop loss explanation is kind of rushed. It is very confusing. Kindly create two different scenarios for stop losses. One is buy scenario and other is sell scenario. I had to refer to 10 other websites to clearly understand this scenario, because everyone has different terminologies. I was under assumption that stop loss triggers sell after long position on it's own but that is not the case. I find Zerodha making lot of small mistakes overall.

[Reply](#)

- o  *Karthik Rangappa* says:
[May 3, 2018 at 9:10 pm](#)

Sunny, things are explained in more details here – <https://zerodha.com/varsity/chapter/volatility-applications/>

[Reply](#)

340.  *l_earn_err* says:
[April 28, 2018 at 5:30 pm](#)

Hello Sir, Please clarify the following:

1. Suppose I am to buy fresh 10 shares of TCS.

(Please note I am NOT into short position i.e. I am not buying these shares to square off because I short sold these shares earlier. I am buying these shares as fresh using CNC).

Then How to use SL/SL-M in this situation?

2. Are SL or SL-M used only for squaring off positions in intraday?

e.g. Selling to square off a buying position (bought long) and buying to square off a sell position (Shorting)?

[Reply](#)

- o  *Karthik Rangappa* says:
[April 29, 2018 at 7:21 pm](#)

1) You can use it in a regular way, just ensure you select the product type as CNC

2) No, you can use for CNC as well.

[Reply](#)

-  *l_earn_err* says:
[May 1, 2018 at 9:38 am](#)

341.  *KV Koundinya* says:
[April 24, 2018 at 1:10 pm](#)

Hi karthik.... I appreciate your effort to impart knowledge about stock markets in a systematic and easy to understand manner

I do have a question. I don't even know whether it is a right question. Lets say I have 2 accounts 1 in zerodha and other in angel. A stock "X" is trading at Rs 100 ± 0.5 rs (Bidding and asking included). I have 100 stocks of X. Now I try to sell 1 number of share from 1 account at 200 rs (I put a limit on price with validity "day"). Then I open another account and try to buy that 1 share at 200 Rs.

Will that trade get executed?

What will the last traded price show as?

I don't think so it is ethical and somewhere there will be a check to this practice. But I want to know your views about this.

Please let me know. Thanks

[Reply](#)

- o  *Karthik Rangappa* says:
[April 25, 2018 at 11:14 am](#)

No, there are circuit limits within which you can place the order –
<https://tradingqna.com/t/circuit-limits-of-stocks/24608/4>. So a price of 200 will not go through.
Although, I think the exchange surveillance mechanism will take notice of this as circular trade.

Welcome!

[Reply](#)

343.  *Sumit* says:
[April 17, 2018 at 9:27 pm](#)

I have I doubt that before placing Buy order , do I need to add money in the Funds before hand or while placing buy order I can directly pay from net banking?
Please clarify

[Reply](#)

- o  *Karthik Rangappa* says:
[April 18, 2018 at 11:36 am](#)

Sumit, you will have to transfer the funds from your banking account to your trading account before you can place a buy order.

[Reply](#)

344.  *DIVYAJIT* says:
[April 10, 2018 at 7:00 pm](#)

Terms like '\Call and Put\',' '\Normal and cover\'' and '\Process of adding fund to my trading account and types of adding it\''.

Are these explained in further chapters? If not then help me to learn.

[Reply](#)

-  *Karthik Rangappa* says:
[April 11, 2018 at 10:49 am](#)

Yes, they are under relevant modules. Suggest you go sequentially.

[Reply](#)

-  *DIVYAJIT* says:
[April 11, 2018 at 8:10 pm](#)

yeah, I'm going through chapter and modules one by one. But sometimes people ask questions with typical terms(which I don't get it) in comments which made me confuse.

[Reply](#)

-  *Karthik Rangappa* says:
[April 12, 2018 at 12:01 pm](#)

You need to read through this again, Divyajit. Everything is explained in a fairly detailed way.

[Reply](#)

345.  *DIVYAJIT* says:
[April 10, 2018 at 6:40 pm](#)

- 1) What is the difference between '\Stopless\'' and '\Stopless market\''?
 - 2) If I can sell the shares on the same day with CNC then why would I choose MIS?
 - 3) If I wanna buy and hold more than a day => CNC
- If I wanna buy and sold on that day => MIS

But What does MIS and CNC indicate while I wanna '\sell\' my shares which I have bought before? Does it mean like , If I wanna set the selling price for that Day then MIS and If I wanna set the limit for more than one day then CNC??

[Reply](#)

-  *Karthik Rangappa* says:
[April 11, 2018 at 10:48 am](#)

- 1) When you decide to sell at given price, it becomes an SL market. If you specify a price and a trigger price, it becomes a SL limit
- 2) You get additional leverage in MIS
- 3) Thats correct

If you are selling shares from your DEMAT, then you have to sell from CNC.

[Reply](#)

-  *DIVYAJIT* says:
[April 11, 2018 at 8:08 pm](#)

I still can't understand difference between SL and SL market? Can you elaborate with an example?
and What kind of leverage we get via MIS?

[Reply](#)

-  [Faisal Mohammed](#) says:
[April 12, 2018 at 12:45 pm](#)

SL-Limit activates a limit order when the trigger price is hit while SL-M sends a market order. Market orders guarantee immediate execution while limit order might remain pending if the price doesn't match
Check the margin calculator for MIS margin requirements(varies from scrip to scrip)

[Reply](#)

350.  *Suraj* says:
[March 26, 2018 at 1:50 pm](#)

Hi Karthik,

1. Looks the development team just wanted to bring some changes. Now you tell me from a user experience, O:xx H:xx L:xx C:xx is better readable or all these broken into multi line and expanding open, close etc is better, you know the answer please fix it back to O:xx H:xx L:xx C:xx.
2. Its better to give user option to pick both % and price together in market watch, not forcing to pick only one of them. even to pick one of it, earlier we had quick one click toggle at the top now its two click to do the same. tell me, is this user friendly? Development team needs to understand one simple thing for a new version its not necessary to force changes which are not user friendly.

hope these will be fixed soon.

regards
 Suraj

[Reply](#)

o  *Suraj* says:
[March 26, 2018 at 1:57 pm](#)

Also on open orders, by just pointing mouse we used to get 3 quick options – Exit, Add, Modify. Now its 2 clicks. what for?
 phew!!

[Reply](#)

351.  *Mani* says:
[March 21, 2018 at 3:51 pm](#)

Hello Sir, in the below market depth data why orders are higher than quantity? correct me if I am wrong Sir, does it mean that quantity displayed is only disclosed_quantity and the actual quantity is greater than or equal orders

```
{\'price\': 582.15, \'orders\': 262144, \'quantity\': 380}
{\'price\': 582.2, \'orders\': 262144, \'quantity\': 1314}
```

[Reply](#)

o  *Faisal Mohammed* says:

[March 22, 2018 at 10:34 am](#)

Mani, can you share more details of when you saw this and for which scrip?

[Reply](#)

Mani says:

[March 23, 2018 at 7:52 am](#)

It is a tick data that I got from kite API for
TATASTEEL
timestamp:2018-03-21 15:23:47

[Reply](#)

Karthik Rangappa says:

[March 23, 2018 at 11:02 am](#)

That would be minute data, not tick.

[Reply](#)

Mani says:

[March 23, 2018 at 12:14 pm](#)

sir I am trying to optimize my trading system to reduce the impact cost.
For that I figured out, I have to look into market depth, in the market depth
data I have posted quantity is less than orders, so my question is, whether the
quantity is total disclosed quantity for that price point? and real the real
quantity is equal to or greater than orders?

Karthik Rangappa says:

[March 24, 2018 at 12:07 pm](#)

Mani, is it an intraday system? I'd suggest you look at the volumes on an
EOD basis, you will have a more accurate reading.

Mani says:

[March 24, 2018 at 6:54 pm](#)

ok sir thanks, I already did that while doing historical testing. Out of curiosity,
how did you find that it is an intraday system?

Karthik Rangappa says:

[March 25, 2018 at 12:26 pm](#)

One would consider impact cost while placing market orders – and market
orders are placed mainly by intraday traders, so I just guessed 😊

Mani says:

[March 23, 2018 at 7:54 am](#)

It is a market depth tick data that I got from kite API for
TATASTEEL
timestamp:2018-03-21 15:23:47

```
\sell\': [{\price\': 582.15, \orders\': 262144, \quantity\': 380},

can you any one sugess me how can I buy long term share through zerodha

[Reply](#)

o  *Karthik Rangappa* says:
[March 19, 2018 at 11:36 am](#)

When you buy the shares, please ensure you buy with CNC as the product code. This will ensure your shares will goto DEMAT.

[Reply](#)

353.  *Pardeep* says:
[March 15, 2018 at 5:12 pm](#)

Hi kartik,

I have three questions.

1. If i want to buy some shares in CNC, can I put LTP and SL simultaneously or do I need to wait till the buying order get executed first and start reflecting in my trading a/c before putting a SL?
2. Can the answer of above question would be different if I choose MIS instead of CNC?
3. What is the difference between SL and SL-M?

Thanks

[Reply](#)

o  *Karthik Rangappa* says:
[March 16, 2018 at 11:29 am](#)

- 1) I'm guessing you want to trade intraday – for this, you are better off placing MIS, BO, or CO. You cannot do that in CNC
- 2) In fact, what you are looking for is a BO. Check this video –
<https://www.youtube.com/watch?v=2TrYyOHA7P4&list=PLkxTRam6E2V-okv6gwQlt6dLTsn0v6CD1&index=8>
- 3) SL is like a limit order – when are particular about getting out at a particular price. SLM is like a market order.

Where is Call and Put option in Kite to trade in intraday ?
Please clear with screen shot.

[Reply](#)

- o  *Faisal Mohammed* says:
[March 13, 2018 at 3:54 pm](#)

Just search for the scrip name followed by the strike price. You will find a dropdown with list of Calls(CE) and Puts(PE) for that strike.
Check this screenshot for an illustration

[Reply](#)

355.  *Palash Rawat* says:
[March 11, 2018 at 2:46 pm](#)

If I buy a big volume of a liquid stock say 30000 stocks of SBI in MIS with a Limit Price of RS.252 would the order get executed immediately?

If I put my Limit price slightly higher than the LTP do the chances of a big order getting executed immediately increase?

On the contrary if I use the market order to trade, will the terminal automatically get my the best priced 30000 stocks in the context of the current LTP for me?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 12, 2018 at 11:06 am](#)

30K shares is still a large order for SBI. The fill really depends on the liquidity and price at the time of placing the order.

Yes, because this would act as a market order but with the added benefit of specifying the price.

If you place a market order, the emphasis is on filling your order and not really getting you the best possible price.

[Reply](#)

356.  *Newbie* says:
[March 10, 2018 at 12:55 pm](#)

Hi,

When I buy equity shares, would zerodha deduct the amount from the linked bank account automatically or do I need to do any transaction first to transfer sufficient amount from my linked bank account to zerodha trading account?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 10, 2018 at 6:32 pm](#)

You first need to transfer the money from your bank account to your trading account. Think of the trading account as a wallet to fund your market transactions. You can buy shares only if you have funds in your trading account. Check this to know more about fund transfer –
<https://zerodha.com/fund-transfer>

[Reply](#)■ *Newbie* says:[March 11, 2018 at 9:02 am](#)

Thanks Karthik. I have gone through the funds transfer link.

One question – how would zerodha add the funds to my trading account, when transferring the amount to the given zerodha bank account details? As I can't see any placeholder to enter info about my trading account (such as my trading account number or any other unique identifier to identify my trading account)?

Does it identify my trading account based on my linked bank account where I initiate the transfer from?

[Reply](#)■ *Karthik Rangappa* says:[March 11, 2018 at 10:24 am](#)

I'd suggest you login to Kite and click on the Funds section. When you do this, you will see a pop up with your bank details. Follow the flow and complete the transaction. Once you've made the transfer, the amount will immediately reflect in your trading account. Take a look at this – <https://www.youtube.com/watch?v=026V66o-CP0&list=PLkxTRam6E2V-okv6gwQlt6dLTsn0v6CD1&index=4>

The only new addition to this is the UPI fund transfer mode, you can read more about this here – <https://tradingqna.com/t/funds-transfer-upi-introduction/12789>

[Reply](#)357. ■ *Simang* says:[March 1, 2018 at 10:56 am](#)

Sir Supposed I placed a buy order of ZincM@251 and it's get executed. Now I placed a sell order of the same commodity@260 and get executed. I am come in a position of 20 Rs. supposed please tell me how to exit and square off the position pls...

[Reply](#)○ *Faisal Mohammed* says:[March 1, 2018 at 12:34 pm](#)

Your long position of Zinc Mini(bought at Rs 251) s ould have been already squared-off at Rs 260. If it hasn't been squared-off, you have placed the buy and sell orders under 2 product types(MIS and NRML) which you would need to individually close from the Positions page on Kite

[Reply](#)358. ■ *KV* says:[February 21, 2018 at 9:01 pm](#)

Sir, If I open an account now... Will the demat account maintenance charges are charged twice(i.e., Now and At the start of new financial year From April 1st)? I want to start initially with a small amount of Rs 5000...

2) What are the charges levied on Mutual funds at zerodha?

3) Within how many days I will get an account if I pay now? I stay in Hyderabad

Kindly reply me
Hoping for response

[Reply](#)

- o *Karthik Rangappa* says:
[February 22, 2018 at 1:16 pm](#)

1) AMC is charged once a year
2) Rs.50 + GST per month
3) You can open it online if you have Aadhar, account gets activated within 1 working day –
<https://zerodha.com/open-account>

[Reply](#)

- *KV* says:
[February 22, 2018 at 9:17 pm](#)

Thanks for reply
I want both trading and demat account... Only aadhar is enough?
Kindly share the details.. what documents are required? So that will be prepared...
Do you have home service ?or do you have any representatives in Hyderabad?

[Reply](#)

○ *Faisal Mohammed* says:

[February 15, 2018 at 11:33 am](#)

You can add the BSE scrip to your Marketwatch and place a Buy/Sell order. Add the suffix \’BSE\’ while searching for the scrip. For example- \”SBI BSE\”.

[Reply](#)

361. *Khalid* says:

[February 2, 2018 at 3:15 pm](#)

I brought 1000 shares of ITC under the MIS option with the amount which I had in your trading account. When the prices started going up and I reached a profit level of 2k, I tried to sell all the shares . But the bid continuously rejected claiming that margin fund required is short. I didn\’t get it ...do we need to keep an equal amount in the trading account for selling too. Then does that mean i can use only half of my money to buy shares. I eventually was able to sell the shares under SLM, which led to a loss of 2k. How do i make money then? Zerodha is making me lose my money. I am really upset

[Reply](#)

○ *Karthik Rangappa* says:

[February 3, 2018 at 5:26 pm](#)

Ah,no..you dont need margin to square off an open position. I guess you must have tried selling a larger quantity or maybe you had a pending position.

[Reply](#)

362.  Vishal Tuniki says:
[January 31, 2018 at 4:15 pm](#)

\”If the price drops to Rs.256 from 255 the stop loss order gets active.\”

I guess you really wanted to say \”drops to Rs.255 from 256.\”
 Correct me if i am wrong

[Reply](#)

o  Vishal Tuniki says:
[January 31, 2018 at 4:22 pm](#)

Does that also means, it won\’t get active if the price drops from 256 to 255.90?

[Reply](#)

o  Faisal Mohammed says:
[February 1, 2018 at 2:50 pm](#)

Vishal, errors are fixed.
 The stop-loss order is executed within the Price and the Trigger Price range

366.  *AK* says:
[January 25, 2018 at 11:20 pm](#)

How can we update the SL of an existing share in a portfolio?

[Reply](#)

367.  *HImanhu parmar* says:
[January 25, 2018 at 1:59 pm](#)

i am new to stock market. i have purchased my first (regular – CNC)10 shares of Hind syntex at price of 15.60 on 24/01/2018. and the order is completed and the 10 stocks shows in my orderbook and position but today that on 25/01/2018 there is no share in my account. so please tell me what is the problem.

[Reply](#)

o  *AK* says:
[January 25, 2018 at 11:29 pm](#)

If it has been executed successfully, it should be there in Holdings section of your portfolio (briefcase symbol).

If it is not there, there could be two reasons:

1. Your account was not having sufficient balance before order place.
2. The limit price has not been triggered on the same day after your order place.

[Reply](#)

o  *Karthik Rangappa* says:
[January 27, 2018 at 2:21 pm](#)

The shares take 2 days to hit your DEMAT. Right now it will be in your 'Holdings' page under T1 quantity.

[Reply](#)

368. *Rahul Goyal* says:

[January 24, 2018 at 6:29 am](#)

If I go short on a stock, so for how long I can wait for the price to fall?

E.g. I sell the the borrowed shares at 425 and price goes to 430, but I think that price will come down to 400, so for how long I can hold the borrowed shares?

[Reply](#)

o *Karthik Rangappa* says:

[January 24, 2018 at 12:04 pm](#)

If you have shorted the stock in futures, then you can wait until the future's contract's expiry. If you have shorted the stock, you can wait till the end of day (i.e 3:20 PM).

[January 15, 2018 at 10:52 pm](#)

Hello,

Please make me clear on this.

- 1) Buying a share by CNC means that i'm willing to hold the share for longer period.
 - 2) In the above explained chapter, the stop loss order gets active when the price hits the trigger price while i sell my shares.
 - 3) But why would i want to specify the stop loss value while buying through CNC if i wish to hold the share for say a year. Eg: i buy a share at 262.50rp and let the stop loss price be 255. If the price of a share hits the trigger price 256 and my stop loss order gets activated. All this happens due to resignation of that firm's CEO. Within few days another CEO is appointed and the price of a share increases to 280rp. What if i wanted to sell my share when price of a share was 280rp but still my stop loss gets activated because of fall in price few days earlier. How should i avoid this if my understanding is right?
- Thanks in advance.

[Reply](#)

o  *Karthik Rangappa* says:
[January 16, 2018 at 11:03 am](#)

- 1) Yes, CNC is for delivery trades
- 2) Yes, the SL order gets active only the trigger price hits
- 3) This is not required – if you are a long-term holder, then daily price fluctuations does not really matter

[Reply](#)

-  *Vignesh Doraiswamy* says:

Happy to note that, Vignesh. Keep learning 😊

[Reply](#)

373.  *Sreejith* says:
[January 9, 2018 at 8:51 pm](#)

We are long at Rs.261. In case the trade goes bad we would want to get rid of the position at Rs.255, therefore 255 is the stop loss price. The trigger price is specified so that the stoploss order would transition from passive to active order. The trigger price has to be higher than the stop loss price. We can set this to Rs.256. If the price drops to Rs.256 from 255 the stop loss order gets active.

What do you mean by if price drops to 256 from 255. I am confused. If price moves to 256 , it is not a drop right?

[Reply](#)

-  *Karthik Rangappa* says:
[January 10, 2018 at 11:12 am](#)

Yes, if the price moves to 256 from 261, then it is considered as a drop in prices.

[Reply](#)

-  *Sreejith* says:
[January 13, 2018 at 2:19 pm](#)

In the article it is mentioned "If the price drops to Rs.256 from 255" not "If the price drops to Rs.256 from 261"

[Reply](#)

-  *Karthik Rangappa* says:
[January 14, 2018 at 10:16 am](#)

Thanks for pointing out we'll make the necessary corrections.

[Reply](#)

-  *Sreejith* says:
[January 14, 2018 at 10:26 am](#)

There are some more instances like this: For eg:
"The price of Infosys dropped from 1014.20 to 1020.80"

-  *Karthik Rangappa* says:
[January 14, 2018 at 10:32 am](#)

Ok, will look into it. Thanks.

what is \"SL-M\" option is for?

and

why by default, the exchange specified would be NSE?

and

what is spread trading means? and please explain me its connection with long and short position on any stock?

[Reply](#)

- o  *Karthik Rangappa* says:
[January 7, 2018 at 11:34 am](#)

SL-M means stop loss @ market. So when the price hits your SL, the position will get squared off at market price.

Maybe because of better liquidity, you are free to select any exchange you desire.

I'd suggest you read the module on Futures for this.

[January 4, 2018 at 11:08 pm](#)

Hi Zerodha,

am repeatedly facing issues related to chart.. suddenly the graphs in the chart keeps showing old data . To explain this technically, when i plot candle stick diagram or heiken ashi sticks.. either the closing or opening values are totally errored and shows huge deviation from current value.

This looks like the stock just spiked up or low.. and no matter what i could not find any solution. and if this issue occurs then it continues for several hours.. here is what all i did,

Since am software test architect and practising s/w testing since 10+ years, i tried all these technical things and figured out that the data feed or chart data coming from your servers are incorrect.

1. Tried on various browsers IE 11, chrome latest stable version Version 63.0.3239 -> chart issue persists on all these browsers

2. Tried Clearing cache, temp files -> still same issue on chart

3. Tried Incognito mode to ensure clean and clear work place for the site -> same issue with chart

4. tried on someother machine on which kite was never opened earlier -> same issue

5. changed the internet service provider -> same issue

at last when i called to your support team, they said that many other customers are also facing the same issue.

as far as i know,

neither PI nor Kite had such issues till 2016 (atleast it was rare). but i have noticed in 2017 these issues have raised up considerably like atleast once a week.

and in 2018, till today i have faced 2 incidents on different days.

so even though you have latest options or features on Kite/kite3.. due to charting issues.. we are feel nervous to use these applications.

Kindly do the needful as soon as possible so that such issues will not make satisfied customers look out for other vendors.

i have raised tickets earlier on this.. and there is no outcome of such tickets. nobody calls and enquires and issues still exists.

Hi, I bought 10000 shares of xx script at 7.7 rupees on 29/12/17 and again I bought another 10000 shares of the same script on 01/01/18 at 8.7 rupees. I thought the average price is 8.2 rupees for 20000 shares but it was 8.45 rupees. It was almost 4 to 5 thousand difference for one trade. I checked the contract notes, on 29/12/17 the 10000 shares was bought in 2 lots at 7.7 rupees and on 01/01/18 the 10000 shares was bought in 6 lots at 8.7 rupees.

1. The average price was calculated for 8 lots, is it correct?
2. For intraday trading whether i will be charged for orders or lots?
3. Whether i will be charged for call and trade? if yes how much?
4. Do we have any webinar session to clarify our doubts?

Please explain the term '\Position\' in trading terminology module in our varsity. Thanks

[Reply](#)

o *Faisal Mohammed* says:

[January 5, 2018 at 12:06 pm](#)

1. Your buy average price is Rs 8.2 regardless of how many orders you've bought it in(The calculation goes by $(10000*7.7+10000*8.7)/20000$). If your seeing a discrepancy, please contact Support
2. At Zerodha, you will be charged per order for intraday orders(0.01% of turnover or a maximum of Rs 20)
3. Call and Trade is charged at Rs 20(plus GST) . Check List of Charges
4. You can attend our platform demo at 2.30 PM and 6.30 PM every day.

All F&O and intraday equity are called '\Positions\' . If Equity is held longer than a day, it is transferred into your Demat, making it a '\Holding\'

[December 22, 2017 at 5:26 pm](#)

Hi Karthik,

Zerodha is doing just great in almost every aspect that I can think of. Whether it is educating traders, competitive brokerage charges, tools to analyse charts, etc. I have been trading with zerodha for quite some time now. However, these days I face a very frequent issue with respect to the speed of the platform (kite) during the trading session. I have noticed this a number of times that when i am fully zeroed in on a good trade I am not able to palce the order as it gets stuck. i tried with kite 3.0 also but the issue is persists. The speed of kite is unbelievably slow and charts are not loaded in right time. could something be done about this?? i do not want to change the broker as zerodha offers plenty of good things for traders but this speed issue especially when markets are live is troubling me alot.

Thanks

[Reply](#)

[Reply](#)

388. *Kans* says:
[November 19, 2017 at 4:02 pm](#)

Hi Karthik,

You must have aware that how it's important for a trader to have a Sound Notification for 2 things i.e. when the order is successfully placed / cancelled / rejected & as soon as the Trades get Executed. So;
a) In Zerodha Kite – It does not notify with any sound as soon as the trades get executed.
b) In Zerodha Pi – It does not notify with sound if the order is successfully placed. However, it does at the time of trades get executed but with a very lengthy voice which is really annoying. It must be with a normal sound like beep once...

I am requesting you to please incorporate all order events (in Kite & Pi) with a Sound & Better to be it as a Normal sound like Beep Once... (When order successfully placed /cancelled / rejected + When Trades get Executed)

Thanks,
Kans

[Reply](#)

- o *Karthik Rangappa* says:
[November 20, 2017 at 11:06 am](#)

We do get a sound notification in Kite when an order is placed. But for other events, let me check.

Agree, probably replace them all with Kite.

[Reply](#)

396.  *Apurva A Kunkulol* says:
[October 20, 2017 at 6:27 pm](#)

When it is said that the Limit price must be greater than the trigger, for a BUY, is the assumption that the price is seeing an upwards trend and vice versa for a SELL order?
If I want to buy while the price is showing a downward trend does the Limit price still have to be greater than the trigger?

Thanks.

[Reply](#)

◦  *Faisal Mohammed* says:
[October 20, 2017 at 6:41 pm](#)

The way stop-loss orders work is they need a trigger to get activated after which a limit order can go live with the exchange. Therefore when you place a buy limit order, the limit price should be higher than the trigger and vice versa for Sell Stop-loss.
This has nothing to do with what trend the script is moving with. Although I understand you want a better price and want to place a lower price in case of a buy and higher in case of a buy, the exchange NEAT system doesn't allow that. You can read on the same here. This is because stop-loss orders are built for risk mitigation and serves the purpose well

[Reply](#)

-  *Apurva A Kunkulol* says:
[November 1, 2017 at 9:41 pm](#)

So basically, SL(and SL-M) orders should be used only to exit current positions, right?
A new entry for a scrip can't be made using the SL or SL-M, right?

[Reply](#)

-  *Karthik Rangappa* says:
[November 2, 2017 at 11:04 am](#)

Yup.

[Reply](#)

397.  *Apurva A Kunkulol* says:
[October 20, 2017 at 5:51 pm](#)

If I have to place an SL or an SL-M order and want it to persist till the time the price drops/increases to the trigger, can that be done?
Or do I have to place these orders everyday?

[Reply](#)

-  *Faisal Mohammed* says:
[October 20, 2017 at 6:48 pm](#)

Currently, we do not have GTC(Good till Cancelled) orders in Zerodha. Something we are looking to add in the near future.
So all orders placed are valid for a day

[Reply](#)

398.  *Abisheik* says:
[October 15, 2017 at 2:49 pm](#)

Hi Karthik – Hats off!!....Informative and so easy to understand..I now know meaning a for lot of acronyms.

One small suggestion:

I see comments/questions being posted by quite a lot of ppl and you continue to answer all of them :-). Is there a way you can rank in order or flag some, that you feel is quite informative and important for readers like us to get more insight.

Thanks. Appreciating all your hard work!!!

[Reply](#)

-  *Karthik Rangappa* says:
[October 16, 2017 at 11:05 am](#)

That makes sense, Abisheik. Thanks for the feedback, will pass this on to the team.

[Reply](#)

399.  *Arun9999* says:
[October 5, 2017 at 4:56 pm](#)

Hello Karthik
Mp-345

I want to place a SL(Buy)
Tp-351.50
Lp-353

Now mp is rapidly moving from 345...350...351...and directly to 353.50

Then after market start falling(for case1,case2,case3)

Case1:now mp-353 here my order execute at 353 or not?(ie. , can I get script at the price of 353 if seller available? YES OR NO)

Case2:now mp-351.50 then availability of seller at @351.50, @352,@352.50,@353 what price. My order execute?

Case3:now mp-352 order will exe at 352 if seller available at that price?

Case4:normally in SL order if seller is available at TP order is exe at TP if MP hits TP?(YES OR NO)

[Reply](#)

- o *Karthik Rangappa* says:
[October 6, 2017 at 8:17 pm](#)

- 1) Yes, you will get it at 353
- 2) Since your limit is at 353, you will get it at 353
- 3) Limit price at 353

[Reply](#)

- *Arun9999* says:
[October 7, 2017 at 8:17 am](#)

Tq Karthik,

I am confuse with case3 even mp at 352 order will exe at limit price 353 only. As well as no seller available at price 353 but available at 352. So above buy order will not go for better price that is 352 instead of 353.

[Reply](#)

- *Karthik Rangappa* says:
[October 7, 2017 at 4:28 pm](#)

For this, you need to place an SLM order.

[Reply](#)

400.  *Nancy* says:

[September 30, 2017 at 1:25 am](#)

The last traded price of a share was Rs 607. I placed a LIMIT order after market hours (AMO) and entered the trigger price as Rs 610. The next day the opening price of the stock is Rs 605. At what price will I get the stock at Rs 610 or Rs 605? If the answer is Rs 610 please tell me what should I do to buy the stock at any price below Rs 610?

[Reply](#)

[Reply](#)

402.  Mahidhar Nyayapati says:
[September 13, 2017 at 7:52 pm](#)

Stop Loss Order requires trigger price of 326.

Stop Loss was at 325. As mentioned in the article, Stop Loss Order trigger was set to 326.75. this means if the price drops to 326.75 from 332 Stop Loss gets active. In that case at what price will the share be bought 332 or 326.75?

Later the article states that if there is a seller for 332 and order is sent it will get executed. Will it get executed at 332 without the price going down to trigger price of 326.75 or 325?

Can you please clarify about trigger price and the price we quote to buy?

Please also explain what is SL-Market or Stop Loss-Market?

[Reply](#)

-  Karthik Rangappa says:
[September 14, 2017 at 11:00 am](#)

The trigger is set to active the stoploss order. When the trigger is activated, the SL order is sent to the exchange. The buy or sell action will occur at the SL price. So in this case, it would be

325.

[Reply](#)■ *kunal* says:[September 18, 2017 at 6:59 pm](#)

what if we dont set the trigger price
is stoploss useless without trigger price

[Reply](#)■ *Karthik Rangappa* says:[September 19, 2017 at 11:20 am](#)

Setting a trigger price for SL is mandatory.

[Reply](#)■ *kunal* says:[September 19, 2017 at 8:58 pm](#)

ok but what if we dont set it
will SL work or not OR its not possible to set the SL without trigger price??

■ *Karthik Rangappa* says:[September 20, 2017 at 12:00 pm](#)

Every SL order needs a trigger price, else the SL order is not valid.

403. *PB* says:[September 12, 2017 at 2:39 pm](#)

Just wanted to know the meaning of SL-M in trading software and trading

[Reply](#)○ *Karthik Rangappa* says:[September 13, 2017 at 11:14 am](#)

It stands for Stoploss – Market. Basically, the stop loss will trigger at the market if the trigger price is activated.

[Reply](#)404. *Algernon DMello* says:[September 3, 2017 at 1:52 pm](#)

Hello,

Hello,

How do I access this terminal? I have recently opened an account with Zerodha and was given credentials for Kite. Is Kite a replacement for the terminal described above?

[Reply](#)

- o  *Karthik Rangappa* says:
[September 2, 2017 at 10:32 pm](#)

Yes, Kite is our flagship trading terminal.

[Reply](#)

406.  *esan* says:
[August 28, 2017 at 4:04 pm](#)

hello sir how to set a target for a trade

[Reply](#)

- o  *Karthik Rangappa* says:
[August 29, 2017 at 10:45 am](#)

Simple support and resistance levels offer a basic method to identify target price.

[Reply](#)

407.  *Apurva Kunkulol* says:
[August 28, 2017 at 11:37 am](#)

I have just bought 2 shares of INFY at Market order, it shows in my order book, but not in the Holdings or positions tabs, so do I have the order? Where can I check if I own the shares, since it shows order \"completed\" on the \"status\" tab.

Thanks.

[Reply](#)

- o  *Karthik Rangappa* says:
[August 29, 2017 at 10:37 am](#)

Yes, it would be in T1 quantity. Can you check?

[Reply](#)

408.  *Apurva Kunkulol* says:
[August 28, 2017 at 11:20 am](#)

While placing a Stop Loss order, in the buy order form, where does one specify the Actual \"stop loss\" price?

Since it has the \"price\" and the \"trigger price\" spaces, but not the actual place to specify the stop loss price.

Also when does the order actually get executed, since whenever I place the order, I can see that it's in the pending column.

Thanks.

[Reply](#)

- o *Karthik Rangappa* says:
[August 29, 2017 at 10:31 am](#)

Price refers to the SL price. Check this – <https://www.youtube.com/watch?v=eXMrEMdQWrQ&index=6&list=PLkxTRam6E2V-okv6gwQlt6dLTsn0v6CD1>

[Reply](#)

- *Apurva A Kunkulol* says:
[October 20, 2017 at 5:32 pm](#)

i.e the limit price, right?

[Reply](#)

- *Faisal Mohammed* says:
[October 20, 2017 at 6:53 pm](#)

The actual stop-loss price is the limit price. Let me give you an example. Lets say you have a position bought at ₹100 and you don't want to risk more than a rupee. You can place a trigger at ₹99.05 and limit price of ₹99. Basically, when the price falls to 99.05, the stoploss order which was pending is now triggers a limit order at the price of ₹99.

[Reply](#)

409. *Aditya* says:

[August 26, 2017 at 10:35 am](#)

Hello,

Suppose I buy shares using product type MIS (assuming leverage is used) , what happens if the stocks hits an upper circuit and neither am I nor is the system able to square off my position ? Also what happens if the stocks hits lower circuit ?

[Reply](#)

- o *Karthik Rangappa* says:
[August 26, 2017 at 4:51 pm](#)

Well, that would be a problem. This is the risk with intraday trade. Hence traders prefer to stick to Nifty 50 and liquid stocks.

[Reply](#)

- *Aditya* says:
[August 27, 2017 at 10:12 am](#)

How will Zerodha react to such a situation ? , Will zerodha force the client to payup the entire amount and take compulsory delivery ? or is there some other way out ?

[Reply](#)

-  *Karthik Rangappa* says:
[August 27, 2017 at 11:18 am](#)

[August 24, 2017 at 12:12 pm](#)

Hello Karthik,

I have a couple of questions:

1. Suppose i have bought a stock at say 400 and i want to have a stop loss at 390 and have set trigger price at 392. Also lets say the current market price is at 398. Due to some negative market news the now there is downward gap and the price is now at say 385 below 392 or 390. In this case will my SL will order be executed or i need square off manually.

2. SL-M could you confirm if in the above scenario if used will be effective.

The material and explanation that you have provided is awesome and easy to understand.

[Reply](#)

-  *Karthik Rangappa* says:
[August 25, 2017 at 8:33 am](#)

1) It is unlikely that your SL would be executed if the price gaps down. You may want to manually close it

2) Yes, it would be effective in terms of guaranteeing execution, but may not be at the desired price.

[Reply](#)

-  *Nayan Raj* says:
[August 26, 2017 at 4:37 pm](#)

Thanks a lot for the clarification Karthik :).

412.

Spandan says:

[August 21, 2017 at 4:50 pm](#)

Suppose i got 10 rupees in my account and cost of one share is 10 then i took MIS leverage of 90 rupees which give me a total money of 100 rupees. Now i sold the share at 11 rupees that is around at a total of $(11 \times 10 = 110)$ rupees which give me a profit of 10 rupees. My question is now the leverage given to me how will it be taken from me. Whether zerodha will take 100 rupees and give me 10 rupees or it will give me 20 rupees as the leverage is 90 rupees.

[Reply](#)

Karthik Rangappa says:

[August 22, 2017 at 11:57 am](#)

No, the leverage will come to you in terms of allowing you to buy shares for a higher amount than what you have. So there is no question of taking it back. And when you profit, you get to keep the profit. If you lose, you will have to pay up.

Fair and Square 😊

[July 19, 2017 at 8:04 pm](#)

How many days is validity of open stoploss order? Do I need to place an stoploss order everyday for holdings?

[Reply](#)

o  *Karthik Rangappa* says:
[July 20, 2017 at 8:05 am](#)

SL is a day order, valid till the market close. Given this, you may want to place your SL order on a daily basis.

[Reply](#)

421.  *Sauvik* says:
[June 20, 2017 at 10:26 am](#)

Hey Karthik I have a question,

Suppose I have a previous holding, and on a certain day I sell it, my mode of selling is CNC.

1) what will happen if the prices of the stock rise more than my sell price, and I buy them back before EOD. what will the case of profit or loss, and how my holdings will get affected??

2) What will happen if I see that the prices are falling and I buy the same back? Will it be considered as an Intraday trade, and will I earn profits?

[Reply](#)

o  *Karthik Rangappa* says:
[June 20, 2017 at 10:57 am](#)

1) It will be considered as an intraday trade and you'd make a loss. Holdings would stay intact.

2) It will be considered as an intraday trade and you'd make a profit. Holdings would stay intact.

[Reply](#)

Hi Karthik,

If we get a recommendation call from experts like- Buy ABC CE option above Rs.25. How do we set it up in PI? This I am asking because I may not be there in front of the PC when the recommendation comes and I cannot keep watching when it will go above 25. In that case how do I set up the trade in PI?

[Reply](#)

-  *Karthik Rangappa* says:
[June 10, 2017 at 8:32 am](#)

You will have to login and buy, there are no alternatives to this. By the way, you should not be looking at these advice at all :). Rather, I'd suggest you read about options and learn how to set up these trades yourself, have you check this module out? –
<https://zerodha.com/varsity/module/option-theory/>

[Reply](#)

423.  *VANKUMAR* says:
[June 5, 2017 at 9:20 pm](#)

Hi Karthik In my recent studies I came across Order-Flow Indicator which tracks the order flows in real time and also in EOD. I am amused to note that the Order-Flow, Foot Prints, Depth of the Market (DOM) negates all the technical analysis and even though we expect the scrip to move up, it suddenly plummets down leaving in shock the buyers who run hastily to come out with losses. In next few minutes it reverses and shoots up. This is how buyers and sellers are trapped. Can you pl advise how to guard against such eventualities. What are the order flow indicators software providers for NSE STOCKS.

[Reply](#)

-  *Karthik Rangappa* says:
[June 6, 2017 at 10:20 am](#)

Frankly, I've never used this indicator and hence I cannot comment on it. From what you've described, it seems to be quite noisy....and therefore not too reliable.

Co incidentally, next Friday, we will have a webinar to help NRI clients to get started on trading and investing in the Indian markets. The video will be available on our YouTube channel here – <https://www.youtube.com/user/zerodhaonline>

[Reply](#)

425.  *VANKUMAR* says:
[May 26, 2017 at 6:22 pm](#)

Hi Karthik good evening. On 24/05/2017, I bought AMARA RAJA FUTURES @ RS.883/- around 1 p.m., The quarterly results announced and suddenly fell to Rs.812 or so and bounced back to Rs.830/- very fastly. Normally on the sellers side price will be from lower to higher and on buyers side in the reverse. How that mechanism works?

2. In the normal course if inadvertently I put a selling order for a price lesser than the market price say for Rs.860/-, it get executed at the market price say if the buyer is at Rs.884/- and vice-versa. Thus the buyers and sellers are protected. If I put a Stop-loss buying or selling order is put it gets executed when the price touches that level or else not. But how this sudden fall of price is executed.

3. Similarly in case of sudden rise also in price.

4. I request you to clear my doubt and guide on the mechanism involved in it?

[Reply](#)

-  *Karthik Rangappa* says:
[May 27, 2017 at 5:59 pm](#)

The sudden fall is attributable to the event driven volatility. Whenever events like this hits the market, then the volatility shoots up and prices tend to move rapidly. Under such a scenario, SL orders may or may not go through since there would be intraday price gaps.

[Reply](#)

426.  *yogesh bhansali* says:
[May 26, 2017 at 12:30 pm](#)

IF I SELL SHARES IN CNC SAY FOR 100000 CAN I BUY SHARES WORTH 100000 EVEN IF THE MONEY IS NOT CREDITED IN MY ACCOUNT AND SAY IF I DONT HAVE FUNDS ANY OTHER FUNDS IN MY ACCOUNT

[Reply](#)

-  *Karthik Rangappa* says:
[May 26, 2017 at 5:41 pm](#)

If you want to short on a intraday basis, you are better off doing it as an MIS order.

[Reply](#)

427.  *Ramamoorthy Arunasalam* says:
[May 26, 2017 at 11:37 am](#)

I am new to zerodha. I have been CNC so far. Please let me know if I sell from my stock and wish to buy the same quantity. this would be treated as Intraday? should I convert to MIS before buying or just buy.

[Reply](#)

o *Karthik Rangappa* says:

[May 26, 2017 at 5:40 pm](#)

When you place the order, make sure you opt for MIS orders. Shorting in EQ has to happen on a intraday basis. You cannot carry forward the short position.

[Reply](#)

428. *ARUN MENDIRATTA* says:

[May 23, 2017 at 10:46 am](#)

while buying share i find written disclosed qty. Can u plz elaborate what is it???

[Reply](#)

o *Karthik Rangappa* says:

[May 23, 2017 at 1:10 pm](#)

If you want to buy/sell in a large quantity, then you may or may not want to disclose the order size to other market participants. Under such a scenario, you can simply opt for a disclosed quantity. Under disclosed quantity, you only expose a small part of your order, once this is filled, another small part will be exposed. So on and so fort till your entire order is executed.

[Reply](#)

429. *sahilkala* says:

[April 26, 2017 at 12:53 am](#)

Sir I have two queries:

1. Many a time in the above discussion you have mentioned this: \” If you opt for MIS, you will get additional leverage.\” What is meant by this additional leverage ?
2. Suppose I buy a stock at Rs. 100 with a stop loss of Rs. 95 but then I see that the price of the stock has risen to Rs. 110 can I change my stop loss value to Rs. 105 or any other value ?

Thanks and Regards,
Sahil Kala

[Reply](#)

o *Karthik Rangappa* says:

[April 26, 2017 at 11:17 am](#)

For every 100 Rupees of yours, a broker can give you additional 100 rupees to trade. So instead of 100, you will have 200 Rupees to trade with. This is called leverage.

- 1) MIS product type gives you more than the usual leverage provided by the broker
- 2) Yes, you can.

[Reply](#)

430. *Ganesh* says:

[April 10, 2017 at 1:32 pm](#)

433.  *Akash* says:
[March 31, 2017 at 9:34 pm](#)

Sir, i have few questions.

1. What will happen if the the CMP reaches the stoploss price? Will it get automatically sold?
2. What does trigger price actually do?
3. How is trigger price helpful, how does it effect the shares we are holding?

[Reply](#)

- o  *Karthik Rangappa* says:
[April 1, 2017 at 7:50 am](#)

- 1) SL will trigger. It does trigger automatically, but its always prudent to double check this once. There are instances when price drops below SL and SL would remain pending, so always double check
- 2) Trigger prices wakes up the sleeping SL order
- 3) Trigger is just a trigger to trigger the SL order 😊

[Reply](#)

-  *Ayush* says:
[April 1, 2017 at 2:20 pm](#)

Does it mean, if the CMP reaches the trigger price it will wakeup the sleeping SL order and automatically sell the stock at SL price?

[Reply](#)

-  *Karthik Rangappa* says:
[April 1, 2017 at 6:24 pm](#)

Yes.

[Reply](#)

434.  *Gaurav kumar* says:
[March 28, 2017 at 11:36 am](#)

hii,

I want to enter with large volume say 5000 shares in a particular stock. Should I enter through Bracket order or Cover order would be best option?

Would there be any movement in the price after entering through such a large volume??

Please reply.....

[Reply](#)

- o  *Karthik Rangappa* says:
[March 29, 2017 at 10:52 am](#)

It depends on your purpose. If it is for intraday trade, you could try the BO. If it is for delivery, you should choose CNC. Regarding the price movement, again it depends on the stock and its liquidity...for something like INFY or RIL which is very liquid, it would not matter at all.

[Reply](#)

435.  *Imran Husain* says:
[March 19, 2017 at 11:42 am](#)

Hi Karthik... first of all let me thank you and zerodha for such an excellent insight into the trading market! have learned loads here which i cant wait to apply to the real trading (After having done paper trades for a cpl of months!)

I have a final query before i start though and wonder if you can tell me if my calculations are correct...

Suppose i use cover order to place an order for 800 shares for ITC @ 282 with a stop loss of 277, then the margin req is 8122. If the price goes up to 295 then as per the brokerage calculator i make a profit of 10276.83/- (net). So my total amount is 18426.83/-. Then as the market is going to average out before EOD, i short 1700 shares @ 294 (again using a cover order) with a SL of 299 and the margin req of 17993/- and the price comes to 285, i make a profit of 16790.36/- (net). So my total profit at the EOD is 27067.19/- (10276.83+16790.36).

Is this calculation correct?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 20, 2017 at 11:59 am](#)

Thanks for the kind words, Imran.

Your profit on the first trade is $295 - 282 = 13$
ITC lot size is 2400
 $P/L = 2400 * 13 = 31200/-$

You will have to do similar calculation for the other trade.

explain me about the different stock exchange i have type some stock exchange here what to choose for what product

nse
bse

nefo
 nsecd
 mcxsxcd
 ncdex
 mcx
 mcxsxeq
 mcxsxfo
 bsefo
 bsecd

[Reply](#)

- o  *Karthik Rangappa* says:
[February 20, 2017 at 10:08 am](#)

nse = National Stock Exchange, choose this for EQ transaction
 bse = Bombay Stock Exchange, choose this for EQ transaction
 nefo = National Stock Exchange, choose this for derivative transaction
 nsecd = National Stock Exchange, choose this for currency transaction
 mcxsxcd = Multi Commodity exchange, choose this for currency transaction
 ncdex = National Commodity and Derivative exchange limited
 mcx = Multi Commodity exchange, for commodity trading
 mcxsxeq = Not functional
 mcxsxfo = Not functional
 bsefo = Bombay Stock Exchange, choose this for trading derivatives on BSE
 bsecd = Bombay Stock Exchange, choose this for currency transaction.

[November 17, 2016 at 4:29 pm](#)

i plan to buy 20 shares on some company.but wrongly i sell 20 shares on that company....what can i go in intraday

[Reply](#)

- o  *Karthik Rangappa* says:
[November 18, 2016 at 11:11 am](#)

You can buy back double the quantity on the same day. For example if you wanted to buy 100 shares, but instead sold 100...then you can buy back 200 shares. What this does is, one set of 100 shares will close your existing short trade...and other 100 will create a fresh long position, which is what you really want.

[September 10, 2016 at 9:09 pm](#)

Dear karthick,

I have a case here. Two questions in total..

Question 1 :

In simple words., Is a Stop loss order is equal to take profit order also?

I have sold xyz shares at 325 (SELL ORDER).

case 1 : if price goes above 325 and i want to square it with losses at 350, then i will set a trigger price of 349 and price at 350 (Stop Loss, BUY order) which means i will suffer a loss of 25 rs. this is called a stop loss order.

case 2 : if price goes below 325 and i want to square it with profit at 300, then i will set a trigger price of 301 and price at 300 (Stop Loss, BUY order) which means i will take a profit of 25 rs. Is this type of order possible to set the profits like the same as setting the losses in case 1 ?

Question 2 : Suppose xyz is trading at 325 . Now if I want to BUY the same at 340 when it reaches 340, does the following order makes sense?

I am putting a Stop loss BUY order with price at 340 and trigger price at 339. This means that CMP is 325 and if the price reaches 339 the order gets triggered and if price reaches 340 the system should buy the same.

[Reply](#)

- o *Karthik Rangappa* says:
[September 11, 2016 at 11:09 am](#)

Yup, you are right in all the cases, except for the Q1, case 2. For this I would suggest you check out Bracket order. More on BO here – <http://zerodha.com/z-connect/tradezerodha/zerodha-trader-software-version/bracket-orders-trailing-stoploss-sl>

458. *Gyanendra Vardhan* says:
[September 10, 2016 at 2:48 pm](#)

hi, Both pi and kite are great platform, however both are not the same. i.e. a few things are missing from kite and vice versa. I was hoping you guys work on following features

1. Allow multiple login (atleast 1 session in pi and kite). This will allow users like me to leverage both the features. Like pi has great tradescript features but i find it easy to have charts loaded on chrome because of many more technical indicators available there.

2. Chrome Push notification in kite. e.g. is when a supertrend happens i want to push chrome alert. I have multiple charts open on my chrome but i may miss because manually not possible to scan through every chart every min).

I am still learning and new to stock trading. I am software tester by profession, so from a usability view point i see some enhancement here and there will make zerodha the one stop trading platform for me.

If you want i can list down quite a few things which needs improvement.

[Reply](#)

o *Karthik Rangappa* says:

[August 27, 2016 at 9:32 am](#)

In order book snapshot: The order type is limit and you have limited the buy price at 332
In trade book snapshot: Why is the trade price is 334.15? It should have been 332 as per the concept of limit order type.

[Reply](#)

- o  *Karthik Rangappa* says:
[August 28, 2016 at 7:56 am](#)

Guess the order was modified later on.

[Reply](#)

462.  *Raj* says:
[August 19, 2016 at 8:52 am](#)

I want to ask one question. If I place a limit order to buy some shares of a company at Rs1000 but if I couldn't find any seller who is willing to sell at that price. Will I be charged any brokerage if my order gets cancelled after some time?

[Reply](#)

- o  *Karthik Rangappa* says:
[August 22, 2016 at 11:26 am](#)

No you won't be as there is no trade that gets executed. Brokerage gets charged only when a trade happens.

[Reply](#)

463.  *Rahul Lamkhade* says:
[August 11, 2016 at 9:19 pm](#)

Suppose a share locked at lower circuit say 100 rs. I want to buy that share when lower circuit breaks suppose at 101 then how can I add order to buy at higher price so when LC breaks it gets in 101.

[Reply](#)

- o  *Karthik Rangappa* says:
[August 12, 2016 at 11:03 am](#)

You could place a limit order for this.

[Reply](#)

-  *Rahul* says:
[August 12, 2016 at 11:23 am](#)

Thanks for reply.

But limit order for buy should not be current price. If I kept 101 it will be executed for 100. Tried this it failed.

[Reply](#)

-  *Karthik Rangappa* says:
[August 13, 2016 at 4:31 am](#)

Ah, so you are particular to buy at 101. In that case watching out for the price movement and placing the order is your best bet!

Here you go – https://www.youtube.com/watch?v=ukXciH0S_zs&list=PLkxTRam6E2V_YYRSqzCjRq20fYPh9bkSL&index=2

And now you can add multiple market watch as well, check this <http://zerodha.com/z-connect/tradezerodha/pi-tradezerodha/latest-pi-update-18th-july-2016>

[Reply](#)

466.  *Raju* says:
[July 22, 2016 at 1:26 pm](#)

I have a question regarding Bid and Offer quantities.

Infosys at 1.15 PM today is trading down at -1% and Bid and Offer quantities as below.

Bid – 3.2 Lacs

Offer – 2.7 Lcs

Since Bid price is the price at which buyer is ready to buy and Bid qty is more at present ...this means that more people are ready to buy and we can expect the price to go up in near term?

AT the same time, Reliance is trading up at +0.8% and bid and offer quantities as below

Bid – 1.9 Lacs

Offer – 2.6 Lacs

Since offer qty is more here ..more people are ready to sell and we can expect the price to go down in near term?

Please enlighten me.

[Reply](#)

o *Karthik Rangappa* says:

[July 23, 2016 at 10:15 am](#)

Raju, Bid and Ask is very transient in nature. They keep changing every second, and thus what you see now may not be the same the very next moment. Hence you cannot draw any directional information based on this reading.

[Reply](#)

467. *vishal* says:

[July 15, 2016 at 5:30 pm](#)

instead of normal, should i select cover?

[Reply](#)

o *Karthik Rangappa* says:

[July 16, 2016 at 7:43 am](#)

Select MIS if you want to do intraday.

[Reply](#)

468. *vishal* says:

[July 15, 2016 at 5:28 pm](#)

i right clicked on the stock, selected sell, selected normal, between , normal & cover, then in product selected mis , as i was trying to short sell, order type was selected as limit.

[Reply](#)

469. *Vishal* says:

[July 15, 2016 at 10:33 am](#)

Hi Karthik,

Today I was trying to short sell a stock via zerodha pi , but was facing difficulty.

Every time it was getting rejected with some messages like RMS BLOCKED, etc. Till now I was doing normal buy & sell, & I have no idea about how to short sell a stock via Zerodha PI.

[Reply](#)

o *Karthik Rangappa* says:

[July 16, 2016 at 7:38 am](#)

This could be a margin issue, I'd suggest you speak to our support for this. Thanks.

[June 30, 2016 at 5:09 pm](#)

When is zerodha implementing GTC? Whats the hurdle stoping zerodha not implementing GTC? Its very beneficial for value investor who is not monitoring stock daily.

[Reply](#)

- o *Karthik Rangappa* says:
[July 1, 2016 at 12:03 pm](#)

There are few exchange regulation which prevent us from doing this.

[Reply](#)

473. *Ajay* says:
[June 30, 2016 at 10:02 am](#)

Hi,

If want to see more than best 5 bids and best 5 asks, then how can i see that???? (for taking positions for a very small time)

[Reply](#)

- o *Karthik Rangappa* says:
[June 30, 2016 at 12:16 pm](#)

You cannot, exchange by default gives you the top 5 bid and ask.

[Reply](#)

- *AnkitShah55* says:
[March 21, 2017 at 10:32 am](#)

Why?

[Reply](#)

- *Karthik Rangappa* says:
[March 21, 2017 at 1:45 pm](#)

As of now that is the norm. However, going forward we may just provide a deeper insight into the orderbook.

[Reply](#)

474. *Elanchezhiyan* says:
[June 24, 2016 at 6:49 pm](#)

By default the bid ask has a depth of 5 only. How to see it more?

[Reply](#)

- *Karthik Rangappa* says:
[June 25, 2016 at 3:44 pm](#)

The orderbook is limited to top 5, unfortunately we cannot access the entire order book.

[Reply](#)

475. *ddas* says:
[June 18, 2016 at 1:41 pm](#)

Hi guys, you are doing a wonderful job. I have read this chapter. I want to know what is the effective difference between Limit order and SL-Market order. Suppose, the LTP of a share is 100 and I want to buy it at 95. I can do that in both ways.

1. I put a limit order at 95.
2. I put a SL-M order with trigger price 95.

In both the cases, when the share come to 95 the order gets executed. So, what is the difference between them?

Thanks in advance.

[Reply](#)

- *Karthik Rangappa* says:
[June 19, 2016 at 12:42 pm](#)

Limit order = When you want to buy/sell a stock at a specific price you opt for a limit order
SL-Market = When you want to set a stoploss and want to sell the stock at market when your SL breaches.

In the first case execution is at 95, in the 2nd its not guaranteed.

[Reply](#)

476.  *Harish Puppala* says:
[June 13, 2016 at 8:25 pm](#)

Hi Team,

Myself Harish and i am new trader with Zerodha, my exp in past 1 month is trading with Zerodha is good in case to Edit / Cancel an order. But the main problem i was facing is, there is no option LTP (Last Transaction Price) in Kite.zerodha.Orderbook, so if a Trader places an order of 10 different stocks he need to check with the existing price in the Left Search Panel always.

The Same option Avg Price & LTP are available side by side in both Holdings and Positions Tab, but it's more useful in Orderbook i suggest.

Please let me know whether this option can be provided or is it possible issue in near future.

Thank you.

Harish – you need to talk to our support for this.

[Reply](#)

477.  *Atul Sagar* says:
[June 2, 2016 at 11:47 am](#)

While filling the order form, you said we could change the exchange from NSE to BSE. But what if the stock is not traded on BSE. Can we still fill BSE? Can a company be listed at more than one exchange?

[Reply](#)

o  *Karthik Rangappa* says:
[June 2, 2016 at 12:40 pm](#)

If the stock is not listed, then it wont show up in the order form. But yes, a company can be listed in more than 1 exchange.

[Reply](#)

478.  *Arun* says:
[May 7, 2016 at 7:22 am](#)

Sir

Many a times I have seen that there are a lot more shares on the sell side on the market depth window but still the share price is going upwards for the day. Why is it so? Isn't it supposed to be the other way round as there are more sellers than buyers?

[Reply](#)

o  *Karthik Rangappa* says:
[May 8, 2016 at 3:34 am](#)

When the price goes up, it does tend to attract more sellers as they get higher prices at which they can offload shares. Also remember, just because there are more sellers it does not mean the price will go down.

[Reply](#)

479.  *ashishchauhan* says:
[April 19, 2016 at 12:49 pm](#)

Hi Karthik

I am a beginner and have recently joined zerodha and came across this varsity. it is a great place to learn. you very well described how to buy a share.

could you please explain the process of selling a share which i already own.?

Thanks in advance.

[Reply](#)

o  *Karthik Rangappa* says:
[April 21, 2016 at 5:46 am](#)

Well, its fairly simple. All you need to do is, on the market watch, highlight the script you want to sell and press F2. When you do this the order form opens up, enter the quantity you wish to sell and press submit. Thats it.

I'd suggest you call the broker's support line to get a better clarity on the procedure.

[Reply](#)

■  *ashishchauhan* says:
[April 22, 2016 at 3:41 am](#)

Thank you. I called zerodha and it was simple.

483.  *sunder* says:
[January 20, 2016 at 12:12 pm](#)

Thank for ur kindness

[Reply](#)

484.  *Prakhar* says:
[December 22, 2015 at 9:56 am](#)

My doubt is regarding intraday after looking at the market dept. Now, there are a few shares that oscillate within a range of 5 paisa, etc. This is almost everyday. In such case, most of the buyers know that least for the day is 0.4 and highest 0.5 or 0.6. In such case, how will the trade happen as everyone will place a buy order of 0.4 and sell order of 0.5. Please explain as I am highly confused over this. Similar is the case with other stocks which oscillate in a range of say 50 paisa.

[Reply](#)

- o  *Karthik Rangappa* says:
[December 23, 2015 at 7:06 am](#)

Minimum tick price is 5 paisa. So price movement will be in multiples of this. Not everyone will do this...if everyone does the same then there would be a circuit freeze. Same applicable for the 50 paisa stock.

[Reply](#)

-  *PADMA PAUL* says:
[February 14, 2018 at 9:43 pm](#)

PLEASE ELABORATE THE TERM CIRCUIT FREEZE.

[Reply](#)

-  *Faisal Mohammed* says:
[February 15, 2018 at 11:41 am](#)

Circuit Freeze(Upper and lower circuit limits) are explained in this chapter

[December 4, 2015 at 7:27 am](#)

can we have a separate module dedicated to just PI ?
it has tons of great features ,which newbies don't even understand .
we try to "GOOGLE" them , but some learning sources are too deep ,while others too shallow &
majority outright misleading (with a paid course offer & constant marketing spams ,attached with them)

i really believe a module PI will help out PI users a lot & maybe reduce some unnecessary traffic to "CALL SUPPORT" as well .

[Reply](#)

- o  *Karthik Rangappa* says:
[December 4, 2015 at 8:28 am](#)

You should check out this webinar on Pi – <https://www.youtube.com/watch?v=Hg5iZzvBV1A>

[Reply](#)

-  *aehsan4004* says:
[December 4, 2015 at 9:50 am](#)

already seen this webinar , like i said basic features are easily understandable .

its features like fibonacci tools , gann fan , tirone level raff regression etc .

just a small segment of how to use them ? either here or on youtube .

if possible.

[Reply](#)

-  *Karthik Rangappa* says:

[December 6, 2015 at 3:43 am](#)

Hi,

Please explain me about spread order. And also Where to use MIS?

[Reply](#)

o *Karthik Rangappa* says:

[November 30, 2015 at 9:35 am](#)

About spread orders – <http://zerodha.com/z-connect/tradezerodha/zerodha-trader-software-version/zt-spread-orders>

Use MIS when you want to square off your order the same day. You get higher leverage when you do this.

[Reply](#)

487. *PR0135* says:

[October 2, 2015 at 7:24 pm](#)

Hi KARTHIK,

I have some of question/doubts-

1) When you try to buy a share (I'm using Pi software) and click on buying share one window gets open and then you have to put some details like Order type-Market,Exchange-NSE,Qty etc. I can see one more option as Validity and you have to choose one option out of two(DAY,IOC) ... what does it mean?

2) What is the difference between Order Type- SL and SL- Market?

3) What is Bracket order,cover order?

4) If I want to do Intra day on equity shares, what is the margin ? Is it proportional to cash present in trading account? Plzz give some info abt whole procedure and how it works 😊

Could you pls guide me as I'm new to this field.

Thanks in advance 😊

[Reply](#)

o *Karthik Rangappa* says:

[October 5, 2015 at 7:27 am](#)

1) Day means your order is valid till 3:30, IOC means your order is valid on \'Immediate or Cancel\' basis. For example suppose you punch in an order to buy 10 share at 120.50 per share...then your order will go through only if there are 10 shares @120.5...otherwise the order will cancel itself.

2) Suggest you read this to understand BO/CO order types <http://zerodha.com/z-connect/tradezerodha/zerodha-trader-software-version/cover-orders-for-higher-leverage>

3) MArgin varies for each stock/index – here is a margin calculator that helps you understand this better – <https://zerodha.com/margin-calculator/SPAN/>

[Reply](#)

488.  *Cris* says:

will there be always a buyer and a seller, for a particular stock?

[Reply](#)

o  *Karthik Rangappa* says:
[September 24, 2015 at 1:09 pm](#)

Yup...as long as there is enough liquidity in the markets.

[Reply](#)

489.  *the_fool_on_the_hill* says:
[August 6, 2015 at 12:07 pm](#)

When I buy or sell a stock or an option as part of a single order but at a staggered rate (that is at several successive ask and bid rates, if I place a market order), will Zerodha charge me for a brokerage only once, or will I be charged for a brokerage for each successful completion at a specific rate? Similarly, when I buy or sell a stock or an option as part of a single limit order and my order is executed at different points of time during the day depending on when the market rate reaches the limit rate, and thus ending up buying or selling at staggered intervals, will Zerodha charge me for brokerage only once considering it was a single order, or will I be charged for each successful completion of the order at the limit rate?

[Reply](#)

o  *Karthik Rangappa* says:
[August 7, 2015 at 6:49 am](#)

Single order, 1 time brokerage charge only. For queries related to Zerodha please do email support@zerodha.com

Can I place a limit order with a market stoploss(and not a fixed stoploss)

[Reply](#)

o  *Karthik Rangappa* says:
[August 6, 2015 at 6:13 am](#)

Yes, this is possible. Just specify a trigger and keep the SL as market.

[Reply](#)

491.  *the_fool_on_the_hill* says:
[August 3, 2015 at 10:56 am](#)

Hello,
 I have several queries regarding placing my first ever option premium buying order.

1. Validity is '\Day\' or '\Immediate or Cancel\''. So how do I place pre-market, post-market or (what I really want) after-market orders?

2. Product \NRML\ and \MIS\. Does it mean that if I choose \NRML\, my option premium is held as long as I do not square it off or till expiry of the premium? Also, does \MIS\ mean that my option premium is squared off (or sold, if I buy a call option) before the end of the day?
3. Order type- \Limit\ is how one makes those bid and ask (bid in case of buying a call option) positions. \Market\ is I am forced to buy at the least \Ask\ rate. \Stoploss\ is when I can set a \trigger\ price for squaring off (how long is this trigger price held? Till the end of the day? Or till I square off the position or till the expiry of the premium on the settlement date?) my buying \Price\.
- \Stoploss-market\ is when I can set a \trigger\ price for an option bought at market price — Is this right? Also, please answer my question about the duration for which the trigger price is valid. Also, can the trigger price of a call buy option be higher than the buying price?
4. In the \Cover\ choice, as opposed to the \Normal\ choice, what do \trigger price range\, \percentage max\ and \trigger price\ mean?

Really looking forward to your replies Karthik, so that I can place my first ever stock trading order. Without Zerodha Varsity, I would never have dared to enter the stock market. Thanks to you, I have opened a Zerodha account and look forward to trading. These four questions seem to be the final hurdle I need to cross before placing my first order.

[Reply](#)

- o  *the_fool_on_the_hill* says:
[August 3, 2015 at 4:10 pm](#)

In continuation of my question.

1. This Z-connect article — <http://zerodha.com/z-connect/queries/stock-and-fo-queries/pre-marketpost-marketafter-market-orders> — is no longer valid for Pi I think, because after 6.30pm, if I press F1, the window which opens does not say \After Market Order\ and is just like a regular buy order form.

[Reply](#)

-  *Karthik Rangappa* says:
[August 4, 2015 at 6:37 am](#)

I would suggest you touch base with Srini – sreenivasulu.m@zerodha.com for queries related to Pi. He will be able to assist you.

[Reply](#)

- o  *Karthik Rangappa* says:
[August 4, 2015 at 6:36 am](#)

Really happy that you are placing your first Options trade! I hope you find all the success. Good luck.

I hope the reply is not coming in late –

- 1) Validity – suggest you keep this to \Day\
- 2) Product – MIS is for intraday trading. Use this only when you want additional margins. If you want to hold positions overnight (maybe till expiry) use NRML. More on this topic here – <http://zerodha.com/varsity/chapter/margin-calculator-part-2/>
- 3) Order type – you are right on all the point mentioned. Trigger price is valid till end of day or till the price itself triggers (which ever comes first). Yes, you can set the trigger price higher than the price at which you have bought.
- 4) Cover order – Check this <http://zerodha.com/z-connect/tradezerodha/zerodha-trader-software-version/cover-orders-for-higher-leverage> you have all info on cover orders here.

You need a mobile trading app to do this. Have you tried Zerodha's mobile platform?

[Reply](#)

495.  *ashi valla* says:
[April 20, 2015 at 3:49 pm](#)

respected karthik sir,
this is a suppose situation.
i noticed the ask price of a share which is in red is increasing downwards..... vice versa
i noticed the bid price of a share which is in blue is decreasing downward
so suppose i bought a share at 50rs.... at that instant the bid price was 49 rs and the ask price was 50rs... so i bought 1share... now the LTP is 50rs r8????????
so with all those TA i knew this day would be a bullish(very much) day...so the price are increasing at a high rate . after 1 hr the LTP rise to 60rs.....and im intrested in selling the stock..... so how am i going to get a price close to 60rs.... if the nature of bid price is decreasing downwards
.....????????????????/

at LPT 50rs i bought one.....when latest bid price is 49 . And ask price is 50
nw LTP is 60rs..... so obviously the ask price too would have rose..and bid price will be again low.....
(dont consider buy strength sell weekness nw)....

.....

i understand ask price is increasing downward to give the best and least price when someone buy a share.....
and bid price is decreasing downwards to give the best price below the LTP.....
please anlayze my dobutst???????regarding that 50rs
share.....

[Reply](#)

- o  *Karthik Rangappa* says:
[April 23, 2015 at 6:32 am](#)

The Ask price is always higher than the bid price...this is a given. Also, Ask price goes in increasing as you traverse downwards...meaning the lowest price on top. So when you buy @ 50, and the market is trending top, so would the price at which people bid and ask...the whole expectations shifts upwards. So if you want to sell at 60 and there is a buyer available, certainly your order goes through.

[Reply](#)

496.  *ashi valla* says:
[April 20, 2015 at 3:30 pm](#)

sir,
suppose....last traded price is 25.00
.....

bid price&quantity	ask price&quantity
24.90(100)	24.95(100)
24.85(100)	25.00(100)
24.75(100)	25.10(100)
24.50(100)	25.25(100)
24.30(100)	25.50(100)

.....

ask price are the price asked by seller. The sellers will sell the share at a price which he thinks is fare.
so suppose if i bought 1share at the rate 25.00 from some seller.and i want to earn 10paisa by selling

that 1share at 25.10(neglect other charges).

so what should i do? i have to wait till the 1st bid price turns to 25.10....?????????

for the time sake we are not considering any technical analysis.... just focusing strictly on market depth chart or dialouge box.....

acc to the table there are 100shares selling at 25.10.....

what happens when i click F2 and fill the selling form at 25.10 and at MIS?????????????????

will my one share be joining among the above table making,

.....
bid price&quantity ask price&quantity

24.90(100) 24.95(100)

24.85(100) 25.00(100)

24.75(100) 25.10(101)

24.50(100) 25.25(100)

24.30(100) 25.50(100)
.....

[Reply](#)

- o  *Karthik Rangappa* says:
[April 23, 2015 at 6:25 am](#)

Phew! that was a long msg 😊

Yes, when you want to buy you look at ask price and when you want to sell you look at bid price. When you buy at 25, you can sell at 25.1 provided there is someone willing to buy the same from you. In other words the bid price should turn 25.1. Alternatively you can submit the bid yourself by placing an order to sell at 25.1. Please note you can do this by placing a \'Limit\' order.

When you press F1 to buy, the order form pre-populates itself with the ask price...likewise when you press F2, the order form pre-populates itself with the sell price aka the bid price.

[Reply](#)

497.  *Ashish Arora* says:
[March 31, 2015 at 12:30 pm](#)

Mr Karthik,
appreciate your effort for retail investor education. I have question regarding volume.

Volume shows Total number of shares Traded on a particular day (Long+Short positions). so Is there any way to know the number of Long positions and short positions separately during trading hours.

[Reply](#)

- o  *Karthik Rangappa* says:
[April 1, 2015 at 3:00 am](#)

In fact this is not possible. However we can only associate and arrive at few conclusions – a price increase with increase in volumes and a volume built up on long positions. Likewise a decline in price with increase in volume as volume built up on short positions.

[Reply](#)

[Reply](#)

499.  *Priyanka* says:
[March 24, 2015 at 3:16 pm](#)

I have two questions here-Why we use stop loss order when we know it will incur loss and not profit?
what is the difference between stop loss order and stop order?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 25, 2015 at 4:37 am](#)

Well, if you know the trade incurs a loss, why trade in the first place 😊

Remember there is nothing called as '\`certainty\`' in markets. Whenever we place a trade there is a chance that it could result in a loss. In order to minimize the loss we need to place a stop loss.

Also, both stop loss order and stop order are same.

[Reply](#)

500.  *RAHUL* says:
[March 16, 2015 at 6:41 am](#)

Hi Karthik, can we execute a Short trade online?
(i) If yes then which kind of order (name/type) should we use?
(ii) if not, then what is the method and the associated constraints?

[Reply](#)

- o  *Karthik Rangappa* says:
[March 17, 2015 at 4:21 am](#)

Of course you can execute a short trade online. All you need to do is press F2 on your trading terminal, it will invoke a sell order form. Fill up the quantity and price (for a limit order)...and press enter....you would have created a short position. Whenever you wish to buy back, press F1

(buy order form pops up) and you could square off your short position. Also, I would suggest you read this chapter about shorting – <http://zerodha.com/varsity/chapter/shorting/>

[February 27, 2015 at 6:01 am](#)

Karthik,

The "Admin Position" "F11" is present but the holding equity symbols or MOM values is not getting populated in my terminal.

I have checked with some of my friends too they too said same thing. And many of the options in the terminal is either not user friendly or not working as expected. 😞. Please do needful.

[Reply](#)

- Hanan Delvi says:

[February 27, 2015 at 7:13 am](#)

You won't be able to see your overnight Equity holdings on Admin positions – you have to use the Holdings option for this. To check holdings you can go to Surveillance > Holdings > View Holdings

You can only see intraday positions and F&O on Admin positions.

If you'd like to see the MTM values of your EQ symbols, the best place to do this is on Q as it shows you the buy price and the current closing price.

[Reply](#)

- Ram says:

[February 27, 2015 at 10:18 am](#)

Am using NEST 3.11.2 version, for me this option is unavailable, i can see only RMS cash in this link.

Please advice.

[Reply](#)

- Karthik Rangappa says:

[February 27, 2015 at 2:43 pm](#)

In the above discussed query & reply segment, there are many time comes a term that is '\target price\' . Is this different from '\trigger price\' as discussed in the chapter in stop loss order type ? Another term came, '\illiquid scrip'. What does this mean ?

[Reply](#)

o  *Karthik Rangappa* says:
[February 12, 2015 at 3:25 pm](#)

Target Price = This is the price at which you want to book profits. For example if you buy a stock at 100 with a hope to sell it at 110 and pocket Rs.10 as profits, the 110 is the target price

Trigger Price = This is the price associated with stop loss, we will be talking about it shortly.

Illiquid scrip = Stock counters where trading activity is very low is called illiquid scrip.

In the SL type of order, suppose a stock is trading at 346.80 & I put a limit order for 346.60. In the same time, can I put it in SL for 343 with a TRIGGER price of 344. And also can I put a limit sale order for 347.50 ? In intraday transactions, is the settlement done in same day ?

[Reply](#)

o  *Karthik Rangappa* says:
[January 21, 2015 at 10:37 am](#)

For such cases where you would like to specify the stop loss and target at the time on initiating the trade, then I would suggest you use a bracket order. Please read through this blogpost to understand more about placing the Bracket Order – <http://zerodha.com/z-connect/tradezerodha/zerodha-trader-software-version/bracket-orders-trailing-stoploss-sl>

[Reply](#)

507.  *ANANT* says:

[December 29, 2014 at 10:16 am](#)

Hello,

My question is about Bracket Order(BO).

In BO stoploss is must as 1 point (1 absolute) . Is it same for target? I mean target is also must be 1 point? If I want 0.50 paisa profit with 1 rs. Stoploss can I use bracket order?

[Reply](#)

- o *Karthik Rangappa* says:
[December 29, 2014 at 11:02 am](#)

Not really, in BO only the SL is mandated. The target can be anything of your choice.

When I am trading in CNC mode. When I place a SL-M order to buy a share. Do I need to change my Trigger price each day till it gets executed. If so how to do that. I am trading in Z5 html web version .please do mail me.

[Reply](#)

- o *Hanan Delvi* says:
[December 5, 2014 at 5:43 am](#)

Zerodha trader doesn't have an option to keep your orders open beyond the order placement day because of regulations. MCX exchange allows this by means of a GTC (good till cancel) or GTD (good till date) order. So in your specific case, you would need to place your SL-M order everyday till your price is hit.

[Reply](#)

- *rukmani* says:
[November 24, 2015 at 8:36 pm](#)

Can someone plz explain GTC and GTC or share the link where its already explained....

[Reply](#)

- *Karthik Rangappa* says:
[November 25, 2015 at 11:38 am](#)

GTC is 'Good till Canceled' order type. Suppose the current market price of a stock is 100 and you want to buy it at 95, then you can place a limit order to buy it at 95, this order will stay in the system till it gets fulfilled or it gets cancelled.

[Reply](#)

510. *prakashbabu* says:
[December 1, 2014 at 5:05 am](#)

Can I commence my trading as soon as I sell my shares in cnc mode or do I need to wait till my amount is updated

[Reply](#)

- o  *Karthik Rangappa* says:
[December 2, 2014 at 5:17 am](#)

You will have to wait till the funds hit your account, which would happen by end of day.

[Reply](#)

511.  *prakashbabu* says:
[November 24, 2014 at 10:51 am](#)

Today I bought 50 shares of REC Ltd @ 349.40 with trigger price 342.50 in MIS . REC today closed at 341 . Today my stoploss triggered . Since there was a powercut I couldn't square off. . My question is should I need to square off as soon as my stoploss triggered . Even if I didn't square off my position Since my Trigger price is 342.50 my loss would be upto that level. If I didn't square off after my Stoploss triggers is there chance for me losing money beyond my Stoploss. Pls reply.

[Reply](#)

- o  *Hanan Delvi* says:
[November 25, 2014 at 2:01 pm](#)

Well, there's never a chance that you would lose much more than your SL price, unless you've put a SL-M order on an illiquid scrip.

I think there's a small misunderstanding on your part about how stop loss orders work. You do not need to place an order after your trigger has been hit. The trigger itself is the order because as soon as the trigger is hit the order is sent through to the exchange.

[Reply](#)

512.  *prakashbabu* says:
[November 24, 2014 at 5:50 am](#)

Today in MIS I bought shares when it was trading @ 349.80 . I bought for 349.40 . Though I opted for SL-M. when I closed my position and saw in my order book it showed me limit order and trigger which I quoted as 342.50. What will happen for my trade.

[Reply](#)

- o  *Hanan Delvi* says:
[November 24, 2014 at 6:41 am](#)

Prakash, I don't seem to understand your query accurately. I know that you entered the position at 349.40. Now is your SL-M order open or do you wish to place it? It seems to me you've entered and closed your position and you also have a SL-M order open.

[Reply](#)

513.  *prakashbabu* says:
[November 22, 2014 at 4:10 pm](#)

In CNC mode if a stock is trading at 100 and want to buy @ 95 . If I place a limit order as soon as it reaches 95 my limit buy order gets executed. Else will it still survive or my limit buy order automatically gets cancelled.

[Reply](#)

- o  *Karthik Rangappa* says:

[November 23, 2014 at 3:00 am](#)

The limit order will stay valid till the end of the current market session. After market closes, the order is cancelled. You will have to place a fresh order the next day.

[Reply](#)

514. *prakashbabu* says:

[November 22, 2014 at 11:58 am](#)

Pls clarify, if suppose a stock is trading @100(CNC). I place a limit order to buy @ 95 . If it touches 95 , well n good I get some shares in my dmat. account. After that I place a limit sell order for 115 . Also if it touches 115 only my limit sell order will get executed. I get shares at 115. If it doesn't then I have to place another SL-M order to prevent any loss. Which I don't want Or after buying@ 95 I place SL-M order sell order with stoploss 90 . My question is if my limit buy order is executed @ 115 what is the need to place another SL-M order . Is it right that only after one order gets executed we should place another order.so only if my limit sell order gets executed. I shall place any order. How to go about this procedure.

[Reply](#)

515. *prakashbabu* says:

[November 22, 2014 at 4:01 am](#)

If suppose a stock is trading at 100 (in CNC). I want to buy at 95 . If I am trading in limit order, once stock reaches 95 , my limit order is executed. I think there is no question of putting a stoploss. After that in same way I want to sell the stock at 105 . Same way I am putting a limit buy order and as soon as it reaches 105 My limit sell order is executed. But now after that to be on safer side I have to place another SL-M order with trigger price of 100. My doubt is whether after buying at 105 with limit order I should place a SL-M order or simultaneously I can place a SL-M order when my limit buy order is not yet executed.

[Reply](#)

o *Hanan Delvi* says:

[November 22, 2014 at 10:13 am](#)

If your limit buy order is not yet executed, you can still place a SL-M order if you wish to. However, this would require you to maintain additional margin because you would have two open orders. You will need to pay only one side margin if you place your Target and SL-M orders after your Limit order has been executed.

Do I need to provide topless and trigger price when I trade in MIS and is it important to square off my position afterwards

[Reply](#)

o  *Hanan Delvi* says:
[November 20, 2014 at 10:13 am](#)

Whenever you trade in MIS, you get additional leverage than what is normally provided which means that your positions cannot be carried forward to the next day. It would be nice for you to have a stoploss and/or target to avoid missing out, but it's not necessary because all MIS positions will be squared off end of day.

[Reply](#)

519.  *Aravind* says:
[November 14, 2014 at 4:52 pm](#)

When is the payment to be made? Is it after the trade or when I place the order?

[Reply](#)

- o  *Karthik Rangappa* says:
[November 15, 2014 at 8:26 am](#)

For the order to go through there has to be sufficient funds, so in a sense you need the funds before your trade can go through.

i know full service broker like reliance securities get leverage delivery position upto 50 percent.. if i have 50k then i can buy 1 lakh share..upto till 5 days and then it will be cut of automatically or i can sell them or syestem sell them ,, so my question is why discount broker not get this advantage?

-  *Karthik Rangappa* says:
[February 4, 2018 at 8:46 am](#)

Ah yes, this is T+5 settlement. Its been on our list of things to do. Hopefully sometime soon.

520.  *Tukka Guru* says:
[November 13, 2014 at 2:37 pm](#)

Can you please expand the acronyms? What is CNC, MIS or NRML? Do other brokers also use these terms? I came to zerodha after using ICICIDIRECT and feel confused

[Reply](#)

- o  *Karthik Rangappa* says:
[November 13, 2014 at 3:23 pm](#)

CNC = Cash and Carry. We use this order type when dealing with delivery trades.

MIS = Margin order, used when the trader intends to do an intra day trade. Higher leverage is provided/

NRML = Normal margin order, used when we want to carry forward a derivative trade

BO = Bracket Order (Intra day order type), trader has to specify his target and stop loss price

CO = Cover Order (Intra day order type), trader has to specify stop loss price

All Intra day orders needs to be squared off by 3:20 PM.

Almost all brokers provide these order types, however the naming convention may vary a bit.
I'm sure you will get used to it soon 😊

I have bought shares in CNC form . I wanted to hold but but the shares were automatically sold out. I didn't understood the trading pattern..

- *Karthik Rangappa* says:

[August 6, 2018 at 11:15 am](#)

If you have bought in CNC then the shares will sit in your DEMAT.

- *manish mehta* says:

[November 5, 2018 at 3:34 pm](#)

what does leverage means sir

[Reply](#)

-  *Karthik Rangappa* says:
[November 5, 2018 at 7:00 pm](#)

Leverage in this context means the additional purchasing power your capital gets. For example, if you have Rs.10K in your trading account, then with 1-time leverage, you can buy for 20K.

[Reply](#)

521.  *Surya* says:
[November 8, 2014 at 6:45 pm](#)

Suppose we decide the product type to be CNC while placing a bid and the trade gets executed. Can we sell the share during the same day if we want to?

[Reply](#)

-  *Karthik Rangappa* says:
[November 9, 2014 at 3:25 am](#)

Yes, you can do that.

[Reply](#)

-  *Palash* says:
[December 2, 2015 at 4:51 am](#)

So what will be the rate of brokerage if I buy some stock using CNC and sell it the same day.

Will the rate for delivery be applicable or for intraday?

[Reply](#)

-  *Karthik Rangappa* says:
[December 2, 2015 at 7:56 am](#)

Depends on the broker.

At Zerodha you will be charged Rs.20 or 0.01% of turnover, whichever is lesser. However if you carry forward this trade, then no brokerage is charged! Check this – <http://zerodha.com/z-connect/zerodha/bulletin-latest-at-zerodha/zerodha-going-zero-brokerage>

[Reply](#)

-  *Ankit* says:
[October 31, 2016 at 7:23 pm](#)

Yes you can buy and sell any share in a single day through CNC order. but you can not short sell through CNC,

[Reply](#)

-  *Karthik Rangappa* says:
[November 1, 2016 at 11:24 am](#)

Spot market short sell is only on an intraday basis.

[Reply](#)■ *kunal* says:[September 18, 2017 at 6:50 pm](#)

but ive heard that u can short sell your shares even for years

[Reply](#)■ *Karthik Rangappa* says:[September 19, 2017 at 11:19 am](#)

Not true.

■ *kunal* says:[September 19, 2017 at 9:14 pm](#)

but in the story of radha kishan when harshad mehta manipulated the market and when he got to know that ,he bought the shares at 9k and held them for years isnt that true????

■ *Karthik Rangappa* says:[September 20, 2017 at 12:02 pm](#)

I've not heard this story. However, you cannot short a stock and keep the position for multiple years. You can short a stock in the spot market but have to close the position by 3:20....and if you short the position in futures, you can hold it for upto 3 months.

○ *Sathya* says:[February 26, 2019 at 3:19 pm](#)

CNC aka Cash and carry is delivery based. Meaning T + 2 Days for the stock to be in the record of the DEMAT. One cannot sell a stock which is not in the DEMAT by CNC. CNC is not intraday trade, it is for taking delivery of the stock and keeping it in ones DEMAT and sell it in future. So if you buy a stock Today, you cannot sell the same stock today itself.

[Reply](#)■ *Santosh* says:[May 4, 2019 at 11:29 am](#)

Hi Sathya,

We can sell the shares in CNC on same day if we have purchased the shares on same day. Then on what basis you are saying that we cannot sell CNC on same day???

Rgds,
Santosh.

[Reply](#)■ *Karthik Rangappa* says:[May 5, 2019 at 8:50 am](#)

Yeah, we can do intraday even when we choose CNC as the product type. You will be charged an intraday brokerage here.

[Reply](#)
