15. 15 [Indicators \(Part 2\)](#)
16. 16 [The Fibonacci Retracements](#)
17. 17 [The Dow Theory \(Part 1\)](#)
18. 18 [The Dow Theory \(Part 2\)](#)
19. 19 [The Finale – Helping you get started](#)
20. 20 [Other indicators](#)
21. 21 [Interesting features on TradingView](#)
22. 22 [The Central Pivot Range](#)

1. Background

[Chapters](#) [Next →](#)

1.1 – Overview

The previous module on the Basics of the stock market set us on a great starting point. Taking cues from the previous module, we know that developing a well-researched point of view is critical for success in the stock market. A good point of view should have a directional view and should also include information such as:

1. Price at which one should buy or sell stocks
2. Expected Risk
3. Expected reward
4. Expected holding period

Technical Analysis (also abbreviated as TA) is a popular technique that allows you to do just that. It helps you develop a point of view on a particular stock or index and helps you define the trade in terms of entry price, exit price, and risk.

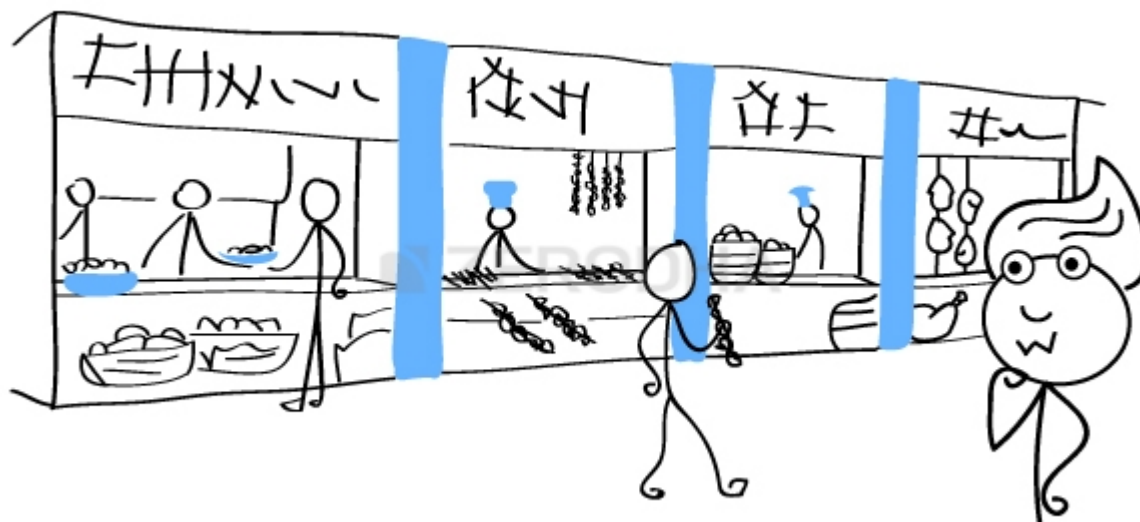

Like all stock market research techniques, Technical Analysis also comes with a few associated conditions and assumptions, some of which can be highly complex. However, technology makes it easy to understand and execute trades based on TA. We will discover these conditions as we proceed along with this module.

1.2 – Technical Analysis, what is it?

Consider this analogy.

Imagine you are vacationing in a foreign country where everything, including the language, culture, weather, and food, is new to you. On day 1, you do the regular touristy activities, and by evening you are starving and craving food. You want to end your day by having a great dinner. You ask around for a good restaurant, and you are told about a vibrant food street close by. You decide to give it a try.

To your surprise, the food street has 100s of vendors selling different varieties of food. Everything looks different and interesting. You are clueless as to what to eat for dinner. To add to your dilemma, you cannot ask around as you do not know the local language. So given all this, how will you decide on what to eat?

Well, you have two options to figure out what to eat.

Option 1: You visit a vendor and figure out what they are cooking. Check on the ingredients used, figure out the cooking style, taste a bit, and determine if you like the food. You repeat this exercise across a few vendors, after which you would most likely eat at a place that satisfies you the most.

The advantage of this technique is that you know exactly what you are eating since you have researched it independently. However, on the flip side, the methodology you adopted is not scalable. There could be about 100-odd vendors, and with limited time at your disposal, you can probably cover about 4 or 5 vendors. Hence there is a high probability of missing out on the best-tasting food on the street!

Option 2: You stand in a corner and observe all the vendors. You try and find a vendor who is attracting the maximum crowd. Once you find such a vendor, you make a simple assumption - 'The vendor is attracting so many customers, which means they must be making the best food!' Based on that assumption and the crowd's preference, you decide to go to that particular vendor for dinner. The chances are that you could be eating the best-tasting food available on the street.

The advantage of this method is its scalability. You need to spot the vendor with the maximum number of customers and bet that it is good based on the crowd's preference. However, on the flip side, the crowd need

not always be right.

In the world of stock markets, option 1 is very similar to Fundamental Analysis, where you research a few companies thoroughly. We will explore the Fundamental Analysis in greater detail in the next module.

Option 2 is similar to Technical Analysis, where one scans for opportunities based on the current trend, aka the market's preference.

Technical Analysis is a research technique to identify trading opportunities in the market based on market participants' actions. The actions of market participants can be visualized in stock charts. Over time, patterns form in these charts, and each pattern conveys a certain message. The job of a technical analyst is to identify these patterns and develop a point of view.

Like any research technique, technical analysis stands on a bunch of assumptions. As a technical analysis practitioner, you must trade the markets, keeping these assumptions in perspective. Of course, we will understand these assumptions in detail as we proceed along.

Also, at this point, it makes sense to throw some light on a matter concerning FA and TA. Often, people argue that a particular research technique is a better approach to the market. However, there is no such thing as the best research approach. Every research method has its own merits and demerits. It would be futile to compare TA and FA to figure out a better approach.

Both techniques are different and not comparable. A prudent trader would educate on both techniques to identify great trading or investing opportunities.

1.3 – Setting expectations

Market participants often approach technical analysis as a quick and easy way to profit. On the contrary, technical analysis is anything but quick and easy. If done right, consistently generating profits is possible, but to get to that stage, one must put in the required effort to learn the technique.

A trading catastrophe is bound to happen if you approach TA as a quick and easy way to make money in markets. When a trading debacle happens, more often than not, the blame is on technical analysis and not on the trader's inability to efficiently apply Technical Analysis. Hence before you start delving deeper into technical analysis, it is important to set expectations on what can and cannot be achieved with technical analysis.

- a. **Trades** – TA is best used to identify short-term trades. Do not use TA to identify long-term investment opportunities. Long-term investment opportunities are best identified using fundamental analysis. Also, If you are a fundamental analyst, use TA to calibrate the entry and exit points.
- b. **Return per trade** – TA-based trades are usually short-term in nature. Do not expect huge returns within a short duration of time. The right way to use TA is to identify frequent short-term trading opportunities that can give you small but consistent profits.
- c. **Holding Period** – Trades based on technical analysis can last between a few minutes to a few weeks, usually not beyond that. We will explore this aspect when we discuss the topic of timeframes.
- d. **Risk** – Often, traders initiate a trade for a certain reason; however, in case of an adverse movement in the stock, the trade starts to lose money. Usually, in such situations, traders hold on to their loss-making trade with the hope they can recover the loss. Remember, TA-based trades are short-term; if the trade goes bad, do remember to cut the losses and move on to identify the next opportunity.

Key takeaways from this chapter

1. Technical Analysis is a popular method to develop a point of view on markets. Besides, TA also helps in identifying entry and exit points.

2. Technical Analysis visualizes the actions of market participants in the form of stock charts.
3. Patterns are formed within the charts, and these patterns help a trader identify trading opportunities.
4. TA works best when we keep a few core assumptions in perspective.
5. TA is used best to identify short terms trades.

When will you post smc and ict

[Reply](#)

2. *Bryan muirhead* says:

[September 25, 2025 at 9:53 am](#)

Hello

Can this work for intra day trading

[Reply](#)

- o *Karthik Rangappa* says:

[September 29, 2025 at 9:53 am](#)

Yeah, the patterns remain the same, its just that the timelines shrink.

[Reply](#)

- *samyak jain* says:

[October 17, 2025 at 1:25 pm](#)

hello kartik how can i connect with you?

[Reply](#)

- *Karthik Rangappa* says:

[October 19, 2025 at 7:11 pm](#)

Here, this is the best place 😊

[Reply](#)

3. *Ayush* says:

[August 8, 2025 at 5:03 pm](#)

I am currently 16 and I am interested the learning about trading Can u guide me about how much time should I give towards learning what and When can i start doing trades.

It will be also great if you can tell me whether actually there is scope in india to become a good trader.

[Reply](#)

- o *Karthik Rangappa* says:

[August 9, 2025 at 9:49 am](#)

Ayush, how much time depends on multiple factors, and I cant really give or help you with scheduling. However, its good you started early, pick up things that will help you shape your long term thinking in markets. Learn FA, learn about MF investments and get comfortable making long term bets. Once you do that you can figure ways to trade, but right now, dont priorities trading 😊

[Reply](#)

-  *Ayush* says:
[August 10, 2025 at 2:17 pm](#)

Thx ❤️

[Reply](#)

-  *Karthik Rangappa* says:
[August 11, 2025 at 10:10 am](#)

Happy learning!

[Reply](#)

-  *Ayush* says:
[August 10, 2025 at 2:25 pm](#)

I am honestly not interested in long holding like investment but I am thinking I can start from long trading like days and weeks before I hop on intraday. Is it fine?

[Reply](#)

-  *Karthik Rangappa* says:
[August 11, 2025 at 10:12 am](#)

Sure, you can do that. There is a saying in the trading world – if you cant hold your positions long term, you will never develop the conviction to hold short term.

Hence its important to develop that mind set 😊

[Reply](#)

4.  *Nabin Ale* says:
[July 14, 2025 at 9:56 pm](#)

I lost 3 times in a row. what should I do now? whenever I buy , market goes down. I mean I try to hide the emotions , and also do analysis but at the end market always fucked me . sorry for the vulnerability, but it is what it is .

[Reply](#)

-  *Karthik Rangappa* says:
[July 15, 2025 at 9:23 am](#)

It takes years to master this, so 3 times is not a number that should worry you. That said, here is what I'd suggest –

- 1) Try and avoid trading in this state of mind all together.
- 2) Scale down, trade with much lesser capital than you have.

3) Whenever you decide to trade, pause for a second and ask yourself what can go wrong with this trade, and how can you protect yourself from that loss.

Hopefully this should help overcome this phase.

[April 14, 2025 at 6:29 pm](#)

Karthik sir,

(1) I'm curious to know what are the new modules you will publish in times to come? Please name some.

(2) When can we buy US stocks from Zerodha?

[Reply](#)

- o  *Karthik Rangappa* says:
[April 15, 2025 at 1:24 pm](#)

- 1) Most of the new stuff is coming on videos, so please watch our Youtube channel.
- 2) Not sure, no clarity on this yet.

[Reply](#)

-  *Prinkesh* says:
[April 15, 2025 at 10:02 pm](#)

Yes sir, but you are not uploading videos consistently, there are others but nobody can match your way of teaching. Effortless.

[Reply](#)

-  *Karthik Rangappa* says:
[April 16, 2025 at 11:16 am](#)

Ah, we upload two videos every week. Thanks for the compliments, but others are good as well 😊

[Reply](#)

-  *Prinkesh* says:
[April 17, 2025 at 4:25 pm](#)

Sir,

(1) What is market making?

(2) How do firms earn from market making?

-  *Satya Sontanam* says:
[April 18, 2025 at 2:37 pm](#)

Imagine a situation where you want to buy 100 units of Gold ETF, but there are no sellers? That means the transaction cant go through right? Which is not a good thing for the AMC creating these ETFs because they lose business. Hence, to avoid this, they empanel 'market makers', whose job is to ensure they always 'fill orders', placed on the exchange. In this example, if you place – buy 100 units of gold ETFs, they will play the role of a seller and fill your order. Now it is their responsibility to ensure the 100 sell is hedged with 100 buy, to ensure there is no loss on the deal.

They make money via spreads and maybe (I'm not sure) through a fee by AMCs. If AMCs are paying, then it wont be much.

7.  *Prinkesh* says:
[April 10, 2025 at 11:22 am](#)

Karthik sir, your webinar with Nikhil (2017) was great. Now we need part 2 with Nikhil. His thoughts are soul nourishing. Do it ASAP.

[Reply](#)

-  *Karthik Rangappa* says:
[April 10, 2025 at 1:27 pm](#)

Thanks! But I think there is enough and more out there with Nikhil that you can watch 😊

[Reply](#)

Kartik sir

Are VWAP and Average Traded Price (ATP) the same thing?

[Reply](#)

- o  *Karthik Rangappa* says:
[June 23, 2023 at 9:34 am](#)

Yeah, pretty much the same.

[Reply](#)

46.  *Rahul* says:
[June 21, 2023 at 3:19 pm](#)

Kartik sir

I researched on Google and YouTube many times but couldn't figure out that how the nifty index opening is so closed to sgx nifty? What's the logic behind the opening of nifty 50 index as same as SGX nifty. Please explain me this in a bit detail sir

[Reply](#)

- o  *Karthik Rangappa* says:

[June 22, 2023 at 9:56 am](#)

Hmm, so start from the previous day's close. After market closes at 3:30, the news flow continues. Sometime it can be bad, sometime it can be positive, sometimes it stays flat. Based on the news the market sentiment changes. The same sentiment is carried to SGX and gets translated to a price behavior. This is largely in line with what behavior traders in Nifty would exhibit. So when Nifty opens, the price is in sync with SGX.

[July 30, 2021 at 2:52 pm](#)

Good luck, Abhigya!

[Reply](#)

88. *Abhigya Kushwah* says:
[July 29, 2021 at 7:08 pm](#)

Dear Karthik,

When i started stock market in April, I started by playing intraday without any knowledge and may be I was also not keen to know about in-depth knowledge. But When I suffered losses, It gave me inspiration to read, learn and gain knowledge and then only start working on stock market instead of playing. The lossess gave me inspiration to learn about stock market and as I mentioned previously, Varsity has helped me to learn every bit of it. I have been reading and executing the swing trades and also made some small investments all this while and I fees I am doing fine with profits in almost all my trades, following the checklist provided by you. But I did not want to enter Intraday and F&O till I have bit of command on my TA and also gain further knowledge. But I don't know how to practice. I have been opening the charts, studying them, finding the candlestick patterns. I also came to know that there is something called as \"Chart Patterns\" which I was finding in Varsity, but could not find them.

In many videos on Youtube, it is suggested to do paper trading and practice. But no where we are informed how to practice and where and how to do paper trading.

Today I thought of doing intraday. I placed a short trade in SBI around 1:30 pm on seeing the price at resistance level and also the downward movement of the market including the indication by RSI and MACD and impatiently, I placed the short trade on seeing the gravestone doji with SL as its high but very soon SL was hit. Then I analyzed my trade. The trend since morning was up and I ignored the trend. I placed the short trade at 436.70 with SL of 438.70. Suddenly market moved up and it closed somewhere around 443. Thanks to your guidance of always placing the trade with SL.

Now I have two queries:

1. Is something extra also to be looked into while doing the Intraday trading apart from the patterns?
2. The checklist that you have provided, does it also have to be looked into for intraday and F&O?
3. How imp is the trend for intraday?
4. What duration of trend should be looked at for intraday?
5. As I stated, all suggest for paper trading and practice. Even you have suggested that we should practice more and more. But how to practice intraday?
6. What is paper trading and how and where to do it?

[Reply](#)

- o  *Karthik Rangappa* says:
[July 29, 2021 at 8:48 pm](#)

I'm happy to note that you are progressing well, Abhigya. I hope your profits continue and get better over time.

- 1) You can start with patterns, but over time, as you gain more quality experience in the market, you will get an intuitive sense of trading.
- 2) Yes
- 3) Very important. No point going against the trend on an intraday basis
- 4) You can look at EOD charts for at least 5-8 sessions and then intraday charts (say 15mins) for 2-3 days
- 5) What you did with SBI is much better than paper trading. Keep trading 5 or 10 shares for as long as you can, or at least till you gain confidence. Once you do, ramp up the volume. But don't get tempted in between and trade large quantities, this is a common mistake most ppl do 😊
- 6) Refer above reply

Good luck.

[Reply](#)

[May 12, 2021 at 1:08 pm](#)

Hi,
the stock market content is really awesome , but i hav one doubt why do we hav to buy on strngth and sell on weakness? we are buying the share with the expectation of price would increase, then only we can make profit by selling it . so is it contadictory to your saying ? pls clarify

[Reply](#)

- o  *Karthik Rangappa* says:
[May 12, 2021 at 8:28 pm](#)

The idea here is to ride the momentum and not go against it. So if a stock is going up, we buy (we buy when there is strength) and likewise with sell.

[Reply](#)

Hey Karthik,

I have been toying with an idea about TA in my head for a while and would love to know your thoughts.

I think TA works only because people believe it works. If enough people believe in the existence of TA concepts and buy/sell on those signals then those signals will indeed influence the underlying. A self fulfilling prophecy.

[Reply](#)

- o *Karthik Rangappa* says:
[April 21, 2021 at 9:46 pm](#)

I'd not dispute that 😊

[Reply](#)

113. *Krishna Khanna* says:

Sir can you explain this. I came in kite today while trading.

\”You are trying to buy back a stock that you have sold today. If you have used the sale proceeds for any other trade today, this can result in a peak margin penalty. \”

I bought 200 share of pnb yesterday. sold them today. again shorted them today and bought them back. When i am trying to go long it is showing this error.

Please help.

Ty

[Reply](#)

o *Karthik Rangappa* says:

[March 31, 2021 at 9:29 pm](#)

This is not an error msg, this is a warning informing you that a peak margin penalty will be applicable. Check this – <https://zerodha.com/z-connect/zerodha/bulletin-latest-at-zerodha/peak-margin-intraday-leverages-2nd-order-effects-dec-1st-2020>

[Reply](#)

[March 31, 2021 at 8:11 am](#)

Hello sir,

Hope you are in your good health. I have some doubts.

- 1.) can 1 day candle be considered for swing trading ?
- 2.) you said in finale reading that you look for 2-3 candles, if I am seeing 1 day candles should I do the same , seeing 2-3 days candles (for swing trading) ?
- 3.) If candlestick have pattern and vol is little less should I go forward with checking other things ?
- 4.) current vol: 4.17 avg 10 day vol 4.83 . should it be considered ?
- 5.) current vol: 4.1 avg 10 day vol 5 . should it be considered ?
- 6.) open =424 high 436.3 close 434.55 low 422.24. can it be considered bullish marzbou ?
- 7.) ohlc = 1004 , 1004, 978.95, 975 . can it be considered bearish marzbou ?
- 8.) if last 3rd candle shows sell should it be considered ?

I have been stuck in these a lot. Any help would be appreciated.

Thanks in advance.

- o  *Karthik Rangappa* says:
[October 13, 2020 at 8:05 pm](#)

Noted 😊

[Reply](#)

138.  *Janesh* says:
[October 11, 2020 at 9:33 am](#)

Dear Karthik,
As NSE website states that

“The higher the Percent of Deliverable Quantity to Traded Quantity the better – it indicates that most buyers are expecting the price of the share to go up.”

Wipro 375.25 INR +15.80 (+4.40%)

But as of 9- October -2020 Wipro price upside but on % of Deliverable Quantity to Traded Quantity is only 14.85 %

The 14.85 % shows less buying interest & trader exited before 3:30 PM, i am little confuse here that why it went up with so less delivery percent??

[Reply](#)

- o  *Karthik Rangappa* says:
[October 11, 2020 at 9:43 am](#)

I would not agree with that. Even if I intend to do BTST, the % deliver will increase, does not mean the stock price will go up.

[Reply](#)

139.  *Janesh Suthar* says:
[October 9, 2020 at 2:55 pm](#)

Karthik/Nithin,

We all know that delivery based stocks move the price.
& Does intraday trading moves the stock price?

[Reply](#)

- o  *Karthik Rangappa* says:
[October 9, 2020 at 9:09 pm](#)

Moves on a intraday basis 😊

[Reply](#)

140.  *Anuj* says:
[September 30, 2020 at 11:36 pm](#)

Firstly, I would say that you have done a great job here making all the content open-source and I really thank you for all your efforts. I can understand how much effort might have gone into it. And one suggestion as a user, can you have login service as you have in the mobile app? That way we can read and appear on test directly from the website. And also I have seen that some contents are updated in the mobile app but not on the website. Thank you.

[Reply](#)

- o  *Karthik Rangappa* says:
[October 1, 2020 at 10:14 am](#)

Thanks for the kind words and suggestion, Anuj. About the login, we deliberately removed the login to ensure there is no restriction on users in any possible way. The content is largely the same on the app and web.

[Reply](#)

141.  *Roli* says:
[September 30, 2020 at 10:58 am](#)

plz recommend a few books to read on technical analysis and candlestick patterns.
thanks.
Zerodha Varsity has most certainly built the best foundation though.
for further deep diving recommendations would be very helpful!!
regards

[Reply](#)

- o  *Karthik Rangappa* says:
[September 30, 2020 at 11:02 am](#)

I'd suggest you look for books from CMT institute.

[July 27, 2020 at 1:31 am](#)

Hi Varsity Team,

Your Content are very Superb, Please convert into Video Format in Hindi Languages so easy to understand and upload on YouTube..Like You are uploading Ticker tape in Hindi and English....Also Create Video in Hindi how to use Kite Application ... Please do the needful ASAP.

[Reply](#)

- o  *Karthik Rangappa* says:
[July 27, 2020 at 9:53 am](#)

Deepak, video content will consume a lot of bandwidth from our end. Will see what best we can do. Thanks.

[Reply](#)

155.  *Selvaganapathy* says:
[June 27, 2020 at 5:40 pm](#)

Hi Sir,

I have started to invest in Stock Market & in Mutual Funds and it's quite interesting. Going through the resource provided by Varsity is Mind boggling. I have started to read book by Benjamin Graham (I hope you too have read it years before) and also following Rachana, Anand & few more.. Believe me i never read books and now started reading for hours. I feel something just pulling me into this. I love to play cricket and would love to train hard but as like many others i buried my dream & passion as i don't see myself moving forward to a better position. I am an IT guy working in xxx firm earning something to survive. I failed with my first chance in cricket and now it's something just pulling my interest into this stock market. I want to learn and practice hard to be good professional. If i fail i can say i have tried atleast. I always tell myself hard work always pay off. I want to fully migrate myself into Stock Market Professional. Any professional learning path/suggestions from you.

Thanks,
Selva

I understood sir/Madam

[Reply](#)

159. *Mani* says:

[June 3, 2020 at 2:25 pm](#)

Hi sir, I'm new to the market and have been picking up some pattern. The stock with higher price (for say: MRF) moves drastically when compared to the stock with lower price (for say: YESBANK). But

in terms of percentage it is more or less similar.

My question is why do these high prices stocks moves drastically, why do we use percentages as the unit of measurement for the price changes.

[Reply](#)

-  *Karthik Rangappa* says:
[June 3, 2020 at 9:53 pm](#)

When you say drastic moves, you mean the absolute Rupee value. This is because the Rupee value of the stock is high. You should use the percentage return instead.

[Reply](#)

160.  *Md Khalil* says:
[May 27, 2020 at 2:02 pm](#)

Hi,

Good morning. I have a suggestion which would help, small traders, who, being working professionals, cannot give time during Market Hours.

The suggestion is, please add BO like order placement facility (all three orders – Buy/ TRG/SL) to the GTT system.

This would help traders as well as ZERODHA to generate more revenue.

Thanks

Md Khalil

[Reply](#)

-  *Karthik Rangappa* says:
[May 27, 2020 at 9:41 pm](#)

It is there in the order placement window only, you can use that.

[Reply](#)

161.  *Amiya* says:
[April 27, 2020 at 7:06 am](#)

I failed in technical analysis. How can i reappear the exam again?

[Reply](#)

-  *Kulsum Khan* says:
[April 27, 2020 at 12:21 pm](#)

Hi Amiya, there are 5 chances given to appear the quiz if you have exhausted all 5 chances we regret to inform you it can't be reset. Alternatively, you can register with a different email ID and appear the quiz.

[April 6, 2020 at 3:50 pm](#)

Thank you team zerodha for varsity content.
language simplicity makes it blissful.
though I want to ask , the content/coverage of topics in \'varsity\' app and site are different?
is there more content on website ?

if yes will the same be covered in the app version soon?

[Reply](#)

- o  *Karthik Rangappa* says:
[April 7, 2020 at 11:28 am](#)

Its the same content, Harshit except for minor changes here are there on the app.

[Reply](#)

166. *Abhijeet* says:

[April 5, 2020 at 8:54 pm](#)

Hello Karthik

This stuff is absolute gold for a novice entering the stock market!

Would it be fine if I skipped to Fundamental Analysis directly or would I be missing on something crucial here ?

Because I have a very hectic day job and wont be checking the stock market every now and then, I will be holding stocks for at least a couple of months if not more. So, is any part of TA necessary for a long term investor ?

[Reply](#)

o *Karthik Rangappa* says:

[April 6, 2020 at 12:14 pm](#)

Yup, you can start with FA directly.

[Reply](#)

167. *Suhas* says:

[April 4, 2020 at 12:39 pm](#)

I have read few chapters and written in very lucid manner. I am familiar with FA and I felt I got some decent foundation on TA as well. I am just wondering is there are any paid course which is explained something similar to this as I found there is still lot more to learn or do you think TA here would suffice to start trading. Please advise?

[Reply](#)

o *Karthik Rangappa* says:

[April 4, 2020 at 1:15 pm](#)

I'm not sure about paid course, Suhas. But I do think that this is a good enough base to start your journey 😊

Good luck!

[Reply](#)

168. *Chetan Mundada* says:

[March 28, 2020 at 9:14 pm](#)

Hi Karthik Sir,

Take a bow for your sincere efforts in bringing out the most comprehensive material for understanding various aspects of stock markets.

I am grateful to you & your team for the resources and knowledge shared to the public at large. I further appreciate your kind gesture for enlightening their financial intellect.

Thanks a lot and keep bringing out more such stuff....

[Reply](#)

o *Karthik Rangappa* says:

[March 29, 2020 at 10:53 am](#)

Hey Chetan, very happy to note that. I hope you continue to find Varsity useful and engaging 😊

[Reply](#)

169.  *abhishek K* says:
[March 21, 2020 at 11:56 pm](#)

Karthik,

I have seen few videos, read few books and took few seminars. Read your complete Technical Analysis chapter. Nothing is as crisp with the ease of understanding as seen here and nothing is as detailed. Please do consider doing few detailed videos on Coursera, Udemy, YouTube etc. and let me know if there exists something like this already. 😊

Gained a lot of knowledge. Trying to implement this stuff while trading but fighting with emotions. One day I believe I will get there. Thank you very much!!

[Reply](#)

o  *Karthik Rangappa* says:
[March 22, 2020 at 5:40 pm](#)

Hey Abhishek, thanks for the kind words! Happy reading 😊

[Reply](#)

I just checked, it seems to be fine, Maneesh.

[Reply](#)

177. Abhishek says:

[August 17, 2019 at 11:55 am](#)

Hi Sir,

There are so many stocks in the market. How to identify which stocks to study (especially low price stocks) for TA/FA ?

[Reply](#)

o Karthik Rangappa says:

[August 18, 2019 at 6:49 pm](#)

Abhishek, you will have to develop your own opportunity universe for this. The opportunity universe is simply a list of stocks you'll track all the time to figure out where the next trading opportunity lies. If you are completely new to markets, I'd suggest you look at the Nifty 50 pack as your opportunity universe. You can build on this over time.

[Reply](#)

178. ritik says:

[July 5, 2019 at 8:13 pm](#)

[Reply](#)

o Karthik Rangappa says:

[July 6, 2019 at 1:20 pm](#)

You can see all the module here – <https://zerodha.com/varsity/>

[Reply](#)

179. Ron says:

[May 29, 2019 at 1:09 pm](#)

Hi Karthik,

I'm sorry to bother you again. As you said you personally like to let your profit run. So, when do you

exit your trade and on what basis. What kind of Trailing stop do you follow ? As you know when the trade is moving in your direction and a slight move against you, panics you and makes you close the trade, just to find out later that the trade again moved in your direction and touch the sky.

So, basically I just want to know how to control one's emotion when you are in a trade which is in your favor and don't panic about the small retracements. (what should I look for to make sure that it's a retracement and not a change of direction).

Also, does it happens to you that you were in a trade which was in profit and you were following your rules of trailing stop (if the trailing stop is too far) and suddenly the trade was in a loss. Do you face this problem often ?

What's an ideal trailing stop ? How and on what basis should I decide my trailing stop to make sure its not too close or too far to be placed ?

Also do you think having a moving average as your trailing stop a good idea ??

Sorry to ask you too many questions and bother you but your feedback and answers have always helped me in my trading and improving my trading style. I have really admired your trading style and would like to be a trader like you one day.

Thank you for all your do and thank you very very much for your time that you give to all of us.

Best regards
Ron

[Reply](#)

- o  *Karthik Rangappa* says:
[May 30, 2019 at 11:52 am](#)

Ron, all the points you've mentioned are valid. I usually have a deep trail. For example, if I have entered a position at say 100, my initial SL will be placed at 95 or say will wait for it to hit 110, and increase the SL to say 98....at 115, I'll move it to 100....so on and so forth. The idea is to trail the SL, lock in small profits and ride on it. This works quite well in stocks which have a good momentum going.

[Reply](#)

-  *Ron* says:
[May 30, 2019 at 6:35 pm](#)

Thank you very much Karthik, appreciated.

[Reply](#)

-  *Karthik Rangappa* says:
[May 31, 2019 at 2:02 pm](#)

Good luck, Ron!

[Reply](#)

180.  *Ron Kalra* says:
[May 28, 2019 at 12:33 pm](#)

Hi Karthik,
Hope you doing well, It's being long time that I have not bothered you with my stupid questions 😊
Here, I'm back with my silly questions

I just want to know if it's a good idea to have Target Profit when I'm trading (may it be Futures, options, or stocks) or is it better to let your profit run.

Also, Does the depends on the timeframe I'm trading (like is there a different strategy to follow with different timeframe is used to trade) ? Have target when trading smaller timeframe and let the profit run when using higher timeframe ? I'm really confused about the situation.

Not sure if it happens to other but when I know the target price and still try to let the profit run, the price reverses from my target point. It makes me upset that I didn't sell although I knew the target price. But on other occasion when I sell on the Target price that I have, the prices crosses and goes high above.

My point is what should I follow in my trading ? What is best to do ? Should I have my Stop loss and Target profit for all my trades with proper Risk/Reward ratio ? Or should I have my stop loss in place according to Risk/Reward ratio and then move it up (trailing stop) as my trade goes in my favor.

Sorry to ask you but I would appreciate and would like to know what's your way of trading ? Do you follow trailing stop or do you have fixed stop loss and Target profit for your trades? Also, do you have any preferences based on the timeframe that you are trading.

Once again thank you very much in advance and hope to hear from you soon.

Thank you

Regards
Ron Kalra

PS :- Any recommendation on where can I find best information on Risk/Reward ratio, Positioning of trades etc

[Reply](#)

- o *Karthik Rangappa* says:
[May 28, 2019 at 2:40 pm](#)

"or is it better to let your profit run" —> always a good idea to let the profits run. You can do so by trailing your SL. This is irrespective of your time frame. Btw, it is always advisable to have the RRR in perspective before any trade. I personally prefer to trail my profits.

Not sure of any websites which gives you the RRR.

[Reply](#)

- *Ron Kalra* says:
[May 29, 2019 at 10:52 am](#)

How to read up or down movement for any particular script at 9.07 am based on pre-open market prices..

[Reply](#)

- o  *Karthik Rangappa* says:
[January 5, 2018 at 11:19 am](#)

You cannot, you will have to wait for the market to open to see the direction. However, you can get a sense of what may happen upon open if you track the news which impacts this stock.

[Reply](#)

-  *Madhav Ketkar* says:
[January 6, 2018 at 4:31 pm](#)

Thnxs for your reply. Kartik. just one guidance required... yesterday (05.01.2018) the movement in Yes bank–Indusind-Bharti-Tata steel-Bajaj finance has taken place during the day. How one can get into the \”Moving Bus\” ...How I would have made money in above scripts yesterday or at what time should I have taken the trade or what are the tools to confirm the \”Strength\” in these scripts for yesterday trade. Did you get what I want to ask ????

[Reply](#)

-  *Karthik Rangappa* says:
[January 7, 2018 at 11:11 am](#)

Madhav, you should have tracked the stock and initiated a position. Usually, when I’m in such a situation, I look for low volume retracements (probably upto the 9 day EMA) and try and get into the trade.

[Reply](#)

211.  *Deepu Pillai* says:
[September 8, 2017 at 9:14 am](#)

Compile all the chapters as a book. This is the next best thing any institutional investor needs as a pocket reader. I would personally recommend newbies to take a holistic approach towards every chapter, align your thoughts with the writer's perspective, challenge it until you are satisfied with the answers and then run the first sprint towards investing.

[Reply](#)

-  *Karthik Rangappa* says:
[September 8, 2017 at 2:02 pm](#)

Hi KARTHIK,

First of all thanks a lot for doing such a wonderful job of educating us regarding financial markets and its various aspects.

I have gone through all of ur modules and they are the guidance which i was searching from a lot of time.

I will request u to write a module on making systems and what should be the thought process behind making systems.

As it is essential for a trader to develop own system for trading

[Reply](#)

-  *Karthik Rangappa* says:
[September 6, 2017 at 11:23 am](#)

True, I will probably do that sometime soon.

[Reply](#)

213.  *Satish Singh* says:
[September 4, 2017 at 2:36 pm](#)

I know it's a little off the topic, but I just love the way things are presented here on this blog. Makes it so much easier to understand and follow.

Is there a way I can use this theme for my personal blog?

I did search online for a theme similar/matching to Varasity, but couldn't find one.

[Reply](#)

-  *Karthik Rangappa* says:

[September 4, 2017 at 8:00 pm](#)

Glad you liked it, Satish. Do feel free to use the theme, please don't forget to give us the credit

[August 18, 2017 at 2:03 pm](#)

Hello Mr Nitin Kamath

My client id ZM6422

I dint found your email hence forward issue to you please help. Not getting proper response from customer support.

Your answer is not justify..Can you please give clarity on my extra charges deducted.. already provided screenshot.. I have checked all the statement for that trade book profit loss statement as well ledger statement but Its not tally with account charges. Not justify,Where extra charges deducted, where is my money gone.

Also new issue arise I bought 61 shares of RBLBANK on 14Aug17 @498.75 then why my holding shows avg price 515.40.

Also want to add I sell @514.70 (8 shares)& @514.45 (53 shares) & buy @ 515.40 (61 shares)RBLBANK Intraday on 17Aug17. Occurred loss, and square off position.

Then why my holding showing 515.40, why should I have been charged in loss for Intraday dated 17aug17.

Horrible experience....Not giving proper response, reply awaited with proper justification..

Because of your poor service I am in loss , feeling harassing...
 Poor service.

Please correct my holding price as 498.75 or else give the financial loss refund due to your fault also refund my excess charged amount of date 26-07-2017.
 Rs1804.1.

please clarify..Don't give unnecessary response, please give response with clarity and calculation part.

Thanks,
 Mohnish

[Reply](#)

o  *Karthik Rangappa* says:
[August 19, 2017 at 8:54 am](#)

Mohnish, I'd request you to restrict yourself to queries related to the topics discussed in Varsity. Else, it will dilute its purpose. I'd request you to email support@zerodha.com for this and one of my colleagues from support will respond to you.

Also, if you have experienced any inconvenience last week, I'd like to apologize. As you may be aware, Bangalore was flooded and therefore our operations took a hit –

224.  *Ankur Agrawal* says:
[August 5, 2017 at 7:24 pm](#)

Hey Karthik!

I desperately want to learn to trade and make decent money from it. I have read all the varsity material and have taken some trades in the past but just could not make a profit.

I am having a hard time believing that someone can make a living out of trading. Tell me is it really possible?

What can I do to get better at trading.

[Reply](#)

-  *Karthik Rangappa* says:
[August 6, 2017 at 12:29 pm](#)

Practice, patience, realistic expectations, and a mindset to control risk is what it really boils down to.

[Reply](#)

225.  *vipin* says:
[August 2, 2017 at 12:23 am](#)

Now that UI has changed....How can I download the material?

[Reply](#)

-  *Karthik Rangappa* says:
[August 3, 2017 at 1:30 pm](#)

We will bring back the PDFs.

[Reply](#)

226.  *Ravi Kumar BA* says:
[August 1, 2017 at 1:06 pm](#)

Karthik,

Am tempted to ask this for self motivation and for others and Since you are an experienced guy in Markets..

For a person like you, how many Intraday trades can you get right, say for every 10 trades you do??

(Even if i can get half of those trades right, i will consider lucky!)

[Reply](#)

-  *Karthik Rangappa* says:
[August 3, 2017 at 1:17 pm](#)

I cannot afford to do intraday trades as time does not permit. However, I do have a 5-year-old portfolio of stocks and it's doing alright. The real test of this portfolio is when we hit a bear market, it will be interesting to see how the portfolio reacts to market conditions. I do take up short term F&O trades...these are highly selective and I take these trades once in a way...maybe once in every 3 or 4 months....and luckily these trades have worked out quite well for me.

[Reply](#)

-  *Ravi Kumar BA* says:
[August 8, 2017 at 6:32 pm](#)

Thanks for that honest feedback...

One question. I plan to use Double Crossover EMA for day trading through my Custom Application.

What other Indicators i can use in conjunction with Double Crossover EMA to make the trades more predictable?

Also, which time frames are better for Day trading: 5 by 10 or 15 by 30 points of 1 min interval or something else?

[Reply](#)

-  *Karthik Rangappa* says:
[August 9, 2017 at 10:25 am](#)

I do like Bollinger bands as they give you a sense of price expansion with respect to mean. Do check this.

[Reply](#)

Happy reading, Ravi 😊

[Reply](#)

228.  *Karan* says:
[July 18, 2017 at 3:51 pm](#)

Hey Karthik. Do you really think technical analysis is useful. You know, I mean, markets are dependent on news, traders are so irrational especially retail traders, they just buy and sell any stock without any logic, something which i think technical analysis cant spot. I am finding it hard to get the motivation to do technical analysis. What do you have to say ?

[Reply](#)

- o *Karthik Rangappa* says:
[July 19, 2017 at 10:42 am](#)

Well, many traders out there follow technical analysis. If you think it does not work, then its all the more reason for you learn TA...because you will get an insight into how other trades would react to a certain situation...and you can take the opposite view 😊

[Reply](#)

229. *abhishek* says:
[May 15, 2017 at 9:57 am](#)

index futures are eligible for pre-market orders?

[Reply](#)

- o *Karthik Rangappa* says:

[March 23, 2017 at 7:13 am](#)

How trading terminal software is different from technical analysis software?

[Reply](#)

- o *Karthik Rangappa* says:
[March 23, 2017 at 12:39 pm](#)

A trading terminal is your gateway to markets, it allows you to transact in the markets. A TA software only allows you to see and analyse the charts. These days, a trading terminal also contains the functionality of a standalone TA software. Check this – <https://kite.trade/docs/kite/#charting>

[Reply](#)

- *Ayush* says:
[March 23, 2017 at 11:31 pm](#)

Cant we buy or sell through technical analysis software?

[Reply](#)

- *Karthik Rangappa* says:
[March 24, 2017 at 11:54 am](#)

PI allows you to trade directly from charts. You may also want to check this – <http://zerodha.com/z-connect/tradezerodha/pi-bridge/pi-bridge-gateway-to-trade->

using-other-programs

[Reply](#)

231.  *Nikhil Thadani* says:

Sir where i get the hard bound books material please guide

[Reply](#)

o  *Karthik Rangappa* says:
[April 17, 2016 at 7:18 am](#)

I guess you are talking about Varsity module. If yes, we only have soft copy Manish, no hardbound books.

[Reply](#)

243.  *Mandar Pandit* says:
[March 2, 2016 at 11:47 am](#)

Do you offer this entire Varsity stuff in Print as a Book. If yes, where can I purchase.

[Reply](#)

o  *Karthik Rangappa* says:
[March 3, 2016 at 8:24 am](#)

No, but you can download this as PDF.

[Reply](#)

244.  *Kiran* says:
[November 29, 2015 at 7:11 am](#)

Sir,

I've seen you talking about derivative trading in one of the previous modules. Would you please elaborate on the term?

I could only guess that this is something different from normal trading(CNC)

[Reply](#)

- o *Karthik Rangappa* says:
[November 30, 2015 at 9:28 am](#)

Derivatives trading in India refers to trading Futures and Options.

Here is the link to Futures module – <http://zerodha.com/varsity/module/futures-trading/>

and here is the link to Options module – <http://zerodha.com/varsity/module/option-theory/>

[Reply](#)

- *Kiran* says:
[December 1, 2015 at 4:35 pm](#)

Thanks a lot 😊

[Reply](#)

245. *Shailey* says:
[November 29, 2015 at 2:31 am](#)

Karthik,

How do I select stocks for day trading? Should I look for 52 week high/low?
Please do a module on day trading.

[Reply](#)

- o *Shailey* says:
[November 29, 2015 at 2:50 am](#)

Should I stick to a single stock?

[Reply](#)

- *Karthik Rangappa* says:
[November 29, 2015 at 5:52 am](#)

Not a bad idea actually, at least till you feel comfortable.

[Reply](#)

- o *Karthik Rangappa* says:
[November 29, 2015 at 5:51 am](#)

Suggest you stick to Nifty 50 stocks for day trading – they are liquid therefore less impact cost.

[Reply](#)

246. *Shailey* says:
[November 23, 2015 at 7:56 am](#)

Kartik,

Do patterns like wedge, pennant and double top have significance on intra-day charts too?

PS- What percentage of capital can be possibly made on an intra-day basis? Today, I made 2.57% of my capital, would that be considered below average?

[Reply](#)

- o *Karthik Rangappa* says:
[November 23, 2015 at 12:24 pm](#)

You can use these patterns for day trading. By the way that's a phenomenal return for a day! I would consider this high.

[Reply](#)

247. *RC Awasthi* says:
[October 14, 2015 at 9:30 am](#)

you Guys are rocking and i am so impressed with you the way you have given the candle knowledge.

[Reply](#)

- o *Karthik Rangappa* says:
[October 15, 2015 at 9:40 am](#)

Thanks for the kind words 😊

Can you please make these modules available in formats like .azw or .mobi for people with kindle to read your modules !

Will be much helpful !

[April 29, 2015 at 5:52 pm](#)

Hi can you help me abt swing trading – ichimoku lines, MACD etc

[Reply](#)

o  *Karthik Rangappa* says:
[April 30, 2015 at 6:10 am](#)

MACD is already explained here – <http://zerodha.com/varsity/chapter/indicators-part-2/>. Will try and add a chapter on ichimoku sometime soon.

251.  *Haradhan Rishi* says:
[April 29, 2015 at 9:25 am](#)

when can we get the pdf? 😊 much more convenient and handy. Loved the pdf for the 1st Module.

[Reply](#)

o  *Karthik Rangappa* says:
[April 30, 2015 at 5:44 am](#)

We are working on it, maybe over the next few days 😊

[Reply](#)

252.  *padwalshubham* says:
[April 24, 2015 at 1:07 pm](#)

Please make this also available in pdf format. It will help a lot. I have poor Internet connection. Make this available in pdf format like the previous module 1.

[Reply](#)

o  *Karthik Rangappa* says:
[April 25, 2015 at 5:48 am](#)

Thanks, in fact we are working on the same. TA should be available very soon.

[Reply](#)

253.  *Vikas.ghode* says:
[April 10, 2015 at 6:28 pm](#)

To download printer friendly contents, copy paste contents once & create a book. Upload online & make me know abt. Also use google chrom > open this page > Cntr+P > select printer : \'Save as PDF\' > Click \'Save\' button > save in some folder > either read as PDF offline or take print outs(ignoring comments page, but they are also helpful, like questions of Arjun to Lord Krishna in \'The Bhagwad Geeta\'). This can be investors Geeta one day...

[Reply](#)

o  *Karthik Rangappa* says:
[April 11, 2015 at 9:50 pm](#)

Vikas as I said the official PDFs are going to be released soon, so please dont take the trouble of doing all this 😊

Also, not sure of this has the ability to become a Geeta for investors....but if it can lead investors and traders on the right path, helping them know what works and what does not work in the market then that will be the most satisfactory feeling for us at Zerodha!

[March 26, 2015 at 3:13 pm](#)

karthik, was this a failed bullish harami? it was at support and the volumes were good too. the RSI is at oversold ,though the MACD crossover was negative. could it have failed due to the announcement of rights issue?

[Reply](#)

o  *Karthik Rangappa* says:
[March 27, 2015 at 5:11 am](#)

Happy to note that you are following the checklist 😊

Yes, clearly this is a failed pattern. One rule that I personally follow – never trade a stock based on technicals when there is a fundamental news around it.

[Reply](#)

255.  *iyengarnsv* says:
[March 26, 2015 at 1:36 pm](#)

I have opened most of the lectures. The main problem is background colours are not good since letters are not clear. Even the lectures letters are very dim. Difficult to read. Please rectify.

[Reply](#)

o  *Karthik Rangappa* says:
[March 27, 2015 at 5:05 am](#)

We are exploring an e-book or PDF option for Varsity, this will help I guess. Please give us some time for this. Thanks.

[Reply](#)

o  *Ali* says:
[June 15, 2015 at 10:58 pm](#)

Excellent way of writing Karthik – good read for both novice and experienced trader.

Do you plan to add fundamental modeling of investment practice and programming for traders , and any other modules etc... originally mentioned in the zerodha varsity introduction post by nitin

[Reply](#)

■  *Karthik Rangappa* says:
[June 16, 2015 at 4:58 am](#)

Thank you 😊

Yes, we do plan to add all these module and more one by one. Request you to please stay tuned. You can even follow Varsity on Twitter for regular update – <https://twitter.com/ZVarsity>

[Reply](#)

256. *metuladhia* says:

[February 16, 2015 at 2:25 pm](#)

Hi, is there a way I can get a printer friendly version of any of the modules? It's easier to read way. Do let me know.

[Reply](#)

o *Karthik Rangappa* says:

[February 16, 2015 at 4:14 pm](#)

Not as of now. This is work in progress and as you may have noticed readers have been helpful in highlighting few typo errors. Over time Varsity will evolve and hopefully by then we should have a print friendly PDFs. For now, request you to stay tuned online 😊

Hi Karthik,

Really appreciated efforts from you & Zerodha on this initiative.TA was rocket science for common retail trader so far but with this initiative it became a pocket science for us. Zerodha gonna surpass

every player in this field in coming years for sure.
Keep up the innovative work you guys doing.have a great year ahead.

[Reply](#)

-  *Karthik Rangappa* says:
[January 3, 2015 at 4:47 pm](#)

Well, the idea is to make all topics related to markets pocket science 😊

[Reply](#)

-  *Karthik Rangappa* says:
[January 3, 2015 at 4:49 pm](#)

Well, the idea is to make all topics related to markets \'pocket science\' so stay tuned :). Wishing you a great year ahead!

261.  *avidan pell* says:
[December 18, 2014 at 3:04 am](#)

is there a way to download all the information in pdf format? like all the modules? I wouldnt mind paying a small fee for that

thanks

[Reply](#)

-  *Karthik Rangappa* says:
[December 18, 2014 at 6:26 am](#)

Hi Avidan...unfortunately PDFs may not be possible at this stage. Will keep you posted on it if we decide to do it in the future. Thanks.

[Reply](#)

262.  *RP1600* says:
[November 21, 2014 at 10:54 am](#)

Easy to understand

[Reply](#)

263.  *iyengarnsv* says:
[November 20, 2014 at 7:31 am](#)

The lectures are vey good but it is very difficult to read the contents since the typed letters are very faint. Can you make it little dark. In my laptop my setting is ok.

[Reply](#)

- o  *Karthik Rangappa* says:
[November 20, 2014 at 9:43 am](#)

Thanks for bringing this to attention, we will try and fix this.

[Reply](#)

-  *KAMLESH KUMAR* says:
[June 5, 2018 at 12:03 am](#)

You font are still very faint , light gray which makes it very difficult to read without specs. I dont know why it can not be black colour font which are easy to read

[Reply](#)

-  *Karthik Rangappa* says:
[June 5, 2018 at 10:40 am](#)

Can you try zooming in from your browser?

[Reply](#)
